AIR NAVIGATION RADIO AIDS

ALWAYS CHECK NOTICES TO AIRMEN SECTION

INSACS = Interstate Airway Communications Station/s (CAA)

VHF OMNI-RANGE: "Non-commissioned" VHF omni-ranges may lack certain items, such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly.

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES: Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated INSACS. (C) The station identification is monitored continuously by the communicator at the associated INSACS. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated INSACS. Category I (VOR) = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category I are met. NOTE: Category II indicated by parenthetical (2). Category III = Facility monitored soley through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an INSACS, and located too distant from INSACS to be monitored with a VHF receiver will fall into Category III. NOTE: Category III indicated by parenthetical (3).

NOTE: Letters between range courses are quadrant identifiers, e.g., "90 YN 180", indicates the quadrant between the two courses is a yellow N quadrant. The letter immediately following a range course indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual: "A" or "N" aural. In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

LEGEND

(A) = Air Force facility. (N) = Navy facility. (P) = Private facility. (S) = State facility.
(g) = Twr equipped with 121.9 mc or (g.7)=Twr equipped with 121.7 mc for ctl of gnd traffic.
(0700-2300) = Hours of operation local time.
(3) = Monitoring category
(B) = Blue Hemisphere. (Y) = Yellow Hemisphere
→ New or revised data
* = Automatic voice identification
[redacted] Information deleted.

RADIO CLASS DESIGNATIONS

AC. . . . . Approach Control Tower, CAA (transmits on voice channel of associated ranges and ILS in addition to frequencies listed)
B. . . . . Scheduled Broadcast Station (broadcasts weather at 15 and 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C. . . . . Control Tower, CAA
CI. . . . . Control Tower, (City, County, Private, etc.)
D. . . . . Distantly controlled

DME. . . . Distance Measuring Equipment
FM. . . . . VHF fan marker (100 watts)
GCA. . . . Ground Controlled approach system
H. . . . . Non-directional radio beacon (homing), power 50 watts to less than 2000 watts
HH. . . . . Non-directional radio beacon (homing), power 2000 watts or more
ILS. . . . Instrument Landing System (voice on localizer channel)
J. . . . . L/MF (200-415 kc) voice facility on other than range frequency
LFM. . . . VHF fan marker, low powered (5 watts)
LMM. . . Compass locator station when installed at middle marker site
LOM. . . . Compass locator when installed at outer marker site
LVOR. . . Low power VOR (with standby equipment)
MH. . . . . Non-directional radio beacon (homing) power less than 50 watts
ML. . . . . Range (loop radiators), power less than 50 watts
MM. . . . VHF middle marker
MOR. . . . Low frequency omni-drectional range
MRA. . . . Range (adcock, vertical radiators), power 50 or more, but less than 150 watts
MRL. . . . Range (loop radiators), power 50 or more, but less than 150 watts
OM. . . . . VHF outer marker
P. . . . . Point-to-Point radio
RA. . . . . Range (adcock, vertical radiators), power 150 watts or more
RAPCON Radar Approach Control Center.
RL. . . . . Range (loop radiators), power 150 watts or more
S. . . . . Simultaneous range, homing and voice signals available. Inclusion suffix "W" indicates range and homing signals only
T. . . . . Teletype
TVOR. . . Low power VOR (no standby equipment) located on airport
TX. . . . . Principal teletype
V. . . . . Additional VHF voice feature on other than range frequency
VAR. . . . Visual-aural VHF range
VOR. . . . VHF omni-directional range (omni-range)
W. . . . . Without voice facilities on range frequency
Z. . . . . VHF station location marker at a range station

NOTES

1. Range courses are magnetic in-bearings
2. All CAA MH facilities operate continuously unless cited as follows: (on req)
3. All CAA ranges operate continuously. Those which are not manned continuously are cited in the remarks column with hours of operation in parentheses, e.g., (0600-2400)
4. VHF and LF/LMF ranges listed with the same identifier are controlled by the same INSACS. Due to space limitations the DTV and communication frequencies which are listed with the LF/LMF facility are not repeated with the VOR facility

Pilots are requested to indicate when calling C.A.A. airway communications stations and control towers the frequency on which the reply is expected.

The printing of this publication has been approved by the Director of the Bureau of the Budget, April 8, 1953

For sale by Superintendent of Documents, U. S. Government Printing Office, Washington 25, D.C. - Prices: annual subscription $2.75, domestic; $1.00 additional for foreign mailing; individual copies vary; this issue 45 cents.

RADAR AVAILABLE : How and Where

(20 Mar 1956)

PAR • Precision Approach Radar. ASR • Airport Surveillance Radar. GCA • Ground Controlled Approach • Military Equivalent of Combined ASR and PAR Equipment. ARSR • Air Route Surveillance Radar. RAPCON • Radar Approach Control Center.

GROUND CONTROLLED APPROACHES • The only airborne equipment required for ground controlled approaches is a functioning radio transmitter and receiver. There are two types of ground controlled approaches • Precision and Surveillance

PRECISION APPROACHES • Aircraft are guided to final approach to the designated instrument runway. The final approach flight path on a precision scope (PAR) is greatly expanded for increased accuracy and furnishes the controller with range, azimuth and altitude information. This permits the controller to accurately guide aircraft to touchdown on the runway

SURVEILLANCE or ASR APPROACHES Only the ASR scope is used and aircraft may be directed to any selected runway over approximately the same flight path the pilot would take if flying VFR This scope furnishes range and azimuth information only Since no altitude information is available to the controller, pilots must control their descent based on the glide angle desired, and the distance from the runway as furnished by the controller. Because ASR does not permit the same degree of accuracy as PAR, the weather minimums for a surveillance approach are usually higher than for a precision approach.

RADAR ARRIVAL AND DEPARTURE CONTROL • Radar is utilized by certain radar equipped facilities to control the flight paths of arriving or departing IFR aircraft for the purpose of expediting the flow of traffic Aircraft operating on IFR flight plans will be afforded a minimum of three miles horizontal separation unless standard non-radar vertical, lateral or longitudinal separation exists. This should not be confused with Ground Controlled Approach (GCA) which is an instrument approach aid.

CAA RADAR UNITS • Operate continuously at the locations listed. Available to all pilots, civil and military. Contact associated CAA control tower on any frequency guarded for initial instructions, or in an emergency any CAA facility for information on nearest Radar Control. Weather minimums associated runways and GCA procedures are listed in the Airman's Guide.

RAPCON • At certain locations, the surveillance portion of Military RAPCONS is operated by the CAA and service is available to all aircraft. These are listed below.

AIR FORCE AND NAVY GCA UNITS • Available to civil pilots in emergency or by prior arrangement with C.O. of respective facility.

Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call the nearest air traffic control facility (radio, airways, or tower, etc.) requesting GCA and further instructions.

Contact under VFR: VFR check-out of training flights should be arranged locally through Base Operations or the Control Tower.

Emergency: When receiver or transmitter difficulties exist, the tower may relay GCA approach instructions to the pilot, or the GCA operator may transmit, in blind, instructions for aircraft to make 360 degree turns for identification. In either case, instructions will be followed at the pilot's discretion. After being inoperative, GCA units require 20 to 30 minutes for warming up. Pilots shoud anticipate requirements for GCA in flight planning and request alerting of GCA units as far in advance as possible Civil Minimums at military installations established by the CAA are 400' ceiling and 1 statute mile visibility except in emergency unless Air Force or Navy facility being used has higher minimums. Navy units are prepared to transmit on HF from 2,000 to 18,000 kc and receive any frequency from 1,500 to 9,050 kc to aid any plane in emergency.

RADAR FLIGHT ADVISORY SERVICE: This service to aircraft encountering severe weather conditions may be obtained by requesting radar advisory through an appropriate ground station or direct ARTC communication. ARTC will determine if service can be provided and will request pilot to change to appropriate frequency for direct communication with radar. Radar station will be identified by "THIS IS AIR FORCE RADAR ADVISORY". All suggested vectors to circumnavigate storm areas will be of advisory nature and do not relieve pilot of responsibility for safety of aircraft. If advisory service cannot be furnished for any reason, the procedure word "UNABLE" will be used. This will terminate radar advisory service to the aircraft without further explanation. This service will be available in the following ARTC Flight Advisory Areas; Chicago, St. Louis, Minneapolis, Kansas City, Albuquerque, San Antonio, Ft. Worth, Oakland, Denver, Great Falls, Los Angeles, and the area immediately around Knoxville, Tenn.

CAA OPERATED RADAR UNITS

NOTE: Transmitting frequencies below 118 mc. are not guarded. Other transmitting frequencies listed are guarded plus 122.5 mc. and 3023.5 kc. Transmit and guard 121.5 mc. all locations.

DIRECTORY OF AIRPORTS – LEGEND

CITY AND AIRPORT NAME

(AF) City and Airport Name (with L or P in Type Column) - a civil airport with Air Force operations, reserve training, or other such activity thereon.

NOTE: Similar combinations of above citation of A,N,CG, and NG indicate the same is applicable for Army, Navy, Coast Guard, and National Guard fields, respectively.

(P) City and Airport Name - Civil Airport covered by an agreement between municipality and U.S. Government which permits use by transient military aircraft.

(PC) Same legal status as (P), but closed to all USAF pilots not possessing their own clearance authority in accordance with AFR 60-16.

NOTES:

1. Where lights are owned or maintained by CAA the site number and airway abbreviation are included in the city and airport name column ie: Chadron, 15, CYS-HON.

2. USAF aircraft are permitted to use only those fields prefixed with an AF, A, N, NG, CG, P, PC.

3. When city and airport names are identical, the airport name is omitted to conserve space.

4. When city is part of airport name, a dash will appear between city and airport, such as Venice-State.

TYPE

P - Public Use L - Limited

NOTES

PUBLIC USE - Intended for general use by the public at large, this category consists of:

(1) Operationally active airports (those attended during normal working hours of each day, and provide, as a minimum of service, aircraft fuel for sale at the airport).
(2) All airports serving scheduled and large irregular air carriers as regular, alternate and provisional stops.
(3) All CAA intermediate landing fields.
(4) All airports having a true light certificate to indicate a lighted airport.

Data on these airports are obtained from physical inspections made by CAA personnel.

LIMITED - All airports not qualifying as "Public Use" (See definition above)

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is from the center of referenced city to airport and carried in statute miles.

ALWAYS CHECK NOTICES TO AIRMEN SECTION

LOCATION (Continued)

If orientation features are less than 1/2 mile from the field, distance is not specified.

ELEVATION

Elevation is given in feet above mean sea level and is based on highest usable portion of landing area.

NUMBER OF RUNWAYS

No differentiation is made between runways and strips as far as number of landing areas in field is concerned.

LONGEST RUNWAY AND FACILITIES

In this column are included the length and surfacing of the longest runway, the lighting and servicing facilities, weather reports, and unicom available.

RUNWAYS

The length of the longest paved runway or non-paved strip is stated in hundreds of feet, using 70 as division point. If the length is not prefixed, the surface is sod, clay, gravel, etc.

h -runway is paved (concrete, asphalt or similar type of paving)
aw -allway field
(26) -runway or strip length not verified by C.A.A.

LIGHTS

B: Rotating Light (Rotating beacon)
(Green and white, split-beam and other types)
Omission of B indicates rotating light is either not available or not operating standard hours (sunset-sunrise)

NOTE: Code lights are not codified, and are carried in Remarks Column.

L: Field Lighting
L - by itself indicates temporary lighting, such as flares, smudge pots, lanterns.
1 - Portable lights (Electrical)
2 - Boundary
3 - Runway floods
4 - Runway or Strip
5 - Instrument approach (neon)
6 - High intensity runway
7 - High intensity instrument approach

* An asterisk preceding an element indicates that it operates on prior request only (by phone call, telegram or letter). Where the asterisk is not shown, the lights are in operation or available sunset to sunrise by request (circling the field or radio call).

Because the obstructions on virtually all lighted fields are obstruction lighted, obstruction lights have not been included in the codification.

SERVICING

S1: Storage
S2: Storage, minor aircraft repairs
S3: Storage, minor aircraft, and minor engine repairs
S4: Storage, major aircraft, and minor engine repairs
S5: Storage, major aircraft, and major engine repairs

NOTE: Any S combination without parenthesis indicates only full-time day attendant. Fields having lighting facilities may have 24 hours attendant available.
Any S combination in parenthesis-part time or irregular attendant.

WEATHER

W: Weather reports available from Weather Bureau or CAA communications station on field.

UNICOM

U: Unicom (Aero Advisory Station transmitting and receiving on 122.8 mc). Operates during airport hours only.

FUEL OCTANE

F1: 80 oct., at least F3: 91/96 oct., and lower
F2: 80/87 oct., and lower F4: 100/130 oct., and lower

NOTE: If only one octane available, this octane cited, and not coded.
Any F combination without parenthesis indicates full time day attendant, in parenthesis part-time or irregular attendant.

REMARKS

(a) "INACTIVE" indicates usable civil field, but not being operated, at last inspection. Caution advised.
(b) "CLOSED" indicates closed to all traffic except in emergency.
(c) "ABANDONED" indicates reverted to non-airport usage such as farming or grazing.
(d) "REPORTED ABANDONED" indicates an airport reported abandoned but not verified as such by C.A.A.
(e) "FEE" indicates landing charges for private or non-revenue producing aircraft. In addition, fees may be charged for planes that remain over a couple of hours and buy no services, or at major airline terminals for all aircraft.
(f) "Blkd" indicates approaches where glide angle to runway is 3:1 or less.
(g) "Rgt tfc N" indicates right turns should be made on landings and take-offs to N.

NOTES

1. ← New or revised data.
2. SCHEDULED AIRLINE STOP: Airport names are capitalized.
3. OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, for example, clearly discernible for contact operations, are frequently omitted. On the other hand, all pole lines within at least 15:1 glide angle are indicated.
4. NEW AIRPORTS: At the end of each state, under this listing will be found, out of alphabetical alignment, all the new airports tabulated after the type for that state had been originally set up.

NOTICES TO AIRMEN

SPECIAL NOTICES

✓ Indicates New or Revised Special Notices

The Airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting, or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a Notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the Office of Aviation Information, Attention: W-52, CAA, Washington 25, D. C.)

Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate CAA Regional Office for coordination before they are included in the Airman's Guide.

ATC IFR CLEARANCE PHRASEOLOGY: Effective November 15, 1955, ATC facilities will resume general use of the phrase "VIA FLIGHT PLANNED ROUTE" in air traffic clearances to replace the lengthier detailed description of any portion of the route of flight that is identical to the route filed by the pilot. When used, the phrase will be preceded by sufficient detailed route of flight information to establish the flight on the filed route. The "VIA FLIGHT PLANNED ROUTE" phraseology does not include approval of altitudes filed in the flight plan. Specific altitudes assignments will be issued in each clearance. IFR flight plans filed by the pilots should contain the complete route of flight and should be relayed to air traffic control unchanged. Pilots may request route verification when considered necessary and are requested to do so whenever a filed route has been changed prior to departure. If route verification is desired prior to departure, the request should be included with the initial call for taxi clearance to avoid delay in receiving the information.

VHF INSACS-TO-PRIVATE AIRCRAFT CHANNELS: The national VHF channel for transmission from INSACS-to-private aircraft 122.2 mc was partially implemented beginning August 1, 1951. (The companion aircraft-to-INSACS frequency is 122.1 mc). Eventually all INSACS will transmit on 122.2 mc but in the meantime VHF reply to private aircraft will be furnished on the VHF range voice channel at INSACS which have not yet commissioned 122.2 mc. Pilots should consult the Airman's Guide and current Notams for information on frequencies available at specific stations. The frequency upon which the pilot expects reply should be specified in the initial call.

When an INSACS is unable to reply on the VHF range voice channel because of equipment failure or maintenance shut down, reply will be made on 121.5 mc. A small number of INSACS have not yet installed transmitting service on 121.5 mc. At these locations, the reply on 121.5 mc will be made by an adjacent control tower. Therefore, when a pilot calling such station has reason to believe that the VHF range voice channel is not operating, he should request reply on 121.5 mc.

USE OF OMNIRANGE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. The accuracy of course alignment of the omnirange over 360° azimuth is excellent when compared to that of the L/MF range, being generally within two degrees (plus or minus). On certain stations, some sectors may contain slightly larger errors, but no course published as usable in the Airman's Guide will be displaced more than 3-1/2 degrees from its theoretical location. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, infrequent brief flag alarm activity, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert of these apparent vagaries.

AUTOMATIC VOICE IDENTIFICATION: Voice identification has been added to numerous air navigational facilities (omnirange stations and outer compass locators).

Omniranges and outer compass locators where voice identification is functioning are designated in the ANRA pages by an asterisk (*) in the "class identification" column. The transmission consists of a voice announcement alternating with the usual Morse Code identification: e.g. Long Beach omnirange (voice) .—..- -.-.. (LGB in Code).

For omniranges, as shown above, normal voice identification consists of the name of the omni followed by the word "omni". However, if the omni is unattended, i.e., if no facility for providing air-ground communications services is associated with the omni, the word "unattended" will precede the word "omni". Example: AIRVILLE UNATTENDED OMNI.

TRANSMISSION OF "V" BY VAR RANGES: The letter "V" is transmitted by all VAR ranges. It precedes the usual location identifier and is separated from it by a short space. It is intended to enable pilots to distinguish instantly between the aural directional signals of VAR ranges, and those of low or medium frequency ranges, ILS and VORs located in the same general area. It will, for example, guard against the possibility of an error occuring through accidental connection of a pilot's headset to the wrong receiver. The "V" is transmitted at an appreciable higher rate of speed than the location identifier.

CIVIL USE OF MILITARY FIELDS: U. S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission.

In the case of Air Force Bases, pilots must have on file with Headquarters USAF a "HOLD HARMLESS" AF form 180 and in their possession a properly signed and executed AF form 181 permit. Application for these forms may be made to: Assistant Chief of Staff, Installations, HQ, USAF, Washington 25, D. C. This regulation will be strictly enforced.

For Naval Installations, prior permission should be requested from the Chief of Naval Operations (OP 532) via the Commanding Officer of the field concerned, (who has the authority to approve landing rights for certain categories of civil aircraft). However, with minor exceptions, authority to use Navy fields is granted only to aircraft on government business, or when no suitable civil airport is available in the vicinity.

When instrument approaches are conducted by civil aircraft at military airports, they shall be conducted in accordance with the procedures and minimums approved by the military agency having jurisdiction over the airport.

WARNING OF MAINTENANCE AT CAA NAVAIDS: During periods of routine or emergency maintenance, the coded identification (or code and voice, where applicable) will be removed from certain CAA Navaids, namely, ILS localizers, VHF ranges (VOR, TVOR and VAR) and L/MF ranges but not from "H" facilities, compass locators or 75 mc marker beacons. The removal of identification serves as a warning to pilots that the facility has been officially taken over by "Maintenance" for tune-up or repair and may be unreliable even though on the air intermittently or constantly.

NAUTICAL MILE AND STATUTE MILE ABBREVIATIONS: In the Airman's Guide, "n miles" or "n mi" stands for nautical miles; "s miles" or "s mi" for statute miles.

DVFR FLIGHT PLANS: When an IFR flight plan is cancelled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

FLIGHT PLANS: Pilots are urged to file VFR flight plans in person or by telephone prior to departure. Radio should be used for filing flight plans only when it is impossible to file in person or by telephone. This procedure is necessary in order to avoid congestion on the already busy air-ground communications channels. These channels should be reserved for essential in-flight communications. All pilots will benefit by following this practice.

(20 Mar 1956)

RUNWAY VISUAL RANGE REPORTS AT NEWARK, N.J.: Effective March 3, 1956, measurements of runway visibility for Runway 4 at Newark, New Jersey, will be in terms of Runway Visual Range which is the distance high intensity runway lights can be seen by an observer located at the runway threshold viewing the lights in the same direction as a pilot making an approach.

The ILS and PAR instrument approach procedures for Newark will be amended to authorize 2600' of runway visual range as an additional operating minimum for straight-in approaches to Runway 4. When measurements of Runway Visual Range are being taken, the tower will give pilots the reported Runway Visual Range in addition to the reported meteorological ceiling and visibility prior to commencing approach. When the meteorological ceiling and visibility(contained in "main body" of sequence report which is the average weather for the airport proper) are reported below minimums, (e.g. 200.5), an approach may be conducted to Runway 4 provided Runway Visual Range is reported at or above 2600'. The "remarks" portion of the hourly weather sequence for Newark will report Runway Visual Range in hundreds of feet, and runway visibility will no longer be reported in miles and fractions.

Since Runway Visual Range recognizes the additional penetration provided by high intensity runway lights and is measured in terms of what a pilot actually sees, pilots will have better assurance of finding runway conditions substantially as reported when arriving over the threshold.

The Runway Visual Range minimum of 2600' is also based on the penetration ability of the approach lighting system installed at Newark which is designed to assure earlier transition from instrument to visual flight.

RADIO CALL-UP PROCEDURES - ARTC CENTERS: Effective February 1, 1956, aircraft on IFR flight plans making position reports direct to ARTC centers shall, in the initial call-up include the fix or geographical location over which the aircraft is reporting. Examples: "Indianapolis Center, this is TWA 55, Maxwell, over."; "Indianapolis Center, this is Beechcraft 1234, 20 south of Maxwell, over."

Pilots are reminded, however, that direct communication with the center shall NOT be established until the pilot is specifically requested to do so.

UNACCEPTABLE RADIO MESSAGES: CAA facilities will no longer accept non-safety messages (requests for ground transportion, meals, telephone calls, etc.) from pilots of aircraft in flight. Arrangements should be made by a pilot prior to departure via public communications (telephone, telegraph, etc.) for such requirements. Pilots are also reminded that transmission of such messages violates the terms of their aircraft radio license as provided in Part 9 of the FCC Regulations.

ICAO PHONETIC ALPHABET CHANGES: Effective March 1, 1956, replace the words Coca, Metro, Nectar, Union and Extra with the words Charlie, Mike, November, Uniform and Xray, respectively.

CLASSIFICATION OF ILS BACK COURSES: ILS back courses have in the past been classified as either "usable" or "unusable". It now appears that further classification of the "unusable" courses are necessary, since some back courses formerly classified as "unusable" actually may be satisfactory for intersections, holding, transitions or missed approaches, even though they are not satisfactory for back course approaches.

ILS back courses will in the future be classified as follows:

Usable - suitable for ILS back course approaches

Restricted - not suitable for ILS back course approaches, but suitable for intersections, holding, transitions or missed approaches

Unusable - not suitable for any of the above.

SPURIOUS GLIDE SLOPE INDICATIONS: CAA glide slope facilities are intended to provide reliable glide slope signals for use in conjunction with the front course of the ILS localizer. Glide slope signals may be received in other azimuths (because of stray radiation from the antennas and reflections from nearby objects) which may in some cases be sufficient to activate the airborne warning flag. Any glide slope needle activity in these other azimuths should be disregarded.

All pilots are particularly cautioned to ignore glide slope indications when making back course localizer approaches. All CAA approved procedures for back course approaches are limited to use of the localizer portion of the ILS. Any attempt to fly spurious glide slope indications on such back course approaches could result in hazardous operations.

GLIDE SLOPE FLARE: Modification of nulls reference glide slope facilities will result in glide slope flare at about thirty (30) feet above runway. Caution advised on automatic approaches continued past runway threshold.

FLIGHT IN RESTRICTED AREA: Pilots are responsible for obtaining an approval from the appropriate controlling agency prior to conducting flight in Restricted Areas, when governing restrictions are in effect. ATC is unable, because of communications workload and other factors, to obtain such approval for pilots. An ATC clearance should not be considered as authority to conduct flight in Restricted Areas EXCEPT where a control area overlays a Restricted Area as ATC has responsibility only within controlled airspace.

NON-STANDARD HOLDING PATTERNS: The following non-standard holding pattern is established:

(1) CHARLES CITY, VA. INTSXN - direction of holding - E side of Waverly LFR north course, north of the intersection; direction of turn - LEFT; time - one minute; minimum altitude - 1500'.

AIR ROUTE TRAFFIC CONTROL BOUNDARY AND FLIGHT ADVISORY AREA BOUNDARY AMENDMENTS: Effective March 12, 1956, the control area and flight advisory area boundaries between the St. Louis-Chicago; St. Louis-Indianapolis; St. Louis-Memphis; St. Louis-Kansas City; St. Louis-Oklahoma City are revised as described:

1. Starting at a point on the existing St. Louis-Chicago control boundary, 25 statute miles northeast of the Springfield, Ill., omnirng on Civil Airways Blue 6, Amber 5, V-59, V-9, V-69 and V-173;

2.*Thence along the St. Louis-Chicago-Indianapolis control boundary direct to a point 65 statute miles northeast of the Vandalia, Ill., omnirng stn on Civil Airways V-191, V-50, V-72, V-12/V-14/V-186, Green 4, V-174, V-88/V-176, V-59E and 59;

3.*Thence along the St. Louis-Indianapolis control boundary direct to a point 45 statute miles northwest of the Evansville, Ind., omnirng stn on Civil Airways V-4, V-4S and V-190;

4. Thence direct to and along the St. Louis-Memphis control boundary, 35 statute miles north of the Paducah, Ky., omnirng stn on Civil Airway V-179;

5.*Thence along the St. Louis-Memphis control boundary direct to a point 20 statute miles southeast of the Farmington, Mo., omnirng stn on Civil Airways Amber 5, V-178, V-178S, V-9, V-9W, V-69 and V-191. (This point joins the existing St. Louis-Memphis control boundary)

6. Beginning again at a point on the existing St. Louis-Fort Worth control boundary, 88 statute miles southwest of the Tulsa, Okla., omnirng stn on Civil Airways V-15E, Blue 70, V-15 to the south edge of Civil Airway V-14S;

7.*Thence along the St. Louis-Oklahoma City RAPCON control boundary from the south edge of Civil Airway V-14S, 55 statute miles northeast of the Oklahoma City, Okla., omnirng stn on Civil Airways V-14S, Amber 4, V-14 and V-14N;

8. Thence direct to a point at 36°,06' 45" north latitude and 97° 15' 30" west longitude;

9.*Thence direct to and along the St. Louis-Kansas City control boundary, 55 statute miles northwest of the Tulsa, Okla., omnirng stn on Civil Airways V-74S, V-74, Blue 22, V-73 and V-190;

10. Thence direct to and along the St. Louis-Kansas City control boundary, 25 statute miles south of the Chanute, Kansas, LFR stn on Civil Airway Amber 4;

11. Thence direct to and along the west edge of Civil Airway V-161 northeastward to a point 30 statute miles southeast of the Butler, Mo., omnirng stn, forming the St. Louis-Kansas City control boundary on Civil Airway Red 105;

12.*Thence via an arc 30 statute miles southwest and south of the Butler, Mo., omnirng stn to the west edge of Civil Airway V-71/V-205W, forming the control boundary on Civil Airways V-161, V-13W, V-13 and V-71W;

13. Thence directly eastward to the east edge of Civil Airway V-205 at a point 60 statute miles northwest of the Springfield, Mo., omnirng stn on Civil Airways Blue 61, V-71/V-205W and V-205;

14. Thence direct to a point on the west edge of Civil Airway Blue 9, 65 statute miles north of the Springfield, Mo., omnirng stn. (This point joins the existing St. Louis-Kansas City control boundary.)

Where the paragraph number is followed by an asterisk (*), the control area/flight advisory boundaries are to be depicted as an arc.

CIVIL AIRWAY, CONTROL AREA, CONTROL AREA EXTENSION, CONTROL ZONE AND REPORTING POINT AMENDMENTS: Effective May 3, 1956, unless otherwise advised, the following civil airways, control areas, control area extensions, control zones and reporting points are amended in whole or in part as follows:

CIVIL AIRWAYS: (1) Red civil airway No. 96 (Palacios, Tex., to Baton Rouge, La.), is amended to read: "From the Palacios, Tex,, radio rng stn via the Houston, Tex., rdo rng stn; Beaumont, Tex, rdo rng stn; Lake Charles, La., rdo rng stn; Lafayette, La., nondirectional rdo bcn to the Baton Rouge, La., rdo rng stn."

(2) VOR civil airway No. 1 (Charleston, S.C., to New York, N.Y.), is amended by changing the last two portions to read: "From the point of intsxn of the Norfolk, Va., VAR north course and the Norfolk, Va., Navy rdo rng east course via the intsxn of the Norfolk VAR north course and the Salisbury omnirng 206° True radial; Salisbury, Md., omnirng stn; intsxn of the Salisbury omnirng 038° True and the Coyle omnirng 203° True radials; Coyle, N. J., omnirng stn; to the Colt's Neck, N. J., omnirng stn. Those portions of this airway between the point of intsxn of the Dover, Del., omnirng 070° True and the Coyle, N. J., omnirng 203° True radials and the Colt's Neck, N. J., omnirng stn more than 3 miles either side of the center line and those portions in conflict with the Patuxent Restricted Area (R-43) are excluded."

(3) VOR civil airway No. 3 (Key West, Fla., to Presque Isle, Maine), is amended by changing the portion which reads: "Brunswick, Ga., omnirng stn, including a west alternate via the intsxn of the Jacksonville omnirng 309° True and the Brunswick omnirng 203° True radials;" to read: "Brunswick, Ga., omnirng stn, including a west alternate via the intsxn of the Jacksonville omnirng 304° True and the Brunswick omnirng 203° True radials;"

(4) VOR civil airway No. 5 (Miami, Fla., to London, Ont.), is amended by adding a new last sentence to read: "Those portions of this airway which overlap the Jacksonville Restricted Area (R-161), the Lake George Restricted Area (R-176) and the Sterling Restricted Area (R-169 and R-170) are excluded."

(5) VOR civil airway No. 10 (Pueblo, Colo., to New York, N. Y.), is amended by changing all after the Allentown, Pa., omnirng stn to read: "Allentown, Pa., omnirng stn; Colt's Neck, N. J., omnirng stn; to the point of intsxn of the Colt's Neck omnirng 103° True and the Riverhead, N. Y., omnirng 222° True radials."

(6) VOR civil airway No. 12 (Santa Barbara, Calif., to Philadelphia, Pa.), is amended by changing the portion which reads: "Tucumcari, N. Mex., omnirng stn, including a north alternate;" to read: "Tucumcari, N. Mex., omnirng stn, including a north alternate via the intsxn of the Anton Chico omnirng 067° True and the Tucumcari omnirng 289° True radials."

(7) VOR civil airway No. 16 (Los Angeles, Calif., to Boston, Mass.), is amended by changing all after the Dover, Del., omnirng stn to read: "Dover, Del., omnirng stn via the Dover omnirng 244° True radial; Coyle, N. J., omnirng stn; point of intsxn of the Colt's Neck N. J., omnirng 103° True and the Riverhead omnirng 222° True radials; Riverhead, N. Y., omnirng stn; intsxn of the Riverhead omnirng 042° True and the Norwich omnirng 224° True radials; Norwich, Conn., omnirng stn; to the Boston, Mass., omnirng stn."

(8) VOR civil airway No. 18 (Dallas, Tex., to Charleston, S. C.), is amended by changing the portion which reads: "Monroe, La., omnirng stn;" to read: "Monroe, La., omnirng stn, including a north alternate;"

(9) VOR civil airway No. 159 (Miami, Fla., to Albany, Ga.), is amended by adding a new last sentence to read: "The portions of this airway which overlap the Sterling Restricted Area (R-169 and R-170) are excluded."

(10) VOR civil airway No. 220 (Kremmling, Colo., to Akron, Colo.), is amended to read: "From the Kremmling, Colo., omnirng stn via the point of intsxn of the Kremmling omnirng 081° True and the Denver, Colo., omnirng 334° True radials; to the Akron, Colo. omnirng stn."

(11) VOR civil airway No. 230 (Salinas, Calif., to Fresno, Calif.), is added to read: "From the Salinas, Calif., omnirng stn to the Fresno, Calif., omnirng stn."

(12) VOR civil airway No. 234 (Anton Chico, N. Mex., to Dalhart, Tex.), is added to read "From the Anton Chico, N. Mex., omnirng stn via the intsxn of the Anton Chico omnirng 067° True and the Dalhart omnirange 243° True radials; to the Dalhart, Tex., omnirng stn."

CONTROL AREAS: (1) VOR civil airway No. 220 (Kremmling, Colo., to Akron, Colo.), is added to read: "All of VOR civil airway No. 220."

(2) VOR civil airway No. 230 (Salinas, Calif., to Fresno, Calif.), is added to read: "All of VOR civil airway No. 230."

(3) VOR civil airway No. 234 (Anton Chico, N. Mex., to Dalhart, Tex.), is added to read: "All of VOR civil airway No. 234."

CONTROL AREA EXTENSIONS: (1) (Little Rock, Ark.), is amended to read: "That airspace north of Little Rock within a 50 mile radius of the Little Rock radio rng stn bounded on the south by Blue civil airway No. 22 and Red civil airway No. 37, excluding the portion which overlaps restricted Area R-134)."

(2) (Moline, Ill.), is amended by adding the following portion to present control area extension: "and the airspace within 5 miles either side of a direct line extending from the Polo, Ill., omnirng stn to the intsxn of the east (back) course of the Quad-City ILS lclzr and the 318° True radial of the Bradford, Ill., omnirng stn."

(3) (El Paso, Tex.), is amended by changing the words "danger areas" to read " restricted areas," and by adding the following portion to present control area extension: "and that area northeast of El Paso bounded on the south by Green civil airway No. 5, on the west by the north course of the El Paso rdo rng, on the north by lat 32-00-00", and on the east by Red civil airway No. 71."

(4) (San Angelo, Tex.), is amended to read: "That airspace within a 35 mile radius of th the San Angelo, Tex., omnirng stn."

(5) (Tampa, Fla.), is amended by deleting the words which read: "excluding the portions which overlap Dinner Point restricted area (R-142), Dinner Point warning area (W-143) and Sarasota warning area (W-168;" and substituting the following in lieu thereof: "excluding the portion which overlaps Sarasota warning area (W-168);"

(6) (Myrtle Beach, S. C.), is amended to read: "Within a 25 mile radius of the Myrtle Beach Air Force Base, excluding the portion which overlaps Warning Area W-177."

(7) Five mile radius zones, is amended by deleting the following airport: Shreveport, La.: Greater Shreveport Municipal Airport.

CONTROL ZONES: (1) Rapid City, S. Dak.), is amended to read: "Within a 5 mile radius of Ellsworth Air Force Base, within 2 miles either side of the centerline of the northwest-southeast runway of Ellsworth AFB extending from the end of the runway to a point 17 miles southeast; within a 5 mile radius of the Rapid City Municipal Airport, within 2 miles either side of the south course and east course of the Rapid City rdo rng extending from the rdo rng stn to points 10 miles south and east, and within 2 miles either side of the 335° True and 155° True radials of the Rapid City omnirng extending from the airport 5 mile radius zone to a point 10 miles southeast of the omnirng stn."

(2) (Moline, Ill.), is amended to read: "Within a 5 mile radius of Quad-City Airport, within 2 miles either side of the Quad-City ILS lclzr west (front) course extending from the lclzr to a point 12 miles west of the outer marker and within 2 miles either side of the ILS lclzr east (back) course extending from the lclzr to a point 12 miles east of its intsxn with the 199° True radial of the Moline omnirng."

(3) (Myrtle Beach. S. C.), is amended by adding the following portion to present control zone: "and within 2 miles either side of a line bearing 331° True extending from the Myrtle Beach AFB to a point 9 miles northwest."

(4) (Ardmore, Okla.), is amended to read: "Within a 5 mile radius of Ardmore Air Force Base, within 2 miles either side of the 54° True radial of the Ardmore omnirng extending from the omnirng stn to the Ardmore AFB control zone, and within 2 miles either side of a direct line extending from the Ardmore AFB to the Mannsville, Okla., nondirectional rdo bcn."

(5) (Little Rock, Ark.), is added to read: "Within a 5 mile radius of the Little Rock, Air Force Base and within 2 miles either side of the centerline of the Little Rock AFB northeast-southwest runway extending from the end of the runway to a point 19 miles northeast."

(6) (Shreveport, La.), is added to read: "Within a 5 mile radius of Greater Shreveport Municipal Airport and within 2 miles either side of the Greater Shreveport Airport ILS lclzr southeast (back) course extending from the airport to a point 15 miles southeast."

(7) (Pittsburgh, Pa.), is amended by deleting the following portion: "within 2 miles either side of the Greater Pittsburgh Airport ILS lclzr southeast course extending southeastward from the ILS lclzr to the boundary of the Allegheny County Airport control zone," and by changing the words which read: "the Greater Pittsburgh nondirectional rdo bcn" to read: "the River nondirectional rdo bcn."

VOR REPORTING POINTS: (1) Domestic VOR reporting points is amended by adding the following reporting points: (a) Roberts, Ill., omnirng stn. (b) Harrelsville, N. C., Intsxn - the intsxn of the Williamston, N. C., VAR north course and the Rocky Mount, N. C., omnirng 064° True radial.

(2) Domestic VOR reporting points is amended by revoking the following reporting points: (a) Colt Intsxn - the intsxn of the Memphis, Tenn., omnirng 276° True and the Walnut Ridge, Ark., omnirng 171° True radials. (b) Cofield, N. C., omnirng stn.

ON REQUEST REPORTING POINTS: The following on request reporting points are designated effective April 5, 1956:

DESIGNATED

(1) COLUMBUS, N. J. INTSXN - the intersection of NE course Philadelphia, Pa. LFR and NW course McGuire LFR.

(2) GAP, PA INTSXN - the intersection of Allentown, Pa. VOR 220° radial and Westchester, Pa. VOR 297° radial. MRA 2500'.

(3) GREENCASTLE, INDIANA INTSXN - the intersection of the Terre Haute, Ind, VOR 065° magnetic radial (V-12) and the Scotland, Ind., VOR 354° magnetic radial.

(4) GREENPARK, PA. INTSXN - the intersection of the Harrisburg, Pa VOR 320° magnetic radial and Selinsgrove, Pa. VOR 230° magnetic radial.

(5) LANSDALE, PA. INTSXN - the intersection of Westchester, Pa. VOR 048° radial and 270° bearing from Willow Grove, Pa. LFR.

(6) WARRINGTON, AP INTSXN - the intersection of Westchester, Pa. VOR 060° radial and NW course Willow Grove, Pa. LFR. (20 Mar 1956)

RESTRICTED AREA AMENDMENT: The following Restricted Area Amendments shall become effective as indicated:

(Part 608-Restricted Area - Amendment 153)
(April 5, 1956)

(1) In Section 608.11, Fort McClellan, Ala., area (R-130 formerly D-130), published on July 16, 1949 in 14 F.R 4287 is amended by changing the "Designated Altitudes" column to read: "Surface to 6,000 feet MSL."

(2) In Section 608.18, the Chassahowitzka Bay, Fla., area (R-140 formerly D-140), amended on September 30, 1949 in 14 F.R. 5970, is rescinded.

(3) In Section 608.18, the Dinner Point, Fla., area (R-142 formerly D-142), amended on October 15, 1949 in 14 F.R. 6287, is rescinded.

(4) In Section 608.19, the Camp Gordon, Ga., area (R-385 formerly D-385), published on October 31, 1951 in 16 F.R. 11066, is amended by changing the "Designated Altitudes" column to read: "Surface to 26,000 feet MSL."

(5) In Section 608.30, the Little Sable Point, Mich., area (R-437 formerly D-347), amended on June 18, 1954 in 19 F.R. 3611 is further amended by changing the "Description by Geographical Coordinates" column to read: "Beginning at latitude 43-45-00, long. 86-44-00; thence to lat 43-45-00, long. 86-31-00; thence to lat 43-23-30, long. 86-22-00; thence to lat 43-15-00, long. 86-30-00; thence to lat 43-15-00, long. 86-44-00; thence to lat 43-30-00, long. 86-49-00; thence to point of beginning." and the "Time of Designation" column to read: "Unlimited."

(6) In Section 608.50, the Nashville, Tenn., area (R-459 formerly D-459), published on July 3, 1954 in 19 F.R. 4061, is rescinded.

(7) In Section 608.57, the Haven, Wisc., area (R-84), amended on September 21, 1955 in 20 F.R. 7074, is further amended by changing the "Time of Designation" column to read: "Unlimited".

(8) In Section 608.57, the Sheboygan, Wisc., area (R-83 formerly D-83), amended on June 4, 1954 in 19 F.R. 3298, is further amended by changing the "Designated Altitudes" column to read: "Surface to Unlimited."

(Part 608-Restricted Area - Amendment 154)
(March 29, 1956)

(1) In Section 608.20, a Arco, Idaho, area (R-500), is added to read: "Beginning at latitude 43-59-20, longitude 112-43-50; thence to lat 43-50-20, long. 112-30-00; thence to lat 43-32-00, long. 112-35-00; thence to lat 43-27-00, long. 113-03-00; thence to lat 43-34-30, long. 113-11-50; thence to lat 43-48-40, long. 112-49-40; thence to point of beginning. Designated Altitudes "Surface to Unlimited." Time of Use: "Continuous." Controlling Agency: "Atomic Energy Commission."

AERONAUTICAL CHART CORRECTIONS: Correct the following Aeronautical Charts as indicated:

(1) Portland Sectional Chart, dated October 13, 1955: Elevation of Mt. Hebo (Lat. 45-13; Long. 123-45) should be changed from 2350 to 3250.

(2) Winston-Salem Sectional Chart, 37th edition, dated January 12, 1956, Bradshaw Airport, which is shown at Latitude 38-21; Longitude 78-51 should be located at Latitude 38-36; Longitude 78-36.

AERONAUTICAL CHARTS OF THE U. S. COAST AND GEODETIC SURVEY

The following charts have been issued within the past two (2) weeks:

NEW CHARTS

AL 654 ADF	Lawrence, Mass.	Lawrence Airport
OP 748	Gary, Indiana	Gary Municipal Airport
RF/VOR	Burbank Terminal Area	
RF/VOR	Los Angeles Terminal Area	

DISCONTINUED CHARTS

AL 262 VOR	Milwaukee, Wisconsin	General Mitchell Field

AIRMAN'S GUIDE CORRECTIONS: Correct Airman's Guide Volume 10, No. 26, dated March 6, 1956, as follows:

(1) Page 6 - Clovis, New Mexico erroneously listed under Control Zones, instead of Control Area Extensions, therefore, delete Item 4 (Clovis, New Mexico), under Control Zones. Insert this item as Item 5, under Control Area Extensions.

FLIGHT INFORMATION MANUAL CORRECTIONS: Correct Flight Information Manual, Volume 9, dated June 15, 1955 as follows:

(1) Page 26 - Memphis Tenn: Correct telephone number to read: WHitehall 6-2548 and 6-2549.

(2) Page 103 - (ground) Lubbock, Texas: Correct to read: 111°, west edge of ramp N of Terminal Building.

(3) Page 104 - (ground) Add: San Francisco, Calif. (TVOR), 261° toward facility; on run-up mat for runway 28R.

(4) Page 105 - (ground) Tuscaloosa, Alabama (Van De Graaff): Correct to read: 241°; Point located on centerline of taxiway midway between ramp and runway.

(5) Page 97 - (air) Add: Crestview, Florida, 104°; over center of airport; 900'.

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) - Month and day item was reported.
** - New or revised airport, caution area or miscellaneous data. Pilots should inscribe this information on charts and records.
★ - New or revised radio data. Pilots should inscribe this information on charts and records.
NOTE - Such items usually are cited only once, because of space limitations. Examples: erection or removal of radio or television towers, water tanks, oil derricks and permanent airport obstructions.

ALABAMA: ANNISTON-RADIO: VOR courses 360°-070° not usable acct course bends and roughness.

BIRMINGHAM-RADIO: VOR operg on test-basis. (12-19)

BIRMINGHAM ARPT: Caution-traffic operg in area from 165° clockwise thru 235° not visible from twr to dist of 4 s mi. Rnwy 8-26 perm closed to high performance single engine conventional lndg gear type acft, including T-6. (4-8)

CLANTON-GRAGG ARPT: Closed - const. (7-11)

DOTHAN-NAPIER FLD: Caution - helicopters from Rucker Army Air Base trng. (7-11)

** EUFALA-WEEDON ARPT: 321' (886' MSL) lgtd rdo twr erected 16 n mi NE (74°T) at lat 32-01-26, long 84-50-50. (2-20)

EVERGREEN-RADIO: Mar 13, VOR shut down until approx April 3. During this period, temp MRA arwy V-20 Mobile-Montgomery 4000' MSL; Arwy V-134 Evergreen, Ala-Columbus, Ga unusable. (3-12)

HUNTSVILLE-RADIO: VOR radials 005°-030° unusable due to roughness and bends.

HUNTSVILLE MUN ARPT: Caution -rnwy 18-36 under const. (12-30)

** MONTGOMERY -DANNELLY FLD: Taxiway from rnwy 15 to E/W taxi strip perm clsd. Dips in E/W rnwy 1500' from E end. Lgtd ditch approx 200' NE of apch end rnwy 21. Acft landing and taking off are cautioned to avoid Maxwell AFB tfc pat. and control zone. Due to non-visibility twr unable to ctl tfc on E/W parallel taxi strip W of a point adj to Air National Guard hangar. Rnwy 15-33 open lgt acft xcpt first 500' from NW end unusable - holes. (3-16)

MUSCLE SHOALS-RADIO: VOR courses 020°-050°, 110°-150° and 285°-335° clockwise from stn not usable beyond 15 n mi acct scalloping and bends. (4-22)

TUSCALOOSA-VAN DE GRAAFF ARPT: Tow car pulling glider intermittently on rnwy daylgt hrs durg VFR.

ARIZONA: SPECIAL NOTICE: Oct 24, 1955 - July 24, 1956, captive balloons will be flown nightly from one hr after sunset to one hr before sunrise at lctns 10 mi W Gila Bend AF Aux, 2 mi S Sentinel and 3 mi E Dateland, Ariz. Surface to 1500' and lgtd by one red lgt. Extreme caution when flying at low alts near these lctns. (12-27)

AJO ARPT: Beacon inop.

COCHISE-RADIO: DME coverage 15°-35°, 35 n mi at 12,000'; 210°-245°, 35 n mi at 11,000'. (6-30) Mar 12, VOR shut down until approx Apr 12 - modernization. (3-12) When opern is resumed, freq of VOR will be changed from 112.1 to 117.7 mc.

DATELAND: Captive balloons anchored on 1500' cables will be flown 1700M Mondays thru 2400M Thursdays at Dateland and Gila Bend Aux AFB, Ariz., for approx 6 weeks. Extreme caution advised - low altitudes near these lctns. (3-12)

GILA BEND-RADIO: VOR has slow bends and scalloping starting at approx 25 to 30 n mi on 247° radial and at 30 to 35 n mi on 106° radial.

HASSYAMPA-RADIO: VOR and DME shut down until approx Mar 23. (3-1)

PHOENIX-RADIO: LFR has severe interference during hrs of darkness. (12-8) About Mar 23 VOR/DME will be shut down until approx Apr 23 - modernization. (3-1)

PHOENIX-LUKE AFB-RADIO: USAF VHF/DF unreliable below 13,000' beyond 30 n mi in WNW quad. (2-2)

**PHOENIX-SKY HARBOR ARPT: Const all taxiways. Caution - open ditches on edges of taxiways. (3-1) Clsd mil F89 type acft or acft rqrg use after burners for take-off, xcpt prior permission arpt manager. (2-28)

PRESCOTT-RADIO: VOR coverage 185°-225°, 35 n mi at 10,000'; 135°-145° and 165°-185° 39 n mi at 10,000'.

SALOME, SITE #27B, LAX-PHX: Clsd. (12-14)

TUCSON-RADIO: DME and VOR coverage 360°-12°, 69°-72° and 330°-346°, 35 n mi at 11,000'; 44°-69° and 346°-360°, 26 n mi at 11,000'. (7-9)

TUCSON-DAVIS MONTHAN AFB-RADIO: USAF VHF and UHF - steers unrel beyond 35 n mi at or below the following alt: (a) NW quad 10,000'; (b) SW quad 10,000'; (c) SE quad 12,000'; (d) NE quad 13,000'.

YUMA-COUNTY ARPT: B-45 type acft towing 5000' of cable and tow target in vcnty. All acft refrain from flying in close proximity to B-45 type acft in Yuma area. Const apch ends all rnwys. (10-8)

YUMA-RADIO: Mar 12, VOR shut down until approx May 12. (3-13)

ARKANSAS: ✱BLYTHEVILLE AFB-RADIO: USAF homing fac cmsnd. Freq: 311 kc. Ident: BYH. Lctd lat 36-07-32, long.89-56-36. Bear, dist Blytheville AFB: 174°, 9.5 n mi. Class: MHW. (3-15)

EL DORADO-RADIO: Mar 6, VOR shut down until approx Mar 27 - modification. (3-6)

FAYETTEVILLE-RADIO: About April 2, VOR will be shut down approx April 30 - modernization. (2-27)

FT. SMITH-RADIO: ILS lclzr, glide slope, MM and LMM operg on test-basis. (3-13)

FT. SMITH ARPT: 136' lgtd drilling derrick erected 0.5 mi W and 1.0 mi S of E/W rnwy.

HARRISON ARPT: New NW/SE rnwy under const. (2-14)

HAZEN ARPT: Caution - E/W rnwy clsd. Men and equip. on fld. (11-21)

NORTH LITTLE ROCK-CENTRAL ARPT: Fld closed to all operns - const. (3-1)

TEXARKANA-RADIO: VOR 143° radial to rnwy 13 beyond tolerance due to roughness and bends.

WALNUT RIDGE-RADIO: VOR radials 290°-320°, 120°-150° and 200°-210° unusable acct bends and course roughness. (10-14)

CALIFORNIA: SPECIAL NOTICE: Between Nov 2, 1955 and May 2 , 1956, Navy blimp will oper intermittently in vcnty of Wilmington and Dominguez, Calif from surface upward in connection with Los Angeles air pollution control. Flgts will originate at Santa Ana Lighter Than Air Base, will cross at Newport Beach and proceed seaward to Wilmington for opern in both areas. Return flgt will be reverse of outbound flgt. Operns will be conducted in conditions down to 500' ceiling and 1/2 mi visibility.

ARCATA ARPT: Experimental testing of rotating lgts in inner apch zone of Rnwy 31 at infrequent times. Rotating lgts at 2100' and 1000' S of threshold of rnwy with six high intensity lgts rotating at 6 or 12 rpm.

AUBURN ARPT: Clsd to hvy acft. Lgt acft use extreme caution acct soft rnwys. (11-24)

BAKERSFIELD-RADIO: Mar 2, VOR shut down until approx May 2 - modernization. (3-9)

**BAKERSFIELD AIRPARK: 130' lgtd derrick erected 1130' NE N/S rnwy. (2-28)

BLUE CANYON, #13, SFO-SLC: Closed durg winter months. (12-21)

BLYTHE-RADIO: DME coverage 165°-188°, 39 n mi at 7000'; 189°-200°, 26 n mi at 6000'; 200°-220°, 39 n mi at 6000'; 220°-293°, 43 n mi at 9000'; 293°-310°, 26 n mi at 9000'; 310°-327°, 35 n mi at 9000'.

**BRAWLEY MUN ARPT: Unlgtd 55' TV ant. erected approx 50 ft. in line with and from the end of SE rnwy. (10-18)

CAMARILLO-RADIO: All courses have multiples. (6-17)

CANBY-MEAD ARPT: Closed. (1-9)

CRESCENT CITY-RADIO: VOR arwy radials flgt-checked. Courses 90°-330° usable dist 22 n mi; 350°-90°, 26 n mi at 7000'; 43 n mi at 8000'.

DAGGETT-RADIO: VOR flgt-checked on arwy radials only.

FAIRFIELD-TRAVIS AFB-RADIO: USAF VHF/DF bearings and communications in NW quad unreliable below 8500'. Opers 0700-1600 Mon-Fri training status only. (7-5)

FILLMORE-RADIO: VOR coverage 320°-355°, 35 n mi at 11,000'; 280°-320°, 26 n mi at 11,000'. (9-17)

FT. JONES-RADIO: VOR has lgt course roughness all quads. Only arwy radials flgt-checked.

FORTUNA-RADIO: VOR has light to moderate scalloping beyond 26 n mi. Only arwy radials flgt-checked. (10-6) DME coverage 335°-350°, 43 n mi at 3000'; 350°-10°, 43 n mi at 8000'; 10°-30°, 43 n mi at 9000'; 30°-120°, 35 n mi at 9000'; 120°-150°, 35 n mi at 6500'; 150°-335°, over water, not checked.

FRESNO AIR TERMINAL: Exercise extreme caution in vcnty, particularly when using VOR arwys. Jet acft climbing and descending in areas of extended centerlines rnwys 29-11 and areas N and E of arpt. (10-28)

KLAMATH-McBETH ARPT: Closed. (1-3)

LONG BEACH-RADIO: DME coverage 43 n mi as follows: 280°-305°, 5000'; 305°-340° 7000'; 340°-040°, 12,000'; 040°-070°, 8000'; 070°-100°, 7000'; 100°-280°, 4000'. (6-16) ILS and LF rng during VFR conditions heavy simulated instrument apch traffic. (10-25)

**LONG BEACH ARPT: Several 230' MSL portable oil derricks NW, W and S of fld. (10-21) No fuel servicing avail. for civil acft 2400-0600. (11-1) N 800' apch end rnwy 16L perm clsd. (1-23)

LOS ANGELES-RADIO: VOR coverage 275°-315°, 30 n mi at min en route alt. Light to moderate scalloping below 3000' MSL. (6-4)

LOS ANGELES AIR ROUTE TRAFFIC CONTROL CENTER: Center will activate high alt sector 0900 Mar 20. Sector will control all acft operg at specific alt at or above 25,000'. One thousand on top flgt will NOT be controlled by this sector. All military acft operg at specific alts should contact the Los Angeles ARTC Center on 301.4 mc as soon as possible after departure from within the Los Angeles Control area or after entering the area inbound. (3-12)

✱LOS ANGELES INTERNATIONAL ARPT-TOWER: Mar 6, LOM auto voice ident perm discontd. Mar 19 radar arrival control inaugurated. Too late for Radar page. FLD: Use paved areas only. New lgtd rnwy 16-34 approx 4000' W of Sepulveda Blvd open VFR tfc only. Equip. on and adj to const areas. Pilots are urged to use extreme caution when operg off-shore just W of arpt. All jet acft departing rnwys 25L-25R climbing in VFR conditions use a 200° departure corridor which originates at a maximum of 3000' MSL approx the intersection of the extended centerlines of the above rnwys with the shoreline. Acft proceeding E-bound from Malibu Intersection in VFR conditions making a track which approximates the extended centerlines of the above rnwys are CAUTIONED not to descend below 4000' MSL until passing the shoreline or Del Rey FM unless cleared otherwise by ATC. Jet acft pat down-wind leg is 2500'. Acft not intending lndg at arpt should avoid apch areas to W and E below 3000' in VFR wea. Recommend cross tfc plan crossing course at 3000' or above, ceiling permitting, directly over arpt, or between LF rng and arpt. Avoid shoreline W due high performance of departing jet acft. Due non-visibility twr unable ctl tfc on last 2400' rnwy 34. (2-10)

LOS ANGELES-SAN FERNANDO VALLEY ARPT: Tfc direction indicator inop 2300-0700.

MODESTO-RADIO: VOR shutdown until approx May 1-modernization. (1-24)

NEEDLES-RADIO: Feb 3, VOR shut down.

OAKLAND: Pilots proposing transbay flgt should ascertain that VFR wea exists within both the San Francisco and Oakland Control Zones, or should obtain ATC clearance for flgt within a ctl zone when wea is less than VFR, since ceiling and visibility mid bay is frequently less than at the two terminals. Tfc operg in VFR wea should avoid vcnty of Alameda NAS. Extensive tfc including jets operate in tfc pat up to 2000' within a radius of 1.7 n mi of the fld. Exercise extreme caution in these areas.

OAKLAND-RADIO: VOR coverage 35 n mi N thru E at min instr alt. (1-14) DME coverage 30°-60°, 26 n mi at 5000'; 60°-80°, 35 n mi at 5000'; 280°-290°, 35 n mi at 4000'; 340°-350°, 35 n mi at 6000'; 350°-030°, 17 n mi at 4000'. (20 Mar 1956)

CALIFORNIA: OAKLAND INTERNATIONAL ARPT TOWER: ASR will issue distance values in nautical miles in connection with radar control.(1-6) FLD: Dredging and clam shell equip.working S of lndg area. All booms and equip.lgtd and mrkd. Use extreme caution when flying over or within this area. (9-30)
OCEANSIDE-RADIO: VOR coverage 310°-020°, 35 n mi at min en route alt. (10-10)
ONTARIO-RADIO: DME coverage 135°-150°, 26 n mi at 7000'; 150°-200°, 17 n mi at 7000'; 200°-280°, 35 n mi at 7000'; 330°-350°, 26 n mi at 13,000'; 350°-0°, 35 n mi at 13,000'. About May 1, VOR will be shut down until approx June 1. (2-8)
ONTARIO INTERNATIONAL ARPT: Hi-intensity rnwy lgts being installed rnwy 7-25. Use rnwy and taxiways. Open ditches either side rnwy. (2-7)
OXNARD AFB-RADIO: USAF VHF/DF unreliable below 12,000' within 50 n mi. (4-20)
PALMDALE-RADIO: VOR coverage 120°-150°, 35 n mi at 10,000'; 150°-180°, 35 n mi at 9000'. (3-14)
PASO ROBLES-RADIO: DME coverage 220°-235°, 35 n mi at 6000'; 235°-245°, 26 n mi at 6000'; 245°-270°, 35 n mi at 6000'.
QUINCY-GANSNER FLD: E 700' E/W rnwy and taxi strip unusable. (1-3)
RED BLUFF-RADIO: DME coverage 180°-208°, 26 n mi at 9000'; 208°-217°, 26 n mi at 10,000'; 217°-235°, 35 n mi at 10,000'.
RIVERSIDE-RADIO: USAF VOR unreliable. (6-20)
SACRAMENTO ARPT-TOWER: Voice on ILS freq 110.3 mc out of service. (2-7)
SACRAMENTO-McCLELLAN AFB-RADIO: USAF H fac unreliable beyond 15 mi.
SALINAS-RADIO: VOR coverage 20°-95° and 135°-295°, 35 n mi at min instr alt. DME coverage 20°-44°, 26 n mi at 7000'; 44°-49°, 17 n mi at 7000'; 49°-90°, 26 n mi at 7000'; 90°-130°, 43 n mi at 7000'; 130°-145°, 26 n mi at 7000'; 145°-153°, 17 n mi at 7000'; 153°-180°, 26 n mi at 7000'; 180°-225°, 43 n mi at 7000';225°-300°, 43 n mi at 5000"; 300°-20°, 43 n mi at 7000'.
SAN DIEGO-RADIO: VOR coverage 50 mi MEA all quads except 20 mi MEA from 310° to 330°. (10-25)
SAN DIEGO-LINDBERGH FIELD: 500' W end rnwy 9-27 clsd - jet barrier. (2-29)
SAN FRANCISCO: See Oakland Control Zone Notam.
SAN FRANCISCO-RADIO: DME coverage 10°-30°, 17 n mi at 5000'; 30°-85°, 26 n mi at 7000'; 85°-100°, 35 n mi at 7000'; 160°-180°, 26 n mi at 5000'; 180°-225°, 17 n mi at 5000; 225°-265°, 26 n mi at 5000'; 345°-10°, 35 n mi at 4000'.
SAN FRANCISCO GAP-RADIO: Homing fac unreliable in area 25° thru E to 130°. (11-15)
**SAN FRANCISCO INTNL ARPT: All taxiways identified alphabetically. (3-1)
SAN RAFAEL-HAMILTON AFB-RADIO: USAF VHF/DF unreliable 340°-135° clockwise below 11,000'.
SANTA BARBARA-RADIO: DME coverage 325°-30°, 26 n mi at 9000'; 30°-45°, 35 n mi at 9000'; 80°-95°, 35 n mi at 4000'; 110°-260°, not checked. Reception 3023.5 kc unreliable daylgt hrs. (2-2)
**SANTA BARBARA ARPT: 154' oil derrick lctd 1-1/3 mi SSW has been removed. (3-9)
SANTA MONICA-RADIO: TVOR radials 030°, 075°, 210°, 260° and 323° usable. (1-20)
SANTA MONICA ARPT: Service avail only between 0700 and 2100 daily. Extreme caution advised during ngt use of fld due to unlgtd open storm drain ditch 175' from S edge of main rnwy. An unlgtd unmrkd difference in elev variable to as much as 25' exists between the open storm drain ditch and taxiway. All taxiways unlgtd. (1-20)
THERMAL-RADIO: VOR and DME coverage 330° thru 360° to 060°, 20 n mi; 060°-085°, 40 n mi; 145°-175°, 40 n mi; 175° thru 180° to 250°, 20 n mi; 250°-280°, 40 n mi at min en route alt. (3-14)
UKIAH-RADIO: DME coverage 43 n mi; 305°-355° at 6500'MSL; 355°-60° at 9000'; 60°-100° at 7000'; 100-150° at 6000'. 105° thru S and W to 305° over water not checked.(10-11)
VICTORVILLE-GEORGE AFB-RADIO: USAF VHF/DF steers unreliable 235°-325° and 360°-045°, below 15,000'.
YUCCA VALLEY-SKY CORRAL ARPT: Closed. (8-11)
COLORADO: CHEYENNE WELLS ARPT: Caution - ditches across landing strips. (4-8)
COLORADO SPRINGS-PETERSON FLD: Bcn inop. Caution - lndg acft - due to rise in terrain at apch end rnwy 21.(9-14) Caution-3' frangible fence apch end rnwys 12 and 17.
DENVER-STAPLETON FLD: Rnwy 8L-26R clsd to operns heavier than DC-3 acft xcpt when absolutely necessary for taxiing W of rnwy 3-21. Hvy air tfc N and E due to extensive instrument trng. Flashing amber lgt in segmented circle indicates rgt hand tfc.(4-8) Two-way rdo rqrd capable of communicating with twr. (10-26)
GRAND JUNCTION-RADIO: About April 27, ILS glide slope will be shut down until approx June 8. (2-29)
PUEBLO: Ordnance depot approx 14.8 n mi E at lat 38-16-53, long 104-18-00, conducting demolition work - days.

TALLAHASSEE-RADIO: VOR courses unusable 110°-150°. (6-23)
TALLAHASSEE-DALE MABRY ARPT: Closed to air carrier acft exceeding 50,000 lbs xcpt as alternate arpt. Non-air carrier acft exceeding 50,000 lbs rqr prior permission. Rnwy 9-27 clsd to air carrier ngt operns. (10-7)
TAMIAMI-RADIO: About Mar 23, H fac will be cmsnd. Freq: 209kc. Ident: TMT. Lctd at lat 25-50-06, long. 80-54-36. Class: MHW. (2-23)
FLORIDA: TAMPA-RADIO: VOR courses 95°-105° unusable.
VERO BEACH ARPT: 120' (142'MSL) lgtd temp TV twr erected 1 n mi S. (3-6) Rnwys 3R-21L and 7R-25L clsd ngts. (2-15)
WEST PALM BEACH-PALM BEACH COUNTY ARPT: All rnwys, excpt 9-27 unlgtd and bndry lgts inop. (4-7)
WINTER HAVEN-GILBERT FLD: Taxiway and parking ramp near rnwys 4 and 29 extn excavation. Trucks crossing rnwys after normal operg hours and week ends.
GEORGIA: ALBANY-RADIO: VOR coverage at min instr alt 35 n mi. Moderate course roughness exists on and adj to following courses: 20°, 85°, 205°, 279°, 320° from stn.
ALBANY ARPT: Clsd to air carrier acft exceeding 50,000 lbs xcpt as alternate arpt. Non-air carrier acft exceeding 50,000 lbs require prior permission. Jet acft operg from Turner AFB particularly SE of arpt. Contact Turner twr on 126.18mc for Advisory Info. If unable to contact Turner twr contact Albany rdo for relay. (11-18)
ALMA-RADIO: DME and VOR coverage 35 n mi at min en route alt. (8-3)
ATLANTA-SPECIAL NOTICE-RADIO: ARTC accepting IFR tfc which is equipped with UHF rdo freq only with destination Atlanta Mun arpt. (2-26) Center advises high altitude sector with jurisdiction over airspace 25,000' and above within Atlanta Control Area to be activated 0800, Feb 15. All jet type acft operg on IFR flgt plans at or above 25,000' or 1,000' on top should guard 301.4 mc. Within Atlanta areas, this channel will be utilized to obtain traffic clearances and to forward progress reports. Weather and other info not pertinent to traffic control should be handled on 255.4 mc. This channel should also be used if unable to contact Atlanta Center direct on 301.4 mc. (2-14)
ATLANTA-RADIO: VOR courses 060°-090° unusable acct bends and roughness. (4-19)
ATLANTA ARPT-TOWER: ASR-PAR shut down-modernization. (3-10) FLD: Effect. Apr 1, 1956, acft arriving arpt will make initial contact with Atlanta apch control on 120.7mc regardless of weather or flight plan. Acft not equipped for 2-way commun on 120.7 mc will use other available freq. (3-6)
ATLANTA-FULTON COUNTY ARPT: Const SE end of NW/SE rnwy - caution. (9-13)
AUGUSTA-RADIO: VOR shut down - modification.
★BRUNSWICK-RADIO: Correct coordinates VOR rng: lat 31-03-00, long. 81-26-48. (3-4)
BRUNSWICK ARPT: Caution-intensive blimp training in vcnty.
COLUMBUS-RADIO: VOR courses 350°-30° unusable acct bends and roughness. (3-17)
**DAWSON-TERRELL COUNTY ARPT: 334'(722') lgtd rdo twr erected 3.9 n mi W (270°T) at lat 31-44-07, long. 84-29-56. (2-21)
LA GRANGE-RADIO: VOR flgt-checked on arwys radials only.
MACON-RADIO: DME coverage at min en route alt, 35 n mi in all azimuths. About April 2, VOR will be shut down approx April 30 - modernization. (2-27)
NORCROSS-RADIO: VOR coverage 060°-240°, 35 n mi at min en route alt. (5-9)
ROME-RADIO: LF rng operg as unmonitored fac. Use of LF rng as en route or apch aid must be ADF disregarding on-course signals and pilot must monitor fac during such use.
ROYSTON-RADIO: VOR courses lgt to moderate roughness may be noted over mountains NW at min alt.
TIFTON-MYERS ARPT: Resurfacing all rnwys. (4-28)
VALDOSTA-RADIO: VOR unusable 240° clockwise thru 360° to 110° account excessive roughness and course displacement with exception of arpt apch course 003°, usable to 10 n mi. (8-31)
IDAHO: BOISE AIR TERMINAL-TOWER: UHF/DF NE and NW quads unreliable below 14,000' beyond 40 n mi. SW and SE quads unreliable below 10,500' beyond 40 n mi. (11-9)
BURLEY-RADIO: VOR coverage 130°-150°, 26 n mi at min terrain clearance alt.
DIXIE USFS ARPT: Closed - const. (9-16)
KELLOGG-SHOSHONE COUNTY ARPT: Fld lgtg inop, xcpt prior req. (11-19)
MALAD CITY-RADIO: VOR coverage 360°-20° and 50°-60°, 35 n mi at 12,000'.
STREVELL BCN SITE # 10, SLC-PDT: Inoperative. (2-23)
TWIN FALLS-RADIO: VOR coverage 115°-150°, 30 n mi at min terrain clearance alt.
TWIN FALLS-JOSLIN ARPT: Trench 25' deep, 30' wide lctd 165' off end rnwy 30. Men, equip in trench. (2-17)
ILLINOIS: ALTON-CIVIC MEMORIAL ARPT: Aerobatic area for student training in following described area: Bounded by long. 89-48, and 90-00; lat 38-57 and 39-03. In use daily when ceiling and visibility exceed 5000 feet and 5 miles, between 2500 feet and 5500 feet MSL. (6-16)
BELLEVILLE-SCOTT AFB-RADIO: USAF LF rng has slight splits and multiples within 35 n mi. NW, SW and SE courses unreliable beyond 35 n mi due to splits and bends. NE course unreliable beyond 65 n mi.

ILLINOIS: BENTON ARPT: Caution - new N/S rnwy under const.
BRADFORD RADIO: H fac useable dist 20-25 s mi.
**CHICAGO: 22 telephone poles, 24' to 34' high, erected in the Pinehurst Subdivision approx. 600 ft. south of Glenview Naval Air Station.
CHICAGO-RADIO: Multiples on NW course LF rng. About April 30, LF rng ident will be changed to MDW.
CHICAGO-AIR ROUTE TRAFFIC CONTROL CENTER: About Mar 30, Freq 118.9 mc will be changed to 124.5 mc.
CHICAGO-MEIGS FLD: Caution - S end rnwy dist from threshold lgts to seawall 90'.
CHICAGO-MIDWAY ARPT-TOWER: TVOR courses unreliable beyond 20 n mi between 5°-10°, 35°-40°, 145°-155°, 255°-265°, 335°-348°. (2-8) ILS back course erratic. About April 30, TVOR and ILS lclzr ident will be changed to: MDW; LOM to MD; LMM to DW. FLD: Single eng transient acft will not be allowed dock space at the N terminal bldg, must use facs of S terminal bldg. Due to non-visibility acct parked acft, twr unable to ctl single eng acft on many portions of all outer ramps. Use extreme caution on E ramp and in vcnty of both terminal bldgs. All acft will remain N of white line on S side of rnwy 27R while running up, parking or taxiing. (5-9) One experimental oscillating flasher guidance lgt installed on each side of green threshold lgts on apch end rnwy 31L. 250'(842'MSL)lgtd smoke stack being erected 9.6 n mi (123°T) at lat 41-41-18, long. 87-33-43.
CHICAGO-O'HARE INTN'L FLD: 147'(787'MSL) lgtd steel twr being erected 2.6 n mi S (175°T) at lat 41-56-21, long 87-53-23. Due to non-visibility twr unable to ctl tfc 300'-800' W rnwy 36, 800'-1600' E apch end rnwy 9, 100'-1100' N rnwy 9-27, 800' SE intsxn rnwy 14-32, and USAF ramp due bldgs & parked acft center taxiway to ramp & black top taxiway to Slick hangar, and terminal gates 1, 2 and 3. Rnwy 14-32 clsd, const.
CHICAGO-SMITH SEAPLANE BASE: 251' lgtd grain elevator being erected 2 n mi N (360°T) at lat 41-41-00, long 87-33-36.
CHICAGO HEIGHTS-RADIO: DME coverage 151°-285°, 35 n mi at 2000'.
DANVILLE-VERMILLION COUNTY ARPT: Caution - const on taxiway strip adj to rnwy 3-21. NW/SE sod strip closed to all operns.
EAST ST. LOUIS-PARKS METROPOLITAN ARPT: Aerobatic area for student trng in following area: Bounded by long. 90-00 and 90-15; lat 38-25 and 38-35. In use daily when ceiling and visibility exceed 5000' and 5 mi, between 2500' and 5500' MSL.
EFFINGHAM COUNTY MEM'L ARPT: Const on E/W rnwy.
FAIRFIELD ARPT: Closed - construction.
JOLIET-RADIO: VOR coverage 35 n mi at all azimuths at min en route alt.
KEWANEE ARPT: Men and equip. on fld intermittently - caution.
LOMBARD-YORK TOWNSHIP ARPT: Transmission line approx 3000' W. Height of twrs, 123', not marked or lighted.
MOMENCE ARPT: About April 1, will be permanently closed.
PEORIA-RADIO: VOR coverage 190°-70°, 35 n mi at min en route alt.
PEORIA-GREATER PEORIA ARPT: Unlgtd 5' fence apch end rnwy 22.
PEOTONE-RADIO: VOR coverage lmtd between 39 and 43 n mi at most azimuths at min en route alt.
POLO-RADIO: VOR coverage 280°-350°, 39 to 43 n mi at min en route alt.
ROCK FALLS ARPT: Men, equip on E side fld durg daylgt hrs - construction.
SPRINGFIELD-CAPITAL ARPT-TOWER: About Mar 25, Apch Ctl service will be inaugu-
** rated. Class will be AC(g). FLD: Men and equip. on fld durg daylgt hrs. (12-8) 40' lgtd glide slope antenna pole 1050' apch end rnwy 4 and 400' NW rnwy centerline. Lgtd lclzr antenna shelter 1400' NE apch end rnwy 22.
INDIANA: SPECIAL NOTICE: The Atomic Energy Commission requests all pilots to maintain a reasonable altitude when flying over their Dana Installation, as a safety precaution to the plant. The area involved is located approx 29 s mi N of the Terre Haute LF rng between Montezuma and Newport and is bounded by latitudes 39-50, 39-52 and longitudes 87-21, 87-26.
**AUBURN ARPT: About April 2, const begins on a 910' (1780'MSL) lgtd TV twr to be erected 3 n mi SSE (167°T) at lat 41-19-59, long 85-03-07.
CAMP ATTERBURY: Frequent violations have been reported of Restricted Area R-65 to the S. High angle mortar and artillery firing being conducted daily. All acft are warned to keep clear of this area.
COLUMBUS-BAKALAR AFB-RADIO: USAF VHF/DF unreliable 250°-270° outbound below 3000' and 010°-250° below 2500'.
DYER-TRIANGLE ARPT: E/W Strip closed - construction. Turf soft.
INDIANA: ELKHART ARPT: N/S rnwy usable at pilot's discretion.
FORT WAYNE-BAER FLD: Rnwy 4-22 now 7800' - daylgt operns, 6200' -ngt operations. 1600' ext. not lgtd. Due to non-visibility twr unable to ctl tfc on first 500' of rnwy 9 and entire taxistrip leading to apch end of rnwy.
GARY MUN ARPT: Const. on pole line SW. Pole heights vary from 29' to 83' above ground. Four poles lctd nearest extended centerline of rnwy 2 will be 43'(633'MSL).
GOSHEN-RADIO: DME coverage 46°-145°, 35 n mi at 2300';172°-310°, 35 n mi at 2100'.
GREENSBURG ARPT: Regrading and seeding N/S rnwy. Use E half only.
HUNTINGTON ARPT: Closed all operns - due soft fld.
INDIANAPOLIS-RADIO: Following experimental facs operd intermittently by TDC(approx one yr.): Tilden VOR freq 115.7 mc, ident: IEX. Weir Cook VORW freq 112.3 mc, Ident: IAX. TVOR freq 111.4 mc, ident: IDX, with voice ident. Lclzr freq 109.1 mc (without voice), ident: IBX. Glide slope freq 335.0 mc, serving N/S rnwy. DME lctd in laboratory N side fld, Channel 64, Mode C. Directional lclzr 110.3 mc serving E/W rnwy. One VORW on 112.9 mc testing intermittently. About Mar 19, en route radar control will be provided in vicinity of Terre Haute. Opern will be conducted from 0700-2300 Mon thru Fri. Facility will be identified as Rockville Control. Primary trans & recvg: 125.3, 319.8 mc. Secondary trans. 121.5, 122.2, 126.7, 135.0, 135.9, 243.0, 255.4, 301.4 mc; rcvg 121.5, 122.1, 126.7, 135.9, 243.0, 255.4, 301.4 mc. (3-13)
INDIANAPOLIS-WEIR COOK ARPT-TOWER: ASR will issue distance values in nautical miles in connection with radar control. FLD: All acft rqrd to have rdo rcvrs. Rnwy gross wt lmtd to 110,000 lbs. Fee for acft wt excess of 110,000 lbs. Left and right tfc pat. Lndg Fee for multi-engined acft. Due to non-visibility twr unable to ctl tfc on taxiway from SE hangar to Turner ramp. All military jet acft rqrd to have transmitters and rcvrs tuned to twr freq. Rnwy 9-27 used only at discretion of ctl twr. Rnwy 4-22 slippery when wet.
LA FAYETTE-RADIO: Severe roughness and scalloping VOR radials 100° clockwise 170°.
LA FAYETTE-HELSMER ARPT: Const - E side SW end NE/SW rnwy and entire NW/SE rnwy. Rnwy lgts inop. Middle one-third NE/SW rnwy serviceable W side.
LA PORTE: Ground demolition in progress approx 6.9 n mi SE during daylgt hrs Mon thru Sat. Center of operns lctd at lat 41-31-28, long. 86-36-46.
**LA PORTE ARPT: 254' (1049'MSL) lgtd steel microwave twr erected 6 n mi NNE(20°T) at lat 41-40-23, long 86-40-57.
MADISON: Frequent violations of Restricted Area approx 4.3 n mi N have been reported. Artillery and anti-acft firing practice being conducted daily in the Jefferson Proving Grounds. All acft are warned to keep clear of this area.
**MISHAWAKA-SPORTSMAN ARPT: 236' (1016'MSL) lgtd steel microwave twr erected 3 n mi ENE (70°T) at lat 41-43-50, long 86-03-48.
MONTICELLO-CONGRAM ARPT: Closed.
ROCKVILLE-RADAR: About May 19 en route radar control will be provided. Primary trans and rcvg: 125.3, 319.8 mc. Secondary trans. 121.5, 122.2, 126.7, 135.0, 135.9, 243.0, 255.4, 301.4 mc; rcvg 121.5, 122.1, 126.7, 135.9, 243.0, 255.4, 301.4, mc. See Indianapolis Radio.
SOUTH BEND-ST. JOSEPH COUNTY ARPT-TOWER: ILS lclzr back course flyable with slow bends one to 5 n mi from stn. Glide slope flyable down to 50". No touch down point.
**FLD: 156'(962'MSL) lgtd steel microwave twr erected 2 n mi NW at lat 41-43, long 86-20-56.
TILDEN-RADIO: See Indianapolis, Indiana.
IOWA: BURLINGTON: Demolition approx 3.5 n mi SW. Explosions every 30 mins daily 0800-1700, xcpt Suns., holidays. Area boundary: N-lat 40-46-27; S-lat 40-45-35; E-long. 91-11-04; W-long. 91-14-37.
DAVENPORT MUN ARPT: E/W strip under construction.
DES MOINES ARPT: Due to non-visibility twr unable to ctl tfc on portion of W ramp and NW 1600' of taxiway and warm-up ramp of Rnwy 12.
**FORT DODGE ARPT: Two 325' (1773' MSL) lgtd towers erected 3.3 nautical miles SSW (192° T) at latitude 42-29-45, longitude 94-12-27.
LE MARS-WESTMAR COLLEGE ARPT: Land at own risk winter months.
OSKALOOSA ARPT: NE/SW runway closed indefinitely. NW/SE runway now 120 feet wide. (10-25)
OTTUMWA-RADIO: Soon, VOR and DME will be shut down until approx April 2 - modernization.

IOWA: SIOUX CITY-RADIO: DME coverage 77°-103°, 35 n mi; 172°-244°, 26 n mi at min en route alt. (7-30)
SIOUX CITY ARPT: Due to non-visibility twr unable to ctl ramp tfc in front of Admin Bldg, NE of black hangar and parking area at SE corner of fld. (4-16)
WEBSTER CITY ARPT: Intsxn rnwys soft with ruts - broken tile in drainage system.(4-12) E/W rnwy clsd. (1-24)
KANSAS: ARKANSAS CITY-STROTHER AUX #2 ARPT: P-line varying from 12' to 25' above ground and surrounding arpt.
**COFFEYVILLE-McGUGIN FLD: About April 1, a 219' (947' MSL) lgtd steel structure will be erected 3.5 n mi SW(215°T) at lat 37-02-57), long 95-36-30. (3-7) NW/SE and NE/SW rnwys clsd. (11-8)
EMPORIA-RADIO: About March 26, VOR will be shut down approx April 16 - modernization. Freq will be chg from 114.3 mc to 112.8 mc. (3-1)
GARDEN CITY-NEW CITY ARPT:Const of 40' poles 17 00' NE of NE/SW rnwy at lat 37-55-00, long 100-43-44 - partially lgtd, unmrkd. (2-6)
GREAT BEND ARPT: Navy lndg and take-off practice by P2V and SNB acft 0700-1700, Mon thru Fri xcpt holidays. All movement of acft durg this period controlled by twr. Mil acft pat. will be adjusted by twr to facilitate civil acft operns. Non-rdo-equipped acft should fly standard tfc pat. and observe twr for lgt gun signals. Lgt acft 600' above gnd. Hvy acft 1000' above gnd. Caution - men and equip. near rnwys, days. (4-25)
NEWTON - 81 ARPT: Restricted services due to by-pass road const on N end of fld, with hvy const equip. N/S rnwy reduced to 1400' with hi-line pole 40' W of rnwy. All lndgs at pilot's risk. (9-6)
OSBORNE ARPT: Strip lgts inop.
OTTAWA ARPT: Use turf strips with caution. (2-2)
PARSONS: Demolition approx 7.8 n mi ESE at lat 37-17-45, long. 95-07-15.
RUSSELL ARPT: Caution-ditch NE of intsxn rnwy16-34 and 3-21 marked. (3-13)
SALINA-RADIO: VOR coverage 202°-257°, 35 n mi at min en route alt. (2-2)
TOPEKA-PHILIP BILLARD ARPT: Portion of NE/SW Rnwy SW of N/S int sxn not usable for acft over 15,000 lbs gross wt. xcpt in emerg. (8-28) Extreme caution - temp shelter for radiosonde observations W of centerline N/S taxiway N of ctl twr. (9-29)
**WICHITA ARPT: 130' (1435'MSL) lgtd steel twr erected 2.5 n mi NE (57°T) at lat 37-40-49 long 97-23-37. (2-20) A concrete plant top structure 50' AGL and 100' (1417'MSL) antenna twr erected 3100' N of N end rnwy 1-19, mrkd and lgtd. 128' lgtd steel water tank erected 0.4nmi ESE of SE corner of arpt. Mowing equip on fld daylgt hrs. Dirt pile 2 ft. high 25 ft. N of taxi strip at end of rnwy 19 to deflect run-up prop wash. Acft remain on concrete surfaces. Sod areas unsafe. (8-23)
WICHITA-BEECH ARPT: Bldg const W side of fld. N half NW/SE Rnwy clsd. Equip. on fld. Contact Beech Tower for landing instructions.
WICHITA-CESSNA ARPT: All acft use new hard surface rnwy 17L-35R along E side of fld N/S operns. If adverse wind conditions prevail, sod strips are usable. All apchs from and departures to easterly quadrants. Avoid crossing N and S apch and take-off lanes of jet acft to adjoining McConnell AFB. Due to remote lctn, the McConnell twr is limited to advisory tfc information only for rdo equipped acft to and from Cessna Arpt. Call McConnell twr on 122.5 mc - listen 126.18 mc. Non-rdo equipped acft must first obtain tfc pattern information by telephone Murray 4-7261, ext.216. Under IFR conditions contact Wichita Apch Control for tfc clearance prior to entering control zone. Transmit 3023.5kc, 122.5mc. Listen 278 kc. 119.5 mc or range voice channels. (8-20)
KENTUCKY: CORBIN-RADIO: VAR N visual course has moderate roughness 3 to 6 n mi and S course 2 to 3 n mi from stn. (10-21)
FORT KNOX-SPECIAL NOTICE: 12.2 n mi NW (4.3 n mi E Brandenburg, Kentucky) plant is processing highly inflammable and explosive compressed gas. Acft warned to avoid flying in this vcnty.
LEXINGTON-BLUE GRASS ARPT: Due to non-visibility twr unable to ctl tfc on ramp area adj to Terminal Bldg from hangar line SE to taxi ramps NW and NE. Taxi and parking area SE end SE hangar apron unsafe. (2-24)
LOUISVILLE-BOWMAN FLD: Due to non-visibility twr unable to ctl tfc on first 150' rnwy 6 and outer 150' of the wide NE ramp next to hangar line and in tfc pat. SW of fld.
LOUISVILLE-STANDIFORD FLD: Acct smoke from factory, twr unable to observe apch to and end of rnwy 1. (12-22)
PADUCAH-RADIO: VOR has moderate bends in NE quad. (7-14)
PERRY PARK ARPT: Clsd - const. (3-2)
PENNSYLVANIA: YORK-RADIO: VOR has moderate bends 4 to 8 n mi from stn at min en route instr alt from 50°-230° and from 300°-350°.
LOUISIANA: ALEXANDRIA-RADIO: VOR radials 340°-20° unusable acct bends. (3-16)
BATON ROUGE-RYAN ARPT: S taxiway between Rnwys 35, 31 closed. Narrow open ditches both sides Rnwy 13-31 outside of rnwy lgts. (3-29)
BOGALUSA ARPT: 400' of W end E/W rnwy unusable - const. (9-23)
BOSSIER CITY-RAINBOW ARPT: Closed (3-12)
LAFAYETTE-RADIO: VOR gnd-checked only. (3-14)
MINDEN MUN ARPT: Test detonating will be conducted daily 0830-1630, 7.5n mi S(188°T) within an area 4.3 n mi in radius centered at lat 32-34-10, long. 93-26-00 (3s mi NNW of Doylene, La.), when ceiling is at least 3000', visibility 5 mi. Pilots should avoid area at altitudes below 2000'. (12-20)
MINDEN-WEBSTER ARPT: New fld. under construction. Lctd: 1 mi NW; lat 32-38, long. 93-18.
MONROE-RADIO: VOR has scalloping bends and course displacement beyond tolerance between 20°-40° and 310°-335°. (4-14) DME coverage 120°-150°, 35 n mi at 1500'.
**NEW IBERIA-IBERIA PARISH ARPT: 201'(221' MSL) lgtd rdo twr erected 4.1 n mi ESE (132°T) at lat 30-01-03, long 91-50-10.(3-6)
NEW ORLEANS-RADIO: VOR radials 271°-339°, unusable - severe scalloping and bends.
NEW ORLEANS ARPT: Hvy acft use rnwys only. Lgt acft take-off on rnwys. Acft transporting any items listed in Part 49 of CAR are prohibited from lndg without permission.
NEW ORLEANS-MOISANT INTERNATIONAL ARPT-TOWER: ASR will issue dist. values
** in n miles in connection with radar control. (4-8) FLD: Two 141' MSL lgtd twrs erected 15.5 n mi SE(137°T) at lat 29-49-30, long 90-03-50.(3-7) 165'(MSL) lgtd drilling derrick erected 4.5 n mi NNW (345°T) at lat 30-04-19; long 90-17-47.(2-28) Caution - stay on hard surface rnwys and taxiways because of incomplete and soft shoulders.
PATTERSON-WILLIAMS MEMORIAL ARPT: Extreme caution advised - const, mrkd.
SHREVEPORT-BARKSDALE AFB-RADIO: USAF Elm Grove FM pattern irregular-caution.
WELSH ARPT: E/W rnwy closed ngts. Beacon inop. (10-17)
MAINE: AUGUSTA-RADIO: VOR coverage 80°-160° and 220°-240°,35n mi at min en route alt.
BANGOR-RADIO: VOR coverage 360°-50°, 17 n mi; 50°-240°, 26 n mi; 240°-360°, 22 n mi at min en route instr alt. DME coverage 235°-260°, 35 n mi at 2500'.
BREWER ARPT: N/S strip open on gravel portion only. Taxi on gravel portion of fld only. Turf extremely soft. (3-25)
LIMESTONE-LORING AFB-RADIO: USAF VHF/DF unreliable beyond 25 n mi below 3000'; due to terrain. USAF VOR unreliable below 3500' at 50 n mi.
MILLINOCKET ARPT: Apron usable-caution due broken pavement. Lgts on rnwy 16-34 inop winter months. Snow removal rnwy 11-29 winter months only. (12-5)
**PORTLAND ARPT: Approx 1200 ft of S end of rnwy 02-20 closed to acft below 5000 lbs because of equip crossing rnwy.(9-10) 400 ft. W end rnwy 10-28 closed. (9-15)
PRESQUE ISLE-RADIO: VOR coverage 35 n mi at min instr alt. Flyable bends beyond 17 n mi between 80°-120° and 180°-210°.
PRINCETON-RADIO: VOR coverage 150°-240°, 35 n mi and 290°-30°, 30 n mi at min instr alt. (10-3)
ROCKLAND ARPT: Rnwy 17-35 clsd ngt operns.
WATERVILLE-LA FLEUR ARPT: Rnwy 14-32 rough, not maintained. Pilots use at own risk. Rnwys 8-26 and 14-32 closed to wheeled acft winters. (9-6)
WINTERPORT-FERNALD ARPT: Caution - hole in safety strip on southerly side of E end of E/W Rnwy.
MARYLAND: BALTIMORE-RADIO: DME and VOR coverage 35 n mi at min en route instr alt. About May 14, VOR will be shut down until approx May 25 - modification. (1-5)
**BALTIMORE-FRIENDSHIP INTN'L ARPT: 152' (343'MSL) lgtd rdo twr erected 4.9 n mi. SSW(205°T) at lat 39-07-09, long 76-43-26. (3-8)

WOODRUFF-ARBOR VITAE ARPT: Closed winter months.

[redacted]: CASPER-RADIO: ILS glide slope has moderate to severe path roughness above 7300' and beyond 6 n mi. Not to be used for auto pilot apchs. About April 1, VOR will be shut down approx May 1 - modernization.

CASPER-NATRONA COUNTY ARPT: Caution all acft entering tfc pat. occasional jet acft opern with pickup and dropping of tow targets.

[redacted]: CHEYENNE ARPT-TOWER: About April 17, ILS glide slope and lclzr will be shut down. About Apr. 24, glide slope freq will be changed to 333.8 mc, lclzr to 109.9 mc.

GILLETTE ARPT: 50-75' W shoulder 1500' from N end N/S strip soft clsd to hwy acft.

JACKSON ARPT: E/W rnwy closed-fence const across rnwy just W of N/S rnwy. Small acft may use E end of E/W in case of emerg, but at own risk. N/S rnwy clsd, const. Use new auxiliary 150' strip E of N/S rnwy.

KEMMERER ARPT: Entire fld clsd all operns, xcpt graded 4000' S end N/S rnwy. Use extreme caution when wet.

LARAMIE-RADIO: DME coverage 155°-225°, 35 n mi at 15,000'; 225°-300°, 26 n mi at 15,000'.

RIVERTON ARPT: Men and equip on fld. E/W rnwy closed.

ROCK RIVER-RADIO: DME coverage 360°-40°, 43 n mi at 11,000'; 40°-110°, 43 n mi at 11,300'; 110°-160°, 43 n mi at 11,000'; 160°-230°, 43 n mi at 15,000'; 230°-360°, 43 n mi at 12,000'.

ROCK SPRINGS-RADIO: ILS glide slope has light to moderate roughness between OM and LF range.

ROCK SPRINGS ARPT: Caution - first 500' NW end NW/SE rnwy closed - marked.

SHERIDAN-RADIO: VOR coverage lmtd to approx 35 n mi between 150° and 280°. Moderate course roughness exists in mountainous area.

TORRINGTON ARPT: Oil well pumps and storage tanks edge all rnwys. Men and equip. on fld. Use extreme caution.

[redacted]: SAN JUAN-INTERNATIONAL ARPT-TOWER: Effect. April 1, trans and rcvr 126.18 mc will be discontinued.

SAN JUAN-PUERTO RICO INTERNATIONAL ARPT: Parking circles 2, 3, 4, and 5 on N departure ramp not fully visible from tower. Caution.

Attention, Pilots!

CHECK YOUR AERONAUTICAL CHARTS AND MAKE SURE THAT EACH OF THE OBSTRUCTIONS LISTED BELOW IS CARRIED!
IF ANY ARE MISSING, INSERT THEM NOW, DON'T DELAY! ONLY YOU CAN MARK YOUR CHARTS: IT IS YOUR RESPONSIBILITY!

This list covers recent obstructions(television towers, smoke stacks, etc.)which are 500 feet or more above the ground. It will be carried in the Airman's Guide at frequent intervals. When the list does not appear in the Guide, all new obstructions will be carried as two-starred items in the **NOTAMS.** The list will be brought up to date each time it is issued; newly added or changed material will be indicated by arrows.

The Coast and Geodetic Survey sectional charts show all known dangerous obstructions at the time a particular chart is issued. As these charts are published at intervals of six months to a year, dangerous obstructions built during the interim between issues must be placed on the charts by the user. The position height and top elevation above MSL of these new obstructions can be taken from the list given below. New obstructions will be carried in this list until six months after the issuance of the sectional charts depicting the obstruction data and then deleted.

LEGEND:

"B" denotes antenna structure on a building.
DISTANCE is given in nautical miles.
BEARINGS are true.
(MSL) Mean Sea Level.
(AGL) Above Ground Level.

VOR RECEIVER CHECK SIGNALS

✓ Provisions are being made to provide pilots with a means of checking the accuracy of VOR receivers to insure satisfactory operations of the airborne system. These provisions consist of three different methods: (a) a radiated test signal consisting of a signal radial; (b) certified check points on the airport surface; or (c) certified airborne check points. The radiated test signal is used by tuning the receiver to the published frequency of the test facility. With the flight path deviation indicator(FPDI) centered, the omnibearing selector should read 0° with the to-from indication being "From"; or the omnibearing selector should read 180° with the to-from indication reading "To". Should the VOR receiver be of the automatic indicating type the indication should be 180°. (This is true for all airborne receivers except Mitchell which will indicate 0°). Two means of identification are used with the VOR radiated test signal. In some cases, a continuous series of dots is used while in others a continuous 1020 cycle tone will identify the test signal. Information as to identification of an individual test signal can be obtained from the local control tower. Ground and airborne check points consist of certified radials that should be received at specific points on the airport surface or over specific landmarks while airborne in the immediate vicinity of the airport. Pilots are requested to contact control tower, communication station or airport manager for location details. Should an error in excess of + 4° be indicated through use of the ground check or + 6° using the airborne check, IFR flight should not be attempted without first correcting the source of error. CAUTION, no correction other than the "correction card" figures supplied by the manufacturer should be applied in making these VOR receiver checks. As of this date check points or facilities have been established at the following airports (listed under city name).

RADIATED TEST SIGNAL

*New York (LaGuardia 112.0 mc)
*Chicago (Midway 111.0 mc)
*Kansas City (Municipal 113.0 mc)
**Atlanta (Municipal 112.0 mc)
**Miami (International 112.0 mc)
**Wichita (Municipal 111.0 mc)

NOTES: *Continuous monitoring
**Checked daily for accuracy

LOW FREQUENCY RANGE PROCEDURES (DISTANCES ARE IN STATUTE MILES.)

If an LFR instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument approach procedure, unless an approach is conducted in accordance with a different procedure for such airport authorized by the Administrator of Civil Aeronautics. Initial approaches shall be made over specified routes. Minimum altitude (s) shall correspond with those established for en route operation in the particular area or as set forth below.

CITY AND STATE / AIRPORT NAME / AIRPORT ELEVATION / CLASS OF FACILITY / FREQ., IDENT., PROCEDURE NO.	INITIAL APPROACH TO FACILITY: FROM	CRS. AND DIST.	MIN. ALT. GROUND CONTROLLED APPROACH SYSTEM PROCEDURES (DISTANCES ARE IN NAUTICAL MILES)

If a GCA instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument procedure, unless an approach is conducted in accordance with a different procedure authorized by the Administrator of Civil Aeronautics for such airport. Initial approaches shall be made over specified routes. Minimum altitude (s) shall correspond with those established for en route operation in the particular area or as set forth below. Positive identification must be established with the radar controller. From initial contact with GCA to final authorized landing minimums the instructions of the radar controller are mandatory except when (A) visual contact is established on final approach at or before descent to the authorized landing minimums, or (B) at pilot's discretion if it appears desirable to discontinue the approach. Except when the radar controller may direct otherwise prior to final approach, a missed approach shall be executed as provided below when (A) communication on final approach is lost for more than 5 seconds during a PAR approach or, for more than 30 seconds during an ASR approach; (B) directed by radar controller; (C) visual contact is not established upon descent to authorized landing, minimums; or (D) if landing is not accomplished.

VOR/DME INSTRUMENT APPROACH PROCEDURES (DISTANCES ARE IN NAUTICAL MILES)

If a VOR/DME instrument approach is conducted at the below named airport(s), it shall be in accordance with the following instrument approach procedure(s), unless an approach is conducted in accordance with a different procedure authorized by the Administrator for such airport(s). Initial approaches shall be made over specific routes. Minimum altitude(s) shall correspond with those established for enroute operation in the particular area or as set forth below.

NOTICES TO AIRMEN Page 2

VOL. 11, NO. 2 .....APRIL 3, 1956

The AIRMAN'S GUIDE is issued every two weeks. This issue includes all data on record as of 0001 E.S.T. on the above date. For later information consult Teletype NOTAMS.

U. S. DEPARTMENT OF COMMERCE
CIVIL AERONAUTICS ADMINISTRATION
OFFICE OF AVIATION INFORMATION

NOTICES TO AIRMEN

SPECIAL NOTICES

✓ Indicates New or Revised Special Notices

The Airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting, or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a Notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the Office of Aviation Information, Attention: W-52, CAA, Washington 25, D. C.)

Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate CAA Regional Office for coordination before they are included in the Airman's Guide.

ATC IFR CLEARANCE PHRASEOLOGY: Effective November 15, 1955, ATC facilities will resume general use of the phrase "VIA FLIGHT PLANNED ROUTE" in air traffic clearances to replace the lengthier detailed description of any portion of the route of flight that is identical to the route filed by the pilot. When used, the phrase will be preceded by sufficient detailed route of flight information to establish the flight on the filed route. The "VIA FLIGHT PLANNED ROUTE" phraseology does not include approval of altitudes filed in the flight plan. Specific altitudes assignments will be issued in each clearance. IFR flight plans filed by the pilots should contain the complete route of flight and should be relayed to air traffic control unchanged. Pilots may request route verification when considered necessary and are requested to do so whenever a filed route has been changed prior to departure. If route verification is desired prior to departure, the request should be included with the initial call for taxi clearance to avoid delay in receiving the information.

VHF INSACS-TO-PRIVATE AIRCRAFT CHANNELS: The national VHF channel for transmission from INSACS-to-private aircraft 122.2 mc was partially implemented beginning August 1, 1951. (The companion aircraft-to-INSACS frequency is 122.1 mc). Eventually all INSACS will transmit on 122.2 mc but in the meantime VHF reply to private aircraft will be furnished on the VHF range voice channel at INSACS which have not yet commissioned 122.2 mc. Pilots should consult the Airman's Guide and current Notams for information on frequencies available at specific stations. The frequency upon which the pilot expects reply should be specified in the initial call.

When an INSACS is unable to reply on the VHF range voice channel because of equipment failure or maintenance shut down, reply will be made on 121.5 mc. A small number of INSACS have not yet installed transmitting service on 121.5 mc. At these locations, the reply on 121.5 mc will be made by an adjacent control tower. Therefore, when a pilot calling such station has reason to believe that the VHF range voice channel is not operating, he should request reply on 121.5 mc.

USE OF OMNIRANGE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. The accuracy of course alignment of the omnirange over 360° azimuth is excellent when compared to that of the L/MF range, being generally within two degrees (plus or minus). On certain stations, some sectors may contain slightly larger errors, but no course published as usable in the Airman's Guide will be displaced more than 3-1/2 degrees from its theoretical location. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, infrequent brief flag alarm activity, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert of these apparent vagaries.

AUTOMATIC VOICE IDENTIFICATION: Voice identification has been added to numerous air navigational facilities (omnirange stations and outer compass locators).

Omniranges and outer compass locators where voice identification is functioning are designated in the ANRA pages by an asterisk (*) in the "class identification" column. The transmission consists of a voice announcement alternating with the usual Morse Code identification: e.g. Long Beach omnirange (voice) .—.. -.-. ... (LGB in Code).

For omniranges, as shown above, normal voice identification consists of the name of the omni followed by the word "omni". However, if the omni is unattended, i.e., if no facility for providing air-ground communications services is associated with the omni, the word "unattended" will precede the word "omni". Example: AIRVILLE UNATTENDED OMNI.

TRANSMISSION OF "V" BY VAR RANGES: The letter "V" is transmitted by all VAR ranges. It precedes the usual location identifier and is separated from it by a short space. It is intended to enable pilots to distinguish instantly between the aural directional signals of VAR ranges, and those of low or medium frequency ranges, ILS and VORs located in the same general area. It will, for example, guard against the possibility of an error occuring through accidental connection of a pilot's headset to the wrong receiver. The "V" is transmitted at an appreciable higher rate of speed than the location identifier.

CIVIL USE OF MILITARY FIELDS: U. S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission.

In the case of Air Force Bases, pilots must have on file with Headquarters USAF a "HOLD HARMLESS" AF form 180 and in their possession a properly signed and executed AF form 181 permit. Application for these forms may be made to: Assistant Chief of Staff, Installations, HQ, USAF, Washington 25, D. C. This regulation will be strictly enforced.

For Naval Installations, prior permission should be requested from the Chief of Naval Operations (OP 532) via the Commanding Officer of the field concerned, (who has the authority to approve landing rights for certain categories of civil aircraft). However, with minor exceptions, authority to use Navy fields is granted only to aircraft on government business, or when no suitable civil airport is available in the vicinity.

When instrument approaches are conducted by civil aircraft at military airports, they shall be conducted in accordance with the procedures and minimums approved by the military agency having jurisdiction over the airport.

WARNING OF MAINTENANCE AT CAA NAVAIDS: During periods of routine or emergency maintenance, the coded identification (or code and voice, where applicable) will be removed from certain CAA Navaids, namely, ILS localizers, VHF ranges (VOR, TVOR and VAR) and L/MF ranges but not from "H" facilities, compass locators or 75 mc marker beacons. The removal of identification serves as a warning to pilots that the facility has been officially taken over by "Maintenance" for tune-up or repair and may be unreliable even though on the air intermittently or constantly.

NAUTICAL MILE AND STATUTE MILE ABBREVIATIONS: In the Airman's Guide, "n miles" or "n mi" stands for nautical miles; "s miles" or "s mi" for statute miles.

DVFR FLIGHT PLANS: When an IFR flight plan is cancelled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

FLIGHT PLANS: Pilots are urged to file VFR flight plans in person or by telephone prior to departure. Radio should be used for filing flight plans only when it is impossible to file in person or by telephone. This procedure is necessary in order to avoid congestion on the already busy air-ground communications channels. These channels should be reserved for essential in-flight communications. All pilots will benefit by following this practice.

RUNWAY VISUAL RANGE REPORTS AT NEWARK, N. J.: Effective March 3, 1956, measurements of runway visibility for Runway 4 at Newark, New Jersey, will be in terms of Runway Visual Range which is the distance high intensity runway lights can be seen by an observer located at the runway threshold viewing the lights in the same direction as a pilot making an approach.

The ILS and FAR instrument approach procedures for Newark will be amended to authorize 2600' of runway visual range as an additional operating minimum for straight-in approaches to Runway 4. When measurements of Runway Visual Range are being taken, the tower will give pilots intending to land straight-in on runway 4, the reported Runway Visual Range. When the meteorological ceiling and visibility (contained in "main body" of sequence report which is the average weather for the airport proper) are reported below minimums, (e.g. 200.5), an approach may be conducted to Runway 4 provided Runway Visual Range is reported at or above 2600'. The "remarks" portion of the hourly weather sequence for Newark will report Runway Visual Range in hundreds of feet, and runway visibility will no longer be reported in miles and fractions.

Since Runway Visual Range recognizes the additional penetration provided by high intensity runway lights and is measured in terms of what a pilot actually sees, pilots will have better assurance of finding runway conditions substantially as reported when arriving over the threshold.

The Runway Visual Range minimum of 2600' is also based on the penetration ability of the approach lighting system installed at Newark which is designed to assure earlier transition from instrument to visual flight.

RADIO CALL-UP PROCEDURES - ARTC CENTERS: Effective February 1, 1956, aircraft on IFR flight plans making position reports direct to ARTC centers shall, in the initial call-up include the fix or geographical location over which the aircraft is reporting. Examples: "Indianapolis Center, this is TWA 55, Maxwell, over."; "Indianapolis Center, this is Beechcraft 1234, 20 south of Maxwell, over."

Pilots are reminded, however, that direct communication with the center shall NOT be established until the pilot is specifically requested to do so.

UNACCEPTABLE RADIO MESSAGES: CAA facilities will no longer accept non-safety messages (requests for ground transportion, meals, telephone calls, etc.) from pilots of aircraft in flight. Arrangements should be made by a pilot prior to departure via public communications (telephone, telegraph, etc.) for such requirements. Pilots are also reminded that transmission of such messages violates the terms of their aircraft radio license as provided in Part 9 of the FCC Regulations.

CLASSIFICATION OF ILS BACK COURSES: ILS back courses have in the past been classified as either "usable" or "unusable". It now appears that further classification of the "unusable" courses are necessary, since some back courses formerly classified as "unusable" actually may be satisfactory for intersections, holding, transitions or missed approaches, even though they are not satisfactory for back course approaches.

ILS back courses will in the future be classified as follows:

Usable - suitable for ILS back course approaches

Restricted - not suitable for ILS back course approaches, but suitable for intersections, holding, transitions or missed approaches

Unusable - not suitable for any of the above.

SPURIOUS GLIDE SLOPE INDICATIONS: CAA glide slope facilities are intended to provide reliable glide slope signals for use in conjunction with the front course of the ILS localizer. Glide slope signals may be received in other azimuths (because of stray radiation from the antennas and reflections from nearby objects) which may in some cases be sufficient to activate the airborne warning flag. Any glide slope needle activity in these other azimuths should be disregarded.

All pilots are particularly cautioned to ignore glide slope indications when making back course localizer approaches. All CAA approved procedures for back course approaches are limited to use of the localizer portion of the ILS. Any attempt to fly spurious glide slope indications on such back course approaches could result in hazardous operations.

GLIDE SLOPE FLARE: Modification of nulls reference glide slope facilities will result in glide slope flare at about thirty (30) feet above runway. Caution advised on automatic approaches continued past runway threshold.

IFR COMPULSORY REPORTING POINTS: In the near future, a new symbol will be used on Coast and Geodetic Survey Radio Facility Charts to indicate those compulsory reporting points over which reports need not be made by aircraft operating above 15,200 feet. Approximately 200 of the existing compulsory reporting points will be converted to this class as the various charts are revised.

Compulsory reporting points for all aircraft, reagrdless of altitude, will continue to be depicted as a solid triangle. Subscribers to these charts will be furnished a new legend sheet prior to distribution of charts containing the new symbol.

RESTRICTED AREA AMENDMENT: The following Restricted Area Amendments shall become effective as indicated:

(Part 608 - Restricted Areas - Amendment 155)
(April 17, 1956)

(1) In Section 608.14, the El Toro, Calif. area (R-293 formerly D-293), amended on November 30, 1949 in 14 F.R. 7198 is further amended by changing the "Designated Altitudes" column to read: "Surface to 25,000 feet MSL."

(2) In Section 608.55, the Yakima, Wash., area (R-247 formerly D-247), amended on September 30, 1949 in 14 F.R. 5970 is further amended by changing the "Designated Altitudes" column to read: "Surface to 65,000 feet MSL. "

(Part 608 - Restricted Area - Amendment 156)
(April 24, 1956)

(1) In Section 608.40, the Oswego, New York, area (R-70 formerly D-70), amended on March 5, 1955 in 20 F.R. 1361 is redesignated as follows: "Beginning at latitude 43-37-00, longitude 78-00-00; thence to lat 43-24-00, long. 78-00-00; thence to lat 43-24-00, long. 76-45-00; thence to lat 43-31-00, long. 76-23-00; thence to lat 43-31-00, long. 76-15-00; thence northerly approximately parallel to and five miles west of the centerline of V-29 to lat 43-44-00, long. 76-13-00; thence to lat 43-46-00, long. 76-22-00; thence to lat 43-46-00, long. 76-30-00; thence to lat 43-38-00, long. 76-45-00; thence to lat 43-37-00, long. 76-45-00; thence to lat 43-37-00, long. 78-00-00, the point of beginning. Designated Altitudes: "Surface to 59,000 feet MSL." Time of Use: "Daylight hours, seven days per week, on year-round basis." Controlling Agency: "First Air Force, Mitchel AFB, New York (Jointly used by Air Force, Army and Navy.)"

(Part 608 - Restricted Area - Amendment 157)
(April 4, 1956)

(1) In Section 608.54, the Camp Pickett, Va., area (R-44 formerly D-44), published on July 16, 1949 in 14 F.R. 4287 is amended by changing the "Designated Altitudes" column to read: "Surface to Unlimited."

(Part 608 - Restricted Area - Amendment 158)
(May 5, 1956)

(1) In Section 608.22, the Camp Atterbury, Indiana, area (R-65 formerly D-65), amended on January 26, 1951 in 16 F.R. 713, is further amended by changing the "Designated Altitudes" column to read: "Surface to 40,000 feet MSL."

(2) In Section 608.30, the Camp Lucas, Michigan, area (R-467 formerly D-467), published on October 1, 1954 in 19 F. R. 6324, is amended by changing the "Designated Altitudes" column to read: "Surface to 15,000 feet MSL."

(3) In Section 608.33, the Fort Leonard Wood, Missouri, area (R-199), amended on April 9, 1955 in 20 F. R. 2302, is further amended by changing the "Designated Altitudes" column to read: "Surface to 50,000 feet MSL.", and the "Time of Designation" column to read: "Unlimited."

(4) In Section 608.39, the Guadalupe Mountains, New Mexico, area (R-212 formerly D-212), amended on November 10, 1950 in 15 F.R. 7548, is further amended by changing "Time of Designation" column to read: "Unlimited."

(5) In Section 608.57, the Camp McCoy, Wisconsin, area (R-200), amended on September 21, 1955 in 20 F. R. 7074, is further amended by changing the "Designated Altitudes" column to read: "Surface to 25,000 feet MSL."

FLIGHT IN RESTRICTED AREA: Pilots are responsible for obtaining an approval from the appropriate controlling agency prior to conducting flight in Restricted Areas, when governing restrictions are in effect. ATC is unable, because of communications workload and other factors, to obtain such approval for pilots. An ATC clearance should not be considered as authority to conduct flight in Restricted Areas EXCEPT where a control area overlays a Restricted Area as ATC has responsibility only within controlled airspace.

✓ ON-REQUEST REPORTING POINTS: The following on-request reporting points are designated, redescribed or cancelled and shall become effective as indicated:

DESIGNATE: Effective May 3, 1956.

(1) ATLANTIC CITY, N.J. INTSXN - the intersectinn of the Dover, Dela. VOR 078° mag radial and the Coyle, N. J. VOR 213° mag radial.

(2) BAUXITE, ARK. (VHF) INTSXN - the intersection of the Little Rock, Ark. VOR 227° mag and the Pine Bluff, Ark., 290° mag radials.

(3) CAPE MAY, MD. INTSXN - the intersection of the Salisbury, Md. 046° mag radial, Coyle, N. J. 213° mag radial and a radial from the Dover, Dela. VOR to this intersection.

(4) FITCHBURG, MASS. - MH facility.

(5) FLOODWAY, TEX. (LF) INTSXN - the intersection of the Brownsville, Tex. LFR north course and a 064° mag bearing from the Harlingen, Tex., (HGF) radiobeacon.

(6) GUMBO (VHF) INTSXN - the intersection of the Tampa, Fla. 305° mag and the Cross City, Fla., 205° mag radials.

(7) HERMOSA, S. DAK. (LF) INTSXN - the intersection of the Rapid City VOR 211° mag radial and south course of Rapid City LFR.

(8) LUTZ, FLA. (VHF) INTSXN - the intersection of the Tampa, Fla. ILS north course and the Lakeland, Fla. 285° mag radial.

(9) MENDOTA (VHF) INTSXN - the intersection of the Fresno VOR 252° mag radial and the Castle VOR 170° mag radial.

(10) MIFFLIN, PA. INTSXN - the intersection of the Harrisburg, Pa. VOR 320° mag radial and Selinsgrove, Pa. VOR 245° mag radial.

(11) MOREHEAD, KY. INTSXN - the intersection of the Lexington, Ky. VOR 081° mag and the York, Ky. VOR 221° mag radials.

(12) SCALLOP (VHF) INTSXN - the intersection of the Tampa, Fla. VOR 329° mag radial and the Cross City, Fla. VOR 205° mag radial.

DESIGNATE: Effective May 5, 1956.

(1) CALLAHAN, FLA INTSXN - the intersection of the Jacksonville VOR 303° mag radial and the Brunswick VOR 202° mag radial.

(2) CONCHAS DAM, N. MEX. INTSXN - the intersection of the Anton Chico VOR 054° mag radial and the Tucumcari VOR 277° mag radial.

(3) LONGMONT, COLO. INTSXN - the intersection of the Kremmling VOR 066° mag and the Denver VOR 320° mag radials.

(4) ROCK SPRINGS, ARIZ. INTSXN - the intersection of the Phoenix VOR 325° mag and the Hassayampa, Ariz. VOR 032° mag radials.

(5) ROGGEN, COLO. INTSXN - the intersection of the Denver VOR 031° mag and the Akron, Colo. VOR 259° mag radials.

(6) SAVEDGE, VA (LF) INTSXN - the intersection of the W course Langley, Va. LFR and N course Waverly, Va. LFR.

(7) WARD, COLO. INTSXN - the intersection of the Kremmling VOR 066° mag and the Denver VOR 278° mag radials.

(8) WIGGINS, COLO. INTSXN - the intersection of the Denver, Colo. VOR 047° mag and the Akron, Colo. VOR 259° mag radials.

REDESCRIBE: Effective May 3, 1956.

(1) HARBOR, FLA. INTSXN - Fan Marker.

(2) MULHALL, OKLA. (LF) INTSXN - the intersection of the Oklahoma City, Okla., LFR N course and a 124° mag bearing from Vance AFB, Okla., non-directional radiobeacon.

(3) SAND CREEK INTSXN - the intersection of the Casper VOR 053° mag and the Douglas VOR 331° mag radials.

CANCEL: Effective May 3, 1956.

(1) BLACKWELL, OKLA. (LF) INTSXN - the intersection of the Vance AFB, Okla. LFR NE course and the Wichita, Kans., LFR S course.

(2) BRITTON (VHF) INTSXN - the intersection of the Dallas, Tex., VOR 212° mag and the Ft. Worth, Tex. VOR 123° mag radials.

(3) COYLE, N. J. INTSXN - the intersection of the N course of the Atlantic City, N.J. VAR and NE course of the Millville, N.J. LFR.

(4) PLANT CITY (VHF) INTSXN - the intersection of the Tampa, Fla. 059° mag and the Lakeland, Fla. VOR 329° mag radials.

✓ NON-STANDARD HOLDING PATTERNS: The following non-standard holding patterns are established and shall become effective May 3, 1956.

(1) BAUXITE, ARK. (VHF) INTSXN - direction of holding - SW on Little Rock, Ark. VOR 227° mag radial (inbound 047° mag); direction of turn - RIGHT; time - one minute; minimum altitude - 1600'.

(2) FITCHBURG, MASS INTSXN - direction of holding - W of facility (118° mag inbound); direction of turn - RIGHT; time - one minute; minimum altitude - 3000'.

(3) LAKELAND, FLA. (VHF) INTSXN - direction of holding - SE on Lakeland VOR 130° mag radial (inbound 310° mag); direction of turn - LEFT; time - two minutes; minimum altitude - 1500'.

✓ MINIMUM EN ROUTE ALTITUDES: The following minimum en route IFR altitudes are amended as follows, effective May 3, 1956:

Section 610.12 Green Civil Airway 2 is amended by adding:

FROM	TO	MEA
Steventown INT, N. Y.	Albany, N.Y. LFR NW-bound only	3000

Section 610.12 Green Civil Airway 2 is amended to read in part:

FROM	TO	MEA
Bozeman,Mont.LFR	*Livingston,Mont. LFR	10000

*9300 - Minimum crossing altitude at Livingston LFR, W-bound

Section 610.13 Green Civil Airway 3 is amended to read in part:

FROM	TO	MEA
*Sacramento, Calif. LFR	**Auburn INT,Calif. NE-bound	7000
	SW-bound	3500

*3000 - Minimum crossing altitude at Sacramento LFR, NE-bound

**7500 - Minimum crossing altitude at Auburn INT, NE-bound

Auburn INT,Calif.	Donner Summit, Calif. LFR	11000
Donner Summit, Calif. LFR	*Reno, Nev.LFR	12000

*10500 - Minimum crossing altitude at Reno LFR, W-bound

Blue Canyon, Calif. FM	Auburn INT,Calif. SW-bound only	7000
Lucin,Utah LFR	*Promontory Pt., Utah LF/RBN	9000

*10000 - Minimum crossing altitude at Promontory Pt. LF/RBN, E-bound

Promontory Pt., Utah LF/RBN	*Ogden, Utah LFR E-bound	11000
	W-bound	9000

*7500 - Minimum crossing altitude at Ogden LFR, W-bound

Section 610.20 Green Civil Airway 10 is amended to read in part:

FROM	TO	MEA
U.S. Canadian Border	*Bellingham,Wash. LFR	1500

*2000 - Minimum crossing altitude at Bellingham LFR, S-bound

Yakima,Wash.LFR	*Pendleton,Ore.LFR	5000

*5100 - Minimum crossing altitude at Pendleton LFR, SE-bound

Pendleton,Ore. LFR	Baker, Ore. LFR	10000

Section 610.102 Amber Civil Airway 2 is amended to read in part:

FROM	TO	MEA
Las Vegas,Nev. LFR	Enterprise,Utah LFR	10000
Crystal,Nev.FM	Las Vegas,Nev.LFR SW-bound only	6500
Malad City,Ida. LFR	*Pocatello,Ida. LFR	11000

*8700 - Minimum crossing altitude at Pocatello LFR, S-bound

Dillon,Mont.LFR	*Whitehall,Mont. LFR	10500

*9300 - Minimum crossing altitude at Whitehall LFR, N-bound

Section 610.108 Amber Civil Airway 8 is amended to read in part:

FROM	TO	MEA
Redmond,Ore.LFR	*The Dalles,Ore. LFR	7000

*6000 - Minimum crossing altitude at The Dalles LFR, N-bound

Section 610.211 Red Civil Airway 11 is amended by adding:

FROM	TO	MEA
Grafton, N.Y.FM	Albany, N.Y. LFR W-bound only	3000

Section 610.211 Red Civil Airway 11 is amended to read in part:

FROM	TO	MEA
Claremore INT, Okla.	Springfield,Mo.LFR	2500

Section 610.244 Red Civil Airway 44 is amended to read:

FROM	TO	MEA
*Bellingham,Wash. LFR	Cultus Lake INT, Canada	**8600

*5000 - Minimum crossing altitude at Bellingham LFR, NE-bound

**For that airspace over U.S. Territory

Section 610.253 Red Civil Airway 53 is amended to read in part:

FROM	TO	MEA
*Portland,Ore. LFR	**The Dalles,Ore.LFR	7000

*4000 - Minimum crossing altitude at Portland LFR, E-bound

**4500 - Minimum crossing altitude at The Dalles LFR, W-bound

Section 610.254 Red Civil Airway 54 is amended to read in part:

FROM	TO	MEA
Promontory Pt., Utah LF/RBN	Stansbury INT, Utah S-bound	11000
	N-bound	9000

Section 610.255 Red Civil Airway 55 is amended to read in part:

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) - Month and day item was reported.
** - New or revised airport, caution area or miscellaneous data. Pilots should inscribe this information on charts and records.
★ - New or revised radio data. Pilots should inscribe this information on charts and records.
NOTE - Such items usually are cited only once, because of space limitations. Examples: erection or removal of radio or television towers, water tanks, oil derricks and permanent airport obstructions.

ALABAMA: ANNISTON-RADIO: VOR courses 360°-070° not usable acct course bends and roughness.
BIRMINGHAM-RADIO: VOR operg on test-basis. (12-19)
BIRMINGHAM ARPT: Caution-traffic operg in area from 165° clockwise thru 235° not visible from twr to dist of 4 s mi. Rnwy 8-26 perm closed to high performance single engine conventional lndg gear type acft, including T-6. (4-8)
CLANTON-GRAGG ARPT: Closed - const. (3-21)
DOTHAN-NAPIER FLD: Caution - helicopters from Rucker Army Air Base trng.
EVERGREEN-RADIO: Mar 13, VOR shut down until approx April 3. During this period, temp MRA arwy V-20 Mobile-Montgomery 4000' MSL; Arwy V-134 Evergreen, Ala-Columbus, Ga. unusable. (3-12)
GUNTERSVILLE ARPT: Closed. (3-26)
HUNTSVILLE-RADIO: VOR radials 005°-030° unusable due to roughness and bends. (5-11)
HUNTSVILLE MUN ARPT: Caution - rnwy 18-36 under const.
**MONTGOMERY-DANNELLY FLD: Taxiway from rnwy 15 to E/W taxi strip perm clsd. Dips in E/W rnwy 1500' from E end. Lgtd ditch approx 200' NE of apch end rnwy 21. Acft landing and taking off are cautioned to avoid Maxwell AFB tfc pat and control zone. Due to non-visibility twr unable to ctl tfc on E/W parallel taxi strip W of a point adj to Air National Guard hangar. Rnwy 15-33 open lgt acft xcpt first 500' from NW end unusable - holes. (3-16)
MUSCLE SHOALS-RADIO: VOR courses 020°-050°, 110°-150° and 285°-335° clockwise from stn not usable beyond 15 n mi acct scalloping and bends. (4-22)
TUSCALOOSA-VAN DE GRAAFF ARPT: Tow car pulling glider intermittently on rnwy daylgt hrs durg VFR.

ARIZONA: SPECIAL NOTICE: Oct 24, 1955 - July 24, 1956, captive balloons will be flown nightly from one hr after sunset to one hr before sunrise at lctns 10 mi W Gila Bend AF Aux, 2 mi S Sentinel and 3 mi E Dateland, Ariz. Surface to 1500' and lgtd by one red lgt. Extreme caution when flying at low alts near these lctns. (12-27)
AJO ARPT: Beacon inop..
COCHISE-RADIO: DME coverage 15°-35°, 35 n mi at 12,000'; 210°-245°, 35 n mi at 11000'. (6-30) VOR shut down until approx Apr 12 - modernization. (3-12) When opern is resumed, freq of VOR will be changed from 112.1 mc to 117.7 mc. (3-9)
DATELAND: Captive balloons anchored on 1500' cables will be flown 1700M Mondays thru 2400M Thursdays at Dateland and Gila Bend Aux AFB, Ariz., for approx 6 weeks. Extreme caution advised-low altitudes near these lctns. (3-12)
GILA BEND-RADIO: VOR has slow bends and scalloping starting at approx 25 to 30 n mi on 247° radial and at 30 to 35 n mi on 106° radial.
HASSAYAMPA-RADIO: VOR/DME usable to 30 n mi from 30° - 70°, 240°-255°, 320°-345° and 40 n mi from 70° - 85° at MEA. (3-30)
**KINGMAN: Effective April 17, 1956 Caution Area C-417 will be rescinded.
PHOENIX-RADIO: LFR has severe interference during hrs of darkness. About May 1 VOR/DME will be shut down until approx June 1 - modernization. (3-30)
PHOENIX-LUKE AFB-RADIO: USAF VHF/DF unreliable below 13,000' beyond 30 n mi in WNW quad. (2-2)
PHOENIX-SKY HARBOR ARPT: Const all taxiways. Caution - open ditches on edges of taxiways. (3-1)
PRESCOTT-RADIO: VOR coverage 185°-225°, 35n mi at 10,000'; 135°-145° and 165°-185° 39 n mi at 10,000'.
SALOME, SITE #27B, LAX-PHX: Clsd. (12-14)
SCOTTSDALE-THUNDERBIRD#2 ARPT: Closed. (3-26)
TUCSON-RADIO: About April 1, VOR/DME will be shut down until approx May 1. (3-19)
TUCSON-DAVIS MONTHAN AFB-RADIO: USAF VHF and UHF - steers unrel beyond 35 mi at or below the following alt: (a) NW quad 10,000'; (b) SW quad 10,000';(c) SE quad 12,000' (d) NE quad 13,000'.
YUMA-RADIO: Mar 12 VOR shut down until approx May 12. (3-13)
YUMA - COUNTY ARPT: B-45 type acft towing 5000' of cable and tow target in vcnty. All acft refrain from flying in close proximity to B-45 type acft in Yuma area.

ARKANSAS: ★EL DORADO-RADIO: Mar 30, VOR flgt-checked, opern normal. Freq changed from 114.3 mc to 116.4 mc. DME freq change associated with VOR. DME 2000' MSL coverage 43.5 mi 325° thru N to 225°;20000'MSL coverage 35mi 225° thru W to 325°.
FAYETTEVILLE-RADIO: About May 7, VOR will be shut down approx June 4 - modernization. (3-28)
FT.SMITH-RADIO: ILS lclzr, glide slope, MM & LMM operg on test-basis. (3-13)
FT. SMITH ARPT: 136' lgtd drilling derrick erected 0.5 mi W & 1.0Mi S of E/W rnwy.

ARKANSAS: HARRISON ARPT: New NW/SE rnwy under const.
HAZEN ARPT: Caution - E/W rnwy clsd. Men and equip on fld.
NORTH LITTLE ROCK-CENTRAL ARPT: Fld closed to all opns - const.
TEXARKANA-RADIO: VOR 143° radial to rnwy 13 beyond tomerance due to roughness and bends.
WALNUT RIDGE-RADIO: VOR radials 290°-320°, 120°-150° and 200°-210° unusable acct bends and course roughness.

CALIFORNIA: SPECIAL NOTICE: Between Nov 2, 1955 and May 2, 1956, Navy blimp will oper intermittently in vcnty of Wilmington and Dominguez, Calif from surface upward in connection with Los Angeles air pollution control. Flgts will originate at Santa Ana Lighter Than Air Base, will cross at Newport Beach and proceed seaward to Wilmington for opern in both areas. Return flgt will be reverse of outbnd flgt. Operns will be conducted in conditions down to 500' ceiling and 1/2 mi visibility.
ARCATA ARPT: Experimental testing of rotating lgts in inner apch zone of Rnwy 31 at infrequent times. Rotating lgts at 2100' and 1000' S of threshold of rnwy with six high intensity lgts rotating at 6 or 12 rpm.
AUBURN ARPT: Clsd to hvy acft. Lgt acft use extreme caution acct soft rnwys.
BAKERSFIELD-RADIO: Mar 2, VOR shut down until approx May 2 - modernization.
**BAKERSFIELD-AIRPARK: 130' lgtd derrick erected 1130' NE N/S rnwy.
BLUE CANYON, #13, SFO-SLC: Closed during winter months.
BLYTHE-RADIO: DME coverage 165°-188°, 39 n mi at 7000'; 189°-200°, 26 n mi at 6000'; 200°-220°, 39 n mi at 6000'; 220°-293°, 43 n mi at 9000'; 293°-310°, 26 n mi at 9000'; 310°-327°, 35 n mi at 9000'.
**BRAWLEY MUN ARPT: Unlgtd 55 ft. TV ant. erected approx 50 ft. in line with and from the end of SE rnwy.
CAMARILLO-RADIO: All courses have multiples.
CRESCENT CITY-RADIO: VOR arwy radials flgt-checked. Courses 90°-330° usable dist 22 n mi; 350°-90°, 26 n mi at 7000'; 43 n mi at 8000'.
DAGGETT-RADIO: VOR flgt-checked on arwy radials only.
FAIRFIELD-TRAVIS AFB-RADIO: USAF VHF/DF bearings and communications in NW quad unreliable below 8500'. Opers 0700-1600 Mon-Fri training status only.
FILLMORE-RADIO: VOR coverage 320°-355°, 35 n mi at 11,000'; 280°-320°, 26 n mi at 11,000'.
FT. JONES-RADIO: VOR has lgt course roughness all quads. Only arwy radials flgt-checked.
FORTUNA-RADIO: VOR has light to moderate scalloping beyond 26 n mi. Only arwy radials flgt-checked. (10-6) DME coverage 335°-350°, 43 n mi at 3000'; 350°-10°, 43 n mi at 8000'; 10°-30°, 43 n mi. at 9000'; 30°-120°, 35 n mi at 9000'; 120°-150°, 35 n mi at 6500'; 150°-335°, over water, not checked.
FRESNO AIR TERMINAL: Exercise extreme caution in vcnty, particularly when using VOR arwys. Jet acft climbing and descending in areas of extended centerlines Rnwys 29-11 and areas N and E of airport.
KLAMATH-McBETH ARPT: Closed.
LONG BEACH-RADIO: DME coverage 43 n mi as follows: 280°-305°, 5000'; 305°-340°, 7000'; 340°-040°, 12,000'; 040°-070°, 8000'; 070°-100°, 7000'; 100°-280°, 4000'. (6-16) ILS and LF rng during VFR conditions heavy simulated instrument apch traffic.
**LONG BEACH ARPT: Several 230' MSL portable oil derricks NW, W and S of fld. (10-21) No fuel servicing avail. for civil acft 2400-0600. (11-1). N 800' apch end rnwy 16L perm closed.
LOS ANGELES-RADIO: VOR coverage 275°-315°, 30 n mi at min en route alt. Light to moderate scalloping below 3000' MSL.
LOS ANGELES AIR ROUTE TRAFFIC CONTROL CENTER: Center will activate high alt sector 0900 Mar 20. Sector will control all acft operg at specific alt at or above 25,000'. One thousand on top flgt will NOT be controlled by this sector. All military acft operg at specific alts should contact the Los Angeles ARTC Center on 301.4 mc as soon as possible after departure from within the Los Angeles Control Area or after entering the area inbound.
LOS ANGELES INTERNATIONAL ARPT: Use paved areas only. New lgtd rnwy 16-34 approx 4000' W of Sepulveda Blvd open VFR traffic only. Equip. on and adj to const areas. Pilots are urged to use extreme caution when operg off-shore just W of arpt. All jet acft departing Rnwys 25L/25R climbing in VFR conditions use a 200° departure corridor which originates at a maximum of 3000' MSL approximately the intersection of the extended centerlines

CALIFORNIA: of the above rnwys with the shoreline. Aircraft proceeding East-bound from Malibu Intersection in VFR conditions making a track which approximates the extended centerlines of the above rnwys are CAUTIONED NOT TO DESCEND BELOW 4000' MSL until passing the Shoreline or Del Rey FM unless cleared otherwise by ATC. Jet acft pat down-wind leg is 2500'. Aircraft not intending landing at airport should avoid approach areas to W and E below 3000' in VFR wea. Recommend cross tfc plan crossing course at 3000' or above, ceiling permitting, directly over airport, or between LF range and airport. Avoid shoreline W due high performance of departing jet aircraft. Due non-visibility tower unable control traffic on last 2400' runway 34.
LOS ANGELES-SAN FERNANDO VALLEY ARPT: Tfc direction indicator inop 2300-0700.
MODESTO-RADIO: March 20, VOR shutdown until approx May 20- modernization.
OAKLAND: Pilots proposing transbay flgt should ascertain that VFR wea exists within both the San Francisco and Oakland Control Zones, or should obtain ATC clearance for flgt within a ctl zone when wea is less than VFR, since ceiling and visibility mid bay is frequently less than at the two terminals. Tfc operg in VFR wea should avoid vcnty of Alameda NAS. Extensive tfc including jets operate in tfc pat up to 2000' within a radius of 1.7 n mi of the field. Exercise extreme caution in these areas.
OAKLAND-RADIO: VOR coverage 35 n mi N thru E at min instr alt. (1-14) DME coverage 30°-60°, 26 n mi at 5000'; 60°-80°, 35 n mi at 5000'; 280°-290°, 35 n mi at 4000'; 340°-350°, 35 n mi at 6000'; 350°-030°, 17 n mi at 4000'.
✱OAKLAND INTERNATIONAL ARPT-TOWER: ASR will issue distance values in nautical miles in connection with radar control. Mar.19, UFH/DF cmsnd. Opers 225-400mc. Steers unreliable below 7000' within 10 miles of station. FLD: Dredging and clam shell equip. working S of landing area. All booms and equip. lgtd and marked. Use extreme caution when flying over or within this area.
OCEANSIDE-RADIO: VOR coverage 310°-020°, 35 n mi at min en route alt.
**OCEANSIDE ARPT: 163' unlgtd rdo twr erected approx 1-1/2 mi SE.
ONTARIO-RADIO: DME coverage 135°-150°, 26 n mi at 7000; 150°-200°, 17 n mi at 7000'; 200°-280°, 35 n mi at 7000'; 330°-350°, 26 n mi at 13,000'' 350°-0°, 35 n mi at 13,000'; About May 1, VOR will be shut down until approximately June 1.
ONTARIO INTERNATIONAL ARPT: Hi-intensity rnwy lgts being installed rnwy 7-25. Use rnwy and taxiways. Open ditches either side rnwy.
OXNARD AFB-RADIO: USAF VHF/DF unreliable below 12,000' within 50 n miles.
PALMDALE-RADIO: VOR coverage 120°-150°, 35 n mi at 10,000'; 150°-180°, 35 n mi at 9000'.
PASO ROBLES-RADIO: DME coverage 220°-235°, 35 n mi at 6000'; 235°-245°, 26 n mi at 6000'; 245°-270°, 35 n mi at 6000'.
QUINCY-GANSNER FLD: E 700' E/W runway and taxi strip unusable.
RED BLUFF-RADIO: DME coverage 180°-208°, 26 n mi at 9000'; 208°-217°, 26 n mi at 10,000'; 217°-235°, 35 n mi at 10,000'.
RIVERSIDE-RADIO: USAF VOR unreliable.
**ROSEMEAD-FLETCHER ARPT: Delete from records - private field.
SACRAMENTO ARPT-TOWER: Voice on ILS frequency 110.3 mc out of service.
SACRAMENTO-McCLELLAN AFB RADIO: USAF H facility unreliable beyond 15 miles.
SALINAS-RADIO: VOR coverage 20°-95° and 135°-295°, 35 n mi at min instr altitude. DME coverage 20°-44°, 26 n mi at 7000'; 44°-49°, 17 n mi at 7000'; 49°-90°, 26 n mi at 7000'; 90°-130°, 43 n mi at 7000'; 130°-145°, 26 n mi at 7000'; 145°-153°, 17 n mi at 7000'; 153°-180°, 26 n mi at 7000'; 180°-225°, 43 n mi at 7000'; 225°-300°, 43 n mi at 5000'; 300°-20°, 43 n mi at 7000'.
SAN DIEGO-RADIO: VOR coverage 50 miles MEA all quads except 20 miles MEA from 310° to 330°.
SAN DIEGO-LINDBERGH FIELD: 500' W end runway 9-27 closed - jet barrier.
✱SAN DIEGO-MIRAMAR NAS-RADIO: Navy H facility commissioned. Freq: 310kc. Ident: NKX. Located latitude 32-53-10, long. 117-03-27. Oper cont. Class: HW (3-23) Bearing, distance: 242°, 3.6 nautical miles.
SAN FRANCISCO: See Oakland Control Zone Notam.
SAN FRANCISCO-RADIO: DME coverage 10°-30°, 17 nautical miles at 5000'; 30°-85°, 26 nautical miles at 7000'; 85°-100°, 35 nautical miles at 7000'; 160°-180°, 26 nautical mi. at 5000'; 180°-225°, 17 n mi at 5000'; 225°-265°, 26 n mi at 5000'; 345°-10°, 35 n mi at 4000'.
SAN FRANCISCO GAP-RADIO: Homing fac unreliable in area 25° thru E to 130°
SAN RAFAEL-HAMILTON AFB-RADIO: USAF VHF/DF unreliable 340°-135° clockwise below 11,000'.

CALIFORNIA: SANTA BARBARA-RADIO: DME coverage 325°-30°, 26 n mi 9000'; 30°-45°, 35 n mi at 9000'; 80°-95°, 35 n mi at 4000'; 110°-260°, not checked. Reception 3023.5 kc unreliable daylgt hrs. (2-2)

SANTA BARBARA ARPT: 30' dragline operating along E edge arpt days. (3-26)

SANTA MONICA-RADIO: TVOR radials 030°, 075°, 210°, 260° and 323° usable. (1-20)

SANTA MONICA ARPT: Service avail only between 0700-2100 daily; extreme caution advised during ngt use of fld due to unlgtd open storm drain ditch 175' from S edge of main rnwy. An unlgtd unmarked difference in elev variable to as much as 25' exists between the open storm drain ditch and taxiway. All taxiways unlgtd. (1-20)

THERMAL-RADIO: VOR and DME coverage 330°-360° to 060°, 20 n mi; 060°-085°, 40 n mi; 145°-175°, 40 n mi; 175°-180° to 250°, 20 n mi; 250°-280°, 40 n mi at min en route alt.

UKIAH-RADIO: DME coverage 43 n mi; 305°-355° at 6500'MSL; 355°-60° at 9000'; 60°-100° at 7000'; 100°-150° at 6000'. 105° thru S and W to 305° over water not checked. (10-11)

VICTORVILLE-GEORGE AFB-RADIO: USAF VHF/DF steers unreliable 235°-325° and 360°-045°, below 15,000'.

**YUCCA VALLEY-SKY CORRAL ARPT: Abandoned. (3-22)

COLORADO: COLORADO SPRINGS-PETERSON FLD: Bcn inop. Caution - lndg acft - due to rise in terrain at apch end rnwy 21. Const on ramp SE of twr. (3-28)

DENVER-STAPLETON FLD: Rnwy 8L-26R clsd to operns heavier than DC-3 acft except when absolutely necessary for taxiing W of rnwy 3/21. Hvy air tfc N and E due to extensive instrument trng. Flashing amber lgt in segmented circle indicates rgt hand tfc. Two-way rdo rqrd capable of communication with twr.

GRAND JUNCTION-RADIO: About April 27, ILS glide slope will be shut down until approx June 8. (2-29) About May 7, lclzr will be shut down until approx May 14. (3-23)

LONGMONT ARPT: NW/SE rnwy under const. (3-13)

PUEBLO: Ordnance depot approx 14.8 n mi E at lat 38-16-53, long. 104-18-00, conducting demolition work - days.

WILTON-RADIO: VOR has minor bends in SW quad out to 17 n mi. DME coverage 270°-285°, 35 n mi at 3000'; 320°-360°, 35 n mi at 3000'; 360°-015°, 35 n mi at 2500'.

CONNECTICUT: SIMSBURY ARPT: Experimental dropping of parachutes on fld during VFR wea. days Mon thru Fri. Fld occasionally clsd by standard marker.

WAREHOUSE POINT-SKYLARK ARPK: Closed.

DELAWARE: **GEORGETOWN-SUSSEX COUNTY ARPT: E/W rnwy perm closed. (3-22) Caution, NNE/SSW and NNW/SSE rnwys rough. Men and equip. on fld. Extensive glider activity weekends and evenings. (3-29)

WILMINGTON-NEW CASTLE COUNTY ARPT: Jet interceptor acft tfc pattern altitude 1600' MSL. Conventional acft tfc pattern altitude 1000' MSL. Jets use two longest rnwys only. Jet barrier 3' high 400' from apch end rnwy 9. Ctl tower operg in old structure NW arpt.

DIST. OF COLUMBIA: WASHINGTON-SPECIAL NOTICES: (1) Caution - dynamiting daily, hvy charges, dam const along E bank Potomac River, 3/4 mi N of Key Bridge at Dalecaria, Md. (2) Thru 31 July 1956, special VFR operating rules effective in hi-density zone. Zone identical with Wash. control zone excluding Washington-Virginia Arpt and prohibited areas. Altitudes - surface to 3000' N of and 700' to 3000' S of Washington rng. Two-way rdo rqrd. Prior to take-off within zone or entry for landing in zone, establish rdo communication with ATC tower of take-off or landing and maintain continuous listening watch. Acft passing thru zone contact and maintain continuous listening watch with WNA control twr. Helicopters excepted, regardless of other VFR clearance, no VFR flight within zone when grnd visibility less than one mi, except when smoke, dust, snow, sand, then VFR flight permissible with one-half mi visibility. Do not exceed 180 mph (156 knots) unless operational characteristics require more, in which case use minimum speed consistent with safety.

WASHINGTON-RADIO: LF rng SE course bends 4 to 9 n mi from stn; 17 to 22 n mi from stn, multiples 3°-3.5° S.

WASHINGTON NATIONAL ARPT-AIR ROUTE TRAFFIC CONTROL CENTER: Radar service will be provided UHF equip acft on 250.2mc, 318.2 mc and 348.6 mc only in Washington Metropolitan Area.

WASHINGTON NATIONAL ARPT TOWER: PAR and VHF/DF shut down. (3-29) FLD: USAF, NAVY, CG: Clsd to all acft xcpt: (a) Acft carrying VIP and officers ABOVE rank of Major General or Rear Admiral. (b) Scheduled MATS. (c) Flgts rqrg customs and immigration service. (d) Navy and CG logistic support flgts. (CG logistic flgts not hangared at WNA rqr prior approval of arpt director, must be cleared with Comdt., CG and will be flown VFR conditions only.) NO acft over 120,000 lbs without prior approval arpt director. CG and Navy acft taxi to MATS term N of Admin Bldg.

FLORIDA: SPECIAL NOTICE: Effect. April 5, Memory Rock, Bahama Island Warning Area W-178 will be rescinded. (2-21)

**BANANA RIVER-PATRICK AFB: Effect. April 17, Warning Area (W-497A) will be amended by deleting that portion N of a line between points at lat 29-02-00, long. 79-19-00, and lat 30-00-00, long. 77-13-00. Effective April 5, Warning Area (W-479A) description is revised as follows: "and excluding the airspace below 5000', 2.5 s miles either side of a line extending between poings at lat 27-00, long. 79-00; lat 27-15-30, long. 78-24, and lat 27-00, long. 77-43 and excluding the airspace below 5000' over Grand Bahama Island and excluding all designated and approved domestic ctl areas. Effective April 5, Warning Area W-479C, is amended to show alts being used "from 27,000' to unlimited" and that the one year temporary restriction originally placed on the area be removed, provided that it is expressly understood by those concerned that when higher alts are reqrd by piloted acft the area will be brought up and reviewed with a view of opening up usable jet acft alts.

BARTOW AIR BASE: AF primary Contract School closed Sat, Sun, holidays, and other days 1730-0700 xcpt on prior approval. Prior approval for Sat. and Sun. must be obtained before 1500 Fri. Prior approval 1730 to 0700 must be obtained before 1500 on arrival day. (2-10)

CHASSAHAWITZKA BAY: Effect April 5, Warning Area W-141, will be rescinded. (2-21)

DAYTONA BEACH-RADIO-SPECIAL NOTICE: Due temporary shut down Daytona Beach, VOR temporary MEA V-3 from Vero Beach to Jacksonville 6500'; V-152 Orlando to over Daytona Beach published MEA adequate. Other airways predicated on Daytona Beach VOR unusable. Restoration of Daytona BeachVOR will cancel this NOTAM. (2-14)

DAYTONA BEACH-RADIO: VOR shut down. DME unmonitored and with no identity. During this period, 338° radial of Vero Beach VOR may be substituted for the 157° radial of Daytona Beach VOR to define Maytown intersection. MRA 3500'. (1-28)

DINNER POINT: Effective Apr 5, Warning Area (W-143), will be rescinded. (2-21)

FERANDINA: Effect. April 17, Warning Area W-157A will be established: Name: Ferandina, Fla. Description: Beginning at lat 32-00-00, long. 78-26-00; to lat 32-00-00, long. 77-30-00; to lat 30-39-00, long. 77-30-00; to lat 30-37-00, long. 78-45-00 to point of beginning excluding that portion overlapping Control Areas 1152 and 1153. Activities: Airborne early warning training. Time of Use: Continuous, VFR weather conditions only. Altitude: Surface to unlimited. Controlling Agency: C. O. NAS, Glynco, Ga.

**FT. LAUDERDALE-BROWARD COUNTY INTNL ARPT: Is now included in Cuba-United States trans-border flight notification agreement. Customs service regularly avail 0800-1700 daily except Sundays and holidays. From 0700-0800 and from 1700-2300 Monday thru Saturdays and on Sundays and holidays customs service available at overtime rates. No provision for notifications of customs between hrs 2300-0700 daily. For further details of flight notification agreement see International Flight Information Manual. (3-30)

FT. MYERS-RADIO: VOR radial 131°, V35, not usable - excessive scalloping and bends.

HOMESTEAD-RADIO: Hvy tfc E and W courses LFR 2500' and below. Caution - E course below 1000' within 4 n mi Homestead AFB. (11-23)

HOMESTEAD ARPT: About May 5, fld will be abandoned. (2-28)

JACKSONVILLE-RADIO: DME and VOR coverage 35 n mi at min en route alt. VOR unusable 180°-260°, with exception apch course 248° usable to 9 n mi. (4-27)

JACKSONVILLE-IMESON ARPT: Rnwy 18L-36R closed to jet acft.

KEY WEST-INTNL ARPT: Large or fast acft taking-off from rnwys 8 and 11 will proceed straight out and pass S and E of Boca Chica NAS. All acft en route International Fld will ctc Boca Chica twr on 126.18 mc for tfc info when 20 mi out; if unable to ctc twr, ctc Key West radio. Caution - const 600' ext to apch end rnwy 8. Air carrier operns authorized for Lockheed 18, DC-3 and C-46 acft only - due to conditions of rnwys. Lndg fee for cargo or charter acft only. Flare pots only lgtg avail. by prior req. Extra fee. (4-15)

LAKE CITY MUN ARPT: S and central ramp areas closed. Transient acft use N end near hangar. (1-19)

MARIANNA-RADIO: About April 2, VOR will be shut down approx June 4 - modernization.

MARIANNA-GRAHAM AIR BASE: Construction - new rnwys parallel N side rnwy 8/26 and W side rnwy 18/36. (11-18)

MAYPORT: Effective April 17, Warning Area (W-158A) will be established: Name: Mayport, Fla. Description: Beginning at lat 30-12-00, long. 78-54-00, to lat 30-07-00, long. 78-00-00; to lat 29-39-00, long. 78-00-00; to lat 29-02-00, long. 79-19-00 to point of beginning. Activities: Air and surface activities for carrier operations, anti-submarine operations and inter-ship and acft operations. Time of Use: Activated upon publication of NOTAMS. Altitude: Surface to unlimited. Controlling Agency: COMFAIR, Jacksonville, Florida.

FLORIDA: MIAMI INTERNATIONAL ARPT-SPECIAL NOTICE: All flights operg within an area of a ten n mi radius at night, at altitudes of 3,000 ft or below, shall establish, prior to entry into area and maintain thereafter air speeds not in excess of 180 knots. Acft types having characteristics requiring minimum air speeds in excess of 180 knots shall maintain the lowest possible air speed consistent with safety. Miami's operators and pilots request cooperative compliance by itinerant flights.

MIAMI INTERNATIONAL ARPT-TOWER: About April 10, rcvr 122.5 mc will be decmsnd. FLD: Approx 800' rnwy 9L-27R and portion taxiway N of 20th Street hangar area not visible to twr. Parking space avail. 20th St. for civil acft. (12-6) Taxiway entrance to SW corner USAF ramp clsd. (1-17)

OCHOPEE, BEACON SITE 18, TPA-MIA: Bcn site darkened. (2-28)

ORLANDO-RADIO: DME and VOR coverage 35 n mi at min en route alt.

ORLANDO ARPT: Concrete area immediately E of rnwy 18 NW portion arpt closed for taxiing. (4-1)

ORLANDO-PINECASTLE AFB-RADIO: USAF VHF/DF unreliable below 2000' at 50 n mi.

PANAMA CITY-FANNIN FLD: NW/SE rnwy clsd ngt opern. Trees penetrate standard apch zone to rnwy 32. Caution - shoulders soft. Men and equip. adj rnwys. (9-8)

PENSACOLA: Aerobatic and formation tactics being conducted in Caution Areas 144, 146, 147 and 148 during daylgt hrs., Mon thru Sat. Intensive ngt flgt trng to 8000' in 146 and 147 sunset to 0100 CST nightly. Due to saturation of areas, civil air tfc is requested to remain on airways. Military acft to Pensacola should proceed on airways, or between 1500' and 2000' or above 8000' while in Caution Areas. Air tfc using Red Arwy No. 30 between Crestview and McDavid Int. is cautioned that extensive aerobatic trng is being conducted in Caution Areas adj to arwys between 4000' and 10,000'.

★ ST. AUGUSTINE-FAIRCHILD-ST. AUGUSTINE ARPT-TOWER: Mar 16, twr operd by Fairchild Aircraft Co. Freq: 272 kc; 126.18 mc. rcvg: 3023.5 kc; 122.5, 126.18 mc. Class: CI. Hrs opern: 0730-1600 Mon thru Fri. (3-20) FLD: Caution - N end rnwy 31 and 34 blkd off - const. Usable length of rnwys reduced to 3500'.

ST. PETERSBURG-PINELLAS COUNTY INTERNATIONAL ARPT: Men and equip on fld near intersection N/S and E/W taxiways NE of control twr. Caution in using N/S and E/W taxiways within 500' of control twr. Rnwy lgts NW/SE rnwy inop.

TALLAHASSEE-RADIO: VOR courses unusable 110°-150°. (6-23)

TALLAHASSEE-DALE MABRY ARPT: Closed to air carrier acft exceeding 50,000 lbs. xcpt as alternate arpt. Non-aircarrier acft exceeding 50,000 lbs rqr prior permission. Rnwy 9-27 clsd to air carrier ngt operns. (10-7)

TAMIAMI-RADIO: About Apr 3, H fac will be cmsnd. Freq: 209 kc. Ident: TMT. Lctd lat 25-50-06, long. 80-54-36. Class: MHW. (3-23)

TAMPA-RADIO: VOR courses 95°-105° unusable.

VERO BEACH ARPT: Rnwys 3R-21L and 7R-25L clsd ngts. (2-15)

WEST PALM BEACH-PALM BEACH COUNTY ARPT-TOWER: April 2, rcvr 122.7 mc will be cmsnd. About May 1, rcvr 122.5 mc will be decmsnd. (3-30) FLD: All rnwys, xcpt 9-27, unlgtd and bndry lgts inop. (4-7)

WINTER HAVEN-GILBERT FLD: Taxiway and parking ramp near rnwys 4 and 29 extensive excavation. Trucks crossing rnwys after normal operg hrs and wk-ends. (2-3)

GEORGIA: ALBANY-RADIO: VOR coverage at min instr alt 35 n mi. Moderate course roughness exists on and adj to following courses: 20°, 85°, 205°, 279°, 320° from station.

ALBANY ARPT: Clsd to aircarrier acft exceeding 50,000 lbs xcpt as alternate arpt. Non-aircarrier acft exceeding 50,000 lbs require prior permission. Jet acft operg from Turner AFB particularly SE of Arpt. Contact Turner twr on 126.18 mc for Advisory Info. If unable to contact Turner twr contact Albany rdo for relay. (11-18)

ALMA-RADIO: DME and VOR coverage 35 n mi at min en route alt. (8-3)

ATLANTA-SPECIAL NOTICE-RADIO: ARTC accepting IFR tfc which is equipped with UHF rdo freq only with destination Atlanta Mun arpt. (2-26) Center advises high altitude sector with jurisdiction over airspace 25,000' and above within Atlanta Control Area to be activated 0800, Feb 15. All jet type acft operg on IFR flgt plans at or above 25,000' or 1,000' on top should guard 301.4 mc. Within Atlanta area, this channel will be utilized to obatin traffic clearances and to forward progress reports. Weather and other information not pertinent to traffic control should be handled on 255.4 mc. This channel should also be used if unable to contact Atlanta Center direct on 301.4 mc. (2-14)

ATLANTA-RADIO: VOR courses 060°-090° unusable acct bends and roughness. (4-19)

ATLANTA ARPT-TOWER: ASR-PAR shut down - modernization. (3-10) FLD: Effect Apr 1, acft arriving arpt will make initial contact with Atlanta apch control on 120.7 mc regardless of weather or flight plan. Acft not equipped for 2-way commun on 120.7 mc will use GEORGIA: other available freq. (3-6)

ATLANTA-FULTON COUNTY ARPT: Const SE end of NW/SE rnwy - caution. (9-13)

BRUNSWICK ARPT: Caution - intensive blimp training in vicinity.

COLUMBUS-RADIO: VOR courses 350°-30° unusable acct bends and roughness. (3-17)

**DAWSON-TERRELL CO. ARPT: 334' (722'MSL) lgtd rdo twr erected 3.5 n mi W (271°T) at lat 31-44-07, long. 84-29-56. (3-21)

**DUBLIN ARPT: New fld. Type: P. Lctn: 3 S. Elev: 300'. No. rnwy: 2. Lngst rnwy & facs: 20-B-S3. Fuel: F1.

LA GRANGE-RADIO: VOR flgt-checked on arwys radials only.

MACON-RADIO: DME coverage at min en route alt, 35 n mi in all azimuths. About April 2, VOR will be shut down until approx April 30 - modernization. (2-27)

NORCROSS-RADIO: VOR coverage 060°-240°, 35 n mi at min en route alt. (5-9)

ROME-RADIO: LF rng operg as unmonitored fac. Use of LF rng as en route or apch aid must be ADF disregarding on-course signals and pilot must monitor fac durg such use.

ROYSTON-RADIO: VOR courses lgt to moderate roughness may be noted over mountains NW at min alt.

TIFTON-MYERS ARPT: Resurfacing all rnwys. (4-28)

**TOCCOA-LE TOURNEAU ARPT: 205' (1195'MSL) lgtd twr erected 2 n mi SW (223°T) at lat 34-34-15, long. 83-19-35. (3-2)

VALDOSTA-RADIO: VOR unusable 240° clockwise thru 360° to 110° account excessive roughness and course displacement with exception of arpt apch course 003°, usable to 10 n mi. (8-31)

IDAHO: **ABERDEEN-VANDERFORD ARPT: Abandoned. (3-27)

BOISE AIR TERMINAL-TOWER: UHF/DF NE and NW quads unreliable below 14,000' beyond 40 n mi. SW and SE quads unreliable below 10,500' beyond 40 n mi. (11-9) FLD: Rnwy 16-34 clsd xcpt emerg daytime lndgs-const adj S end. (4-3)

BURLEY-RADIO: VOR coverage 130°-150°, 26 n mi at min terrain clearance alt.

DIXIE USFS ARPT: Closed - const. (9-16)

KELLOGG-SHOSHONE COUNTY ARPT: Fld lgtg inop, xcpt prior req. (11-19)

MALAD CITY-RADIO: VOR coverage 360°-20° and 50°-60°, 35 n mi at 12,000'.

**POCATELLO MUN ARPT: Formerly named Pocatello-Phillips Fld. (3-22)

STREVELL BCN SITE #10, SLC-PDT: Inop. (2-23)

TWIN FALLS-RADIO: VOR coverage 115°-150°, 30 n mi at min terrain clearance alt.

TWIN FALLS-JOSLIN ARPT: Trench 25' deep, 30' wide lctd 165' off end rnwy 30. Men, equip in trench. (2-17)

ILLINOIS: ALTON-CIVIC MEMORIAL ARPT: Aerobatic area for student trng in following described area: bounded by long. 89-48 and 90-00; lat 38-57 and 39-03. In use daily when ceiling and visibility exceed 5000' and 5 mi, between 2500 feet and 5500 feet. MSL. (6-16)

BELLEVILLE-SCOTT AFB-RADIO: USAF LF rng has slight splits and multiples within 35 n mi. NW, SW and SE courses unreliable beyond 35 n mi due to splits and bends. NE course unreliable beyond 65 n mi.

BENTON ARPT: Caution - new N/S rnwy under const. (9-9)

BRADFORD-RADIO: H fac usable dist 20 - 25 s mi. (3-1)

**CHICAGO: 22 telephone poles, 24' to 34' high, erected in the Pinehurst Subdivision approx. 600 ft. south of Glenview Naval Air Station. (1-31)

CHICAGO-RADIO: Multiples on NW course LF rng. About April 30, LF rng ident will be changed to: MDW. (2-8)

CHICAGO-AIR ROUTE TRAFFIC CONTROL CENTER: About Mar 30, freq 118.9 mc will be changed to 124.5 mc. (3-13)

CHICAGO-MEIGS FLD: Caution - S end rnwy distance from threshold lights to seawall 90 feet.

CHICAGO-MIDWAY ARPT-TOWER: TVOR courses unreliable beyond 20 n mi between 5° 10°, 35°-40°, 145°-155°, 255°-265°, 335°-348°. (2-8) ILS back course erratic. About April 30, TVOR and ILS lclzr ident will be changed to: MDW; LOM to MD; LMM to DW. (2-8) FLD: Single eng transient acft willlnot be allowed dock space at the N terminal bldg, must use facs of S terminal bldg. Due to non-visibility acct parked acft, twr unable to ctl single eng acft on many portions of all outer ramps. Use extreme caution on E ramp and in vcnty of both terminal bldgs. All acft will remain N of white line on S side of rnwy 27R while running up, parking or taxiing. (5-9) One experimental oscillating flasher guidance lgt installed on each side of green threshold lgts on apch end rnwy 31L. (3-16) 250' (842'MSL) lgtd smoke stack being erected 9.6 n mi (123°T) at lat 41-41-18, long. 87-33-43.

ILLINOIS: **CHICAGO-O'HARE INTN'L FLD: 147' (787'MSL) lgtd steel twr being erected 2.6 n mi S (175°T) at lat 41-56-21, long 87-53-23. Due to non-visibility twr unable to ctl tfc 300' - 800' W rnwy 36, 800'-1600' E apch end rnwy 9, 100'-1100' N rnwy 9-27, 800' SE intsxn rnwy 14-32, and USAF ramp due bldgs & parked acft center taxiway to ramp & black top taxiway to slick hangar, and terminal gates 1, 2 and 3. (1-23) Rnwy 14-32 clsd, const.

CHICAGO-SMITH SEAPLANE BASE: 251' lgtd grain elevator being erected 2 n mi N(360°T) at lat 41-41-00, long 87-33-36. (1-27)

CHICAGO HEIGHTS-RADIO: DME coverage 151°-285°, 35 n mi at 2000'. (9-10)

DANVILLE-VERMILLION COUNTY ARPT: Caution-const on taxiway strip adj to Rnwy 3-21. NW/SE sod strip closed to all operns. (5-12)

EAST ST. LOUIS-PARKS METROPOLITAN ARPT: Aerobatic area for student trng in following area: Bounded by long 90-00 and 90-15; lat 38-25 and 38-35. In use daily when ceiling and visibility exceed 5000' and 5 mi, between 2500' and 5500' MSL. (5-13)

EFFINGHAM COUNTY MEM'L ARPT: Const on E/W rnwy. (11-18)

FAIRFIELD ARPT: Closed - const. (9-9)

JOLIET-RADIO: VOR coverage 35 n mi at all azimuths at min en route alt.

KEWANEE ARPT: Men and equip. on fld intermittently - caution. (7-5)

**LOCKPORT-LEWIS LOCKPORT ARPT: 250' lgtd twr erected 1.5 n mi S (190°T) at lat 41-35-00, long 88-05-00. (3-6)

LOMBARD-YORK TOWNSHIP ARPT: Transmission line approx 3000' W. Height of twrs, 123', not mrkd or lgtd. (11-21)

MOLINE ARPT-TOWER: Effect 0001 April 8, apch ctl serv will be inaugurated. Class: AC(g).

**MOMENCE ARPT: Abandoned.

PEORIA-RADIO: VOR coverage 190°-70°, 35 n mi at min en route alt. (10-11)

PEORIA-GREATER PEORIA ARPT: Unlgtd 5' fence apch end rnwy 22. (10-15)

**PEORIA-LETOURNEAU ARPT: Abandoned. (3-26)

PEOTONE-PADIO: VOR coverage lmtd between 39 and 43 n mi at most azimuths at min en route alt. (2-4)

POLO-RADIO: VOR coverage 280°-350°, 39 to 43 n mi at min en route alt. (2-21)

ROCK FALLS ARPT: Men, equip. on E side fld durg daylgt hrs - construction. (5-28)

★SPRINGFIELD-CAPITAL ARPT-TOWER: Mar 25, Apch Ctl service inaugurated. Class: ** AC(g). FLD: Men, equip on fld durg daylgt hrs. 40' lgtd glide slope antenna pole 1050' apch end rnwy 4 and 400' NW rnwy centerline. Lgtd lclzr antenna shelter 1400' NE apch end rnwy 22. (3-7)

INDIANA: SPECIAL NOTICE: The Atomic Energy Commission requests all pilots to maintain a reasonable altitude when flying over their Dana Installation, as a safety precaution to the plant. The area involved is located approx 29 s mi N of the Terre Haute LF rng between Montezuma and Newport and is bounded by latitudes 39-50, 39-52 and longitudes 87-21, 87-26.

AUBURN ARPT: About April 2, const begins on a 910' (1780'MSL) lgtd TV twr to be erected 3 n mi SSE (167°T) at lat 41-19-59, long 85-03-07 . (3-12)

CAMP ATTERBURY: Frequent violations have been reported of Restricted Area R-65 to the S. High angle mortar and artillery firing being conducted daily. All acft are warned to keep clear of this area.

COLUMBUS-BAKALAR AFB-RADIO: USAF VHF/DF unreliable 250°-270° outbound below 3000' and 010°-250° below 2500'. (8-18)

DYER-TRIANGLE ARPT: E/W strip clsd - const. Turf soft. (2-28)

ELKHART ARPT: N/S rnwy usable at pilots' discretion. (8-22)

FORT WAYNE-BAER FLD: Rnwy 4-22 now 7800' - daylgt operns, 6200' - ngt operns. 1600' ext. not lgtd. Due to non-visibility twr unable to ctl tfc on first 500' of rnwy 9 and entire taxistrip leading to apch end of rnwy.

GARY MUN ARPT: Const on pole line SW. Pole heights vary from 29' to 83' above ground. Four poles lctd nearest extended centerline of rnwy 2 will be 43' (633' MSL). (1-5)

GOSHEN-RADIO: DME coverage 46°-145°, 35 n mi at 2300'; 172°-310°, 35 n mi at 2100'.

GREENSBURG ARPT: Regrading and seeding N/S rnwy. Use E half only. (11-9)

HUNTINGTON ARPT: Closed all operns - due soft fld. (3-18)

INDIANAPOLIS-RADIO: Follow experimental facs operd intermittently by TDC (approx one yr.): Tilden VOR freq 115.7 mc, ident: IEX. Weir Cook VORW freq 112.3 mc, Ident: IAX. TVOR freq 111.4 mc, ident: IDX, with voice ident. Lclzr freq 109.1 mc (without voice), ident: IBX. Glide slope freq 335.0 mc, serving N/S rnwy. DME lctd in laboratory N side fld, Channel 64, Mode C. Directional lclzr 110.3 mc serving E/W rnwy . One

INDIANA: VORW on 112.9 mc testing intermittently. Mar 19, en route radar control provided in vicinity of Terre Haute. Opern conducted from 0700-2300 Mon thru Fri. Facility identified as Rockville Control. Primary trans & recvg: 125.3, 319.8 mc. Secondary trans. 121.5, 122.2, 126.7, 135.0, 135.9, 243.0, 255.4, 301.4 mc; rcvg 121.5, 122.1, 126.7, 135.9, 243.0, 255.4, 301.4 mc. (3-13)

INDIANAPOLIS-WEIR COOK ARPT-TOWER: ASR will issue distance values in nautical miles in connection with radar control. FLD: All acft rqrd to have rdo rcvrs. Rnwy gross wt lmtd to 110,000 lbs. Fee for acft wt excess of 110,000 lbs. Left and right tfc pat. Lndg Fee for multi-engined acft. Due to non-visibility twr unable to ctl tfc on taxiway from SE hangar to Turner ramp. All military jet acft rqrd to have transmitters and rcvrs tuned to twr freq. (3-9) Rnwy 9-27 used only at discretion of ctl twr. (10-12) Rnwy 4-22 slippery when wet. (2-6)

IA FAYETTE-RADIO : Severe roughness and scalloping VOR radials 100° clockwise 170°. (1-18) About May 31, VOR will be decmsnd and recmsnd at lat 40-29-07, long 87-00-37. Freq will be changed to 112.0 mc. Monitoring category (1). Class: BVOR. (3-26)

LA FAYETTE-HALSMER ARPT: Const - E side SW end NE/SW rnwy and entire NW/SE rnwy. Rnwy lgts inop. Middle one-third NE/SW rnwy serviceable W side.

LA PORTE: Ground demolition in progress approx 6.9 n mi SE during daylgt hrs Mon thru Sat. Center of operns lctd at lat 41-31-28, long 86-36-46.

MADISON: Frequent violations of the Restricted Area approx 4.3 n mi N have been reported. Artillery and anti-acft firing practice being conducted daily in the Jefferson Proving Grounds. All acft are warned to keep clear of this area.

ROCKVILLE-RADAR: En route radar control provided. Primary trans and rcvg: 125.3, 319.8 mc. Secondary trans. 121.5, 122.2, 126.7, 135.0, 135.9, 243.0, 255.4, 301.4 mc; rcvg 121.5, 122.1, 126.7, 135.9, 243.0, 255.4, 301.4 mc. See Indianapolis Radio. (3-13)

SOUTH BEND-ST. JOSEPH COUNTY ARPT-TOWER: ILS lclzr back course flyable with slow bends one to 5 n mi from stn. Glide slope flyable down to 50'. No touch down point. (2-14)

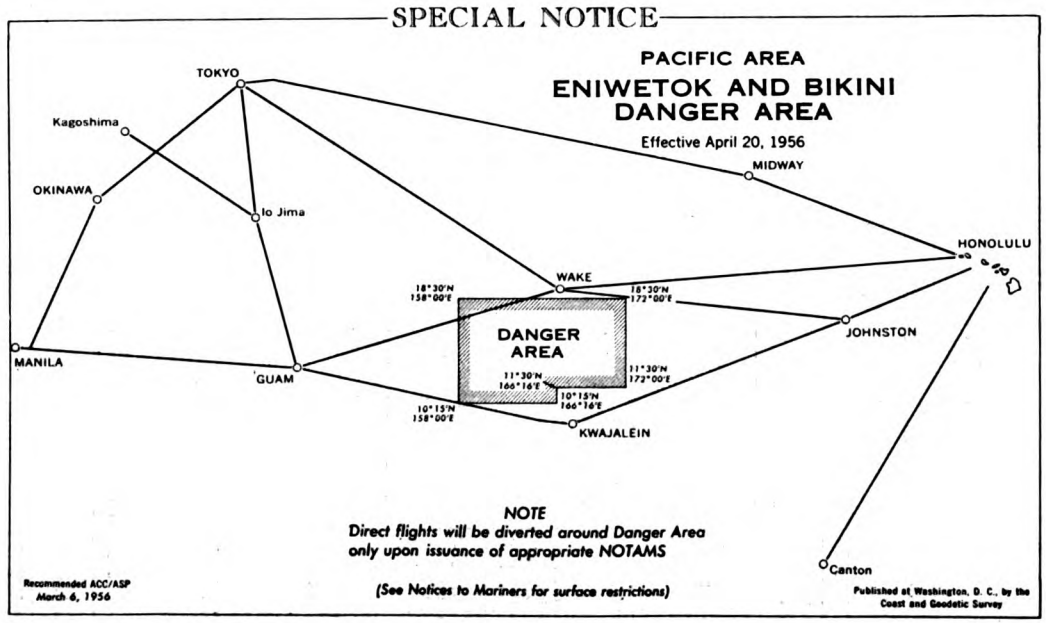
SHERIDAN-RADIO: VOR coverage lmtd to approx 35 n mi between 150° and 280°. Moderate course roughness exists in mountainous area.
TORRINGTON ARPT: Oil well pumps and storage tanks edge all rnwys. Men and equip. on fld. Use extreme caution. (10-4)
PUERTO RICO ★SAN JUAN-PUERTO RICO INTERNATIONAL ARPT-TOWER: Effect. April 1, trans and rcvr 126.18 mc will be discontd. (3-9) FLD: Parking circle 2, 3, 4 and 5 on N departure ramp not fully visible from twr. Caution. (6-7)



Revisions to Instrument Approach Procedures

VHF OMNIRANGE (VOR) PROCEDURES

(DISTANCES ARE IN STATUTE MILES)

If a VOR instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument approach procedure, unless an approach is conducted in accordance with a different procedure authorized by the Administrator of Civil Aeronautics for such airport. Initial approaches shall be made over specified routes. Minimum altitude (s) shall correspond with those established for en route operation in the particular area or as set forth below.

CITY AND STATE / AIRPORT NAME / AIRPORT ELEVATION / CLASS OF FACILITY / FREQ. / IDENT. / PROCEDURE NO.	INITIAL APPROACH TO FACILITY: FROM	CRS. AND DIST.	MIN. ALT.	PROCEDURE TURN: SIDE OF FINAL APCH. ALWAYS CHECK NOTICES TO AIRMEN SECTION

AIR NAVIGATION RADIO AIDS

INSACS = Interstate Airway Communications Station/s (CAA)

VHF OMNI-RANGE: "Non-commissioned" VHF omni-ranges may lack certain items, such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly.

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES: Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated INSACS. (C) The station identification is monitored continuously by the communicator at the associated INSACS. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated INSACS. Category I (VOR) = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category I are met. NOTE: Category II indicated by parenthetical (2). Category III = Facility monitored soley through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an INSACS, and located too distant from INSACS to be monitored with a VHF receiver will fall into Category III. NOTE: Category III indicated by parenthetical (3).

NOTE: Letters between range courses are quadrant identifiers, e.g., "90 YN 180", indicates the quadrant between the two courses is a yellow N quadrant. The letter immediately following a range course indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual: "A" or "N" aural. In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

LEGEND

(A) = Air Force facility. (N) = Navy facility. (P) = Private facility. (S) = State facility.
(g) = Twr equipped with 121.9 mc or (g.7)=Twr equipped with 121.7 mc for ctl of gnd traffic.
(0700-2300) = Hours of operation local time.
(3) = Monitoring category
(B) = Blue Hemisphere. (Y) = Yellow Hemisphere
→ New or revised data
* = Automatic voice identification
▒▒ Information deleted.

RADIO CLASS DESIGNATIONS

AC. . . . . Approach Control Tower, CAA (transmits on voice channel of associated ranges and ILS in addition to frequencies listed)
B. . . . . Scheduled Broadcast Station (broadcasts weather at 15 and 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C. . . . . Control Tower, CAA
CI. . . . . Control Tower, (City, County, Private, etc.)
D. . . . . Distantly controlled

DME. . . . Distance Measuring Equipment
FM. . . . . VHF fan marker (100 watts)
GCA. . . . Ground Controlled approach system
H. . . . . Non-directional radio beacon (homing), power 50 watts to less than 2000 watts
HH. . . . . Non-directional radio beacon (homing), power 2000 watts or more
ILS. . . . Instrument Landing System (voice on localizer channel)
J. . . . . L/MF (200-415 kc) voice facility on other than range frequency
LFM. . . . VHF fan marker, low powered (5 watts)
LMM. . . Compass locator station when installed at middle marker site
LOM. . . . Compass locator when installed at outer marker site
LVOR. . . Low power VOR (with standby equipment)
MH. . . . . Non-directional radio beacon (homing) power less than 50 watts
ML. . . . . Range (loop radiators), power less than 50 watts
MM. . . . VHF middle marker
MOR. . . . Low frequency omni-drectional range
MRA. . . . Range (adcock, vertical radiators), power 50 or more, but less than 150 watts
MRL. . . . Range (loop radiators), power 50 or more, but less than 150 watts
OM. . . . . VHF outer marker
P. . . . . Point-to-Point radio
RA. . . . . Range (adcock, vertical radiators), power 150 watts or more
RAPCON Radar Approach Control Center.
RL. . . . . Range (loop radiators), power 150 watts or more
S. . . . . Simultaneous range, homing and voice signals available. Inclusion suffix "W" indicates range and homing signals only
T. . . . . Teletype
TVOR. . . Low power VOR (no standby equipment) located on airport
TX. . . . . Principal teletype
V. . . . . Additional VHF voice feature on other than range frequency
VAR. . . . Visual-aural VHF range
VOR. . . . VHF omni-directional range (omni-range)
W. . . . . Without voice facilities on range frequency
Z. . . . . VHF station location marker at a range station

NOTES

1. Range courses are magnetic in-bearings
2. All CAA MH facilities operate continuously unless cited as follows: (on req)
3. All CAA ranges operate continuously. Those which are not manned continuously are cited in the remarks column with hours of operation in parentheses, e.g., (0600-2400)
4. VHF and LF/LMF ranges listed with the same identifier are controlled by the same INSACS. Due to space limitations the DTV and communication frequencies which are listed with the LF/LMF facility are not repeated with the VOR facility

Pilots are requested to indicate when calling C.A.A. airway communications stations and control towers the frequency on which the reply is expected.

RADAR AVAILABLE : How and Where

(17 Apr 1956)

PAR - Precision Approach Radar. ASR = Airport Surveillance Radar. GCA = Ground Controlled Approach - Military Equivalent of Combined ASR and PAR Equipment. ARSR = Air Route Surveillance Radar. RAPCON = Radar Approach Control Center.

GROUND CONTROLLED APPROACHES - The only airborne equipment required for ground controlled approaches is a functioning radio transmitter and receiver. There are two types of ground controlled approaches - Precision and Surveillance.

PRECISION APPROACHES - Aircraft are guided to final approach to the designated instrument runway. The final approach flight path on a precision scope (PAR) is greatly expanded for increased accuracy and furnishes the controller with range, azimuth and altitude information. This permits the controller to accurately guide aircraft to touchdown on the runway.

SURVEILLANCE or ASR APPROACHES - Only the ASR scope is used and aircraft may be directed to any selected runway over approximately the same flight path the pilot would take if flying VFR. This scope furnishes range and azimuth information only. Since no altitude information is available to the controller, pilots must control their descent based on the glide angle desired, and the distance from the runway as furnished by the controller. Because ASR does not permit the same degree of accuracy as PAR, the weather minimums for a surveillance approach are usually higher than for a precision approach.

RADAR ARRIVAL AND DEPARTURE CONTROL - Radar is utilized by certain radar equipped facilities to control the flight paths of arriving or departing IFR aircraft for the purpose of expediting the flow of traffic. Aircraft operating on IFR flight plans will be afforded a minimum of three miles horizontal separation unless standard non-radar vertical, lateral or longitudinal separation exists. This should not be confused with Ground Controlled Approach (GCA) which is an instrument approach aid.

CAA RADAR UNITS - Operate continuously at the locations listed. Available to all pilots, civil and military. Contact associated CAA control tower on any frequency guarded for initial instructions, or in an amergency any CAA facility for information on nearest Radar Control. Weather minimums, associated runways and GCA procedures are listed in the Airman's Guide.

RAPCON - At certain locations, the surveillance portion of Military RAPCONS is operated by the CAA and service is available to all aircraft. These are listed below.

AIR FORCE AND NAVY GCA UNITS - Available to civil pilots in emergency or by prior arrangement with C.O. of respective facility.
Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call the nearest air traffic control facility (radio, airways, or tower, etc.) requesting GCA and further instructions.
Contact under VFR: VFR check-out of training flights should be arranged locally through Base Operations or the Control Tower.
Emergency: When receiver or transmitter difficulties exist, the tower may relay GCA approach instructions to the pilot, or the GCA operator may transmit, in blind, instructions for aircraft to make 360 degree turns for identification. In either case, instructions will be followed at the pilot's discretion. After being inoperative, GCA units require 20 to 30 minutes for warming up. Pilots shoud anticipate requirements for GCA in flight planning and request alerting of GCA units as far in advance as possible Civil Minimums at military installations established by the CAA are 400' ceiling and 1 statute mile visibility except in emergency unless Air Force or Navy facility being used has higher minimums. Navy units are prepared to transmit on HF from 2,000 to 18,000 kc and receive any frequency from 1,500 to 9,050 kc to aid any plane in emergency.

RADAR FLIGHT ADVISORY SERVICE: This service to aircraft encountering severe weather conditions may be obtained by requesting radar advisory through an appropriate ground station or direct ARTC communication. ARTC will determine if service can be provided and will request pilot to change to appropriate frequency for direct communication with radar. Radar station will be identified by "THIS IS AIR FORCE RADAR ADVISORY". All suggested vectors to circumnavigate storm areas will be of advisory nature and do not relieve pilot of responsibility for safety of aircraft. If advisory service cannot be furnished for any reason, the procedure word "UNABLE" will be used. This will terminate radar advisory service to the aircraft without further explanation. This service will be available in the following ARTC Flight Advisory Areas; Chicago, St. Louis, Minneapolis, Kansas City, Albuquerque, San Antonio, Ft. Worth, Oakland, Denver, Great Falls, Los Angeles, and the area immediately around Knoxville, Tenn.

CAA OPERATED RADAR UNITS

NOTE: Transmitting frequencies below 118 mc. are not guarded. Other transmitting frequencies listed are guarded plus 122.5 mc. and 3023.5 kc. Transmit and guard 121.5 mc. all locations.

NOTICES TO AIRMEN

SPECIAL NOTICES

✓ Indicates New or Revised Special Notices

The Airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting, or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a Notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the Office of Aviation Information, Attention: W-52, CAA, Washington 25, D. C.)

Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate CAA Regional Office for coordination before they are included in the Airman's Guide.

ATC IFR CLEARANCE PHRASEOLOGY: Effective November 15, 1955, ATC facilities will resume general use of the phrase "VIA FLIGHT PLANNED ROUTE" in air traffic clearances to replace the lengthier detailed description of any portion of the route of flight that is identical to the route filed by the pilot. When used, the phrase will be preceded by sufficient detailed route of flight information to establish the flight on the filed route. The "VIA FLIGHT PLANNED ROUTE" phraseology does not include approval of altitudes filed in the flight plan. Specific altitudes assignments will be issued in each clearance. IFR flight plans filed by the pilots should contain the complete route of flight and should be relayed to air traffic control unchanged. Pilots may request route verification when considered necessary and are requested to do so whenever a filed route has been changed prior to departure. If route verification is desired prior to departure, the request should be included with the initial call for taxi clearance to avoid delay in receiving the information.

VHF INSACS-TO-PRIVATE AIRCRAFT CHANNELS: The national VHF channel for transmission from INSACS-to-private aircraft 122.2 mc was partially implemented beginning August 1, 1951. (The companion aircraft-to-INSACS frequency is 122.1 mc). Eventually all INSACS will transmit on 122.2 mc but in the meantime VHF reply to private aircraft will be furnished on the VHF range voice channel at INSACS which have not yet commissioned 122.2 mc. Pilots should consult the Airman's Guide and current Notams for information on frequencies available at specific stations. The frequency upon which the pilot expects reply should be specified in the initial call.

When an INSACS is unable to reply on the VHF range voice channel because of equipment failure or maintenance shut down, reply will be made on 121.5 mc. A small number of INSACS have not yet installed transmitting service on 121.5 mc. At these locations, the reply on 121.5 mc will be made by an adjacent control tower. Therefore, when a pilot calling such station has reason to believe that the VHF range voice channel is not operating, he should request reply on 121.5 mc.

USE OF OMNIRANGE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. The accuracy of course alignment of the omnirange over 360° azimuth is excellent when compared to that of the L/MF range, being generally within two degrees (plus or minus). On certain stations, some sectors may contain slightly larger errors, but no course published as usable in the Airman's Guide will be displaced more than 3-1/2 degrees from its theoretical location. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, infrequent brief flag alarm activity, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert of these apparent vagaries.

AUTOMATIC VOICE IDENTIFICATION: Voice identification has been added to numerous air navigational facilities (omnirange stations and outer compass locators).

Omniranges and outer compass locators where voice identification is functioning are designated in the ANRA pages by an asterisk (*) in the "class identification" column. The transmission consists of a voice announcement alternating with the usual Morse Code identification: e.g. Long Beach omnirange (voice) .—..- -.-.. (LGB in Code).

For omniranges, as shown above, normal voice identification consists of the name of the omni followed by the word "omni". However, if the omni is unattended, i.e., if no facility for providing air-ground communications services is associated with the omni, the word "unattended" will precede the word "omni". Example: AIRVILLE UNATTENDED OMNI.

TRANSMISSION OF "V" BY VAR RANGES: The letter "V" is transmitted by all VAR ranges. It precedes the usual location identifier and is separated from it by a short space. It is intended to enable pilots to distinguish instantly between the aural directional signals of VAR ranges, and those of low or medium frequency ranges, ILS and VORs located in the same general area. It will, for example, guard against the possibility of an error occuring through accidental connection of a pilot's headset to the wrong receiver. The "V" is transmitted at an appreciable higher rate of speed than the location identifier.

CIVIL USE OF MILITARY FIELDS: U. S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission.

In the case of Air Force Bases, pilots must have on file with Headquarters USAF a "HOLD HARMLESS" AF form 180 and in their possession a properly signed and executed AF form 181 permit. Application for these forms may be made to: Assistant Chief of Staff, Installations, HQ, USAF, Washington 25, D. C. This regulation will be strictly enforced.

For Naval Installations, prior permission should be requested from the Chief of Naval Operations (OP 532) via the Commanding Officer of the field concerned, (who has the authority to approve landing rights for certain categories of civil aircraft). However, with minor exceptions, authority to use Navy fields is granted only to aircraft on government business, or when no suitable civil airport is available in the vicinity.

When instrument approaches are conducted by civil aircraft at military airports, they shall be conducted in accordance with the procedures and minimums approved by the military agency having jurisdiction over the airport.

WARNING OF MAINTENANCE AT CAA NAVAIDS: During periods of routine or emergency maintenance, the coded identification (or code and voice, where applicable) will be removed from certain CAA Navaids, namely, ILS localizers, VHF ranges (VOR, TVOR and VAR) and L/MF ranges but not from "H" facilities, compass locators or 75 mc marker beacons. The removal of identification serves as a warning to pilots that the facility has been officially taken over by "Maintenance" for tune-up or repair and may be unreliable even though on the air intermittently or constantly.

NAUTICAL MILE AND STATUTE MILE ABBREVIATIONS: In the Airman's Guide, "n miles" or "n mi" stands for nautical miles; "s miles" or "s mi" for statute miles.

DVFR FLIGHT PLANS: When an IFR flight plan is cancelled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

FLIGHT PLANS: Pilots are urged to file VFR flight plans in person or by telephone prior to departure. Radio should be used for filing flight plans only when it is impossible to file in person or by telephone. This procedure is necessary in order to avoid congestion on the already busy air-ground communications channels. These channels should be reserved for essential in-flight communications. All pilots will benefit by following this practice.

RUNWAY VISUAL RANGE REPORTS AT NEWARK, N. J.: Effective March 3, 1956, measurements of runway visibility for Runway 4 at Newark, New Jersey, will be in terms of Runway Visual Range which is the distance high intensity runway lights can be seen by an observer located at the runway threshold viewing the lights in the same direction as a pilot making an approach.

The ILS and FAR instrument approach procedures for Newark will be amended to authorize 2600' of runway visual range as an additional operating minimum for straight-in approaches to Runway 4. When measurements of Runway Visual Range are being taken, the tower will give pilots intending to land straight-in on runway 4, the reported Runway Visual Range. When the meteorological ceiling and visibility (contained in "main body" of sequence report which is the average weather for the airport proper) are reported below minimums, (e.g. 200.5), an approach may be conducted to Runway 4 provided Runway Visual Range is reported at or above 2600'. The "remarks" portion of the hourly weather sequence for Newark will report Runway Visual Range in hundreds of feet, and runway visibility will no longer be reported in miles and fractions.

Since Runway Visual Range recognizes the additional penetration provided by high intensity runway lights and is measured in terms of what a pilot actually sees, pilots will have better assurance of finding runway conditions substantially as reported when arriving over the threshold.

The Runway Visual Range minimum of 2600' is also based on the penetration ability of the approach lighting system installed at Newark which is designed to assure earlier transition from instrument to visual flight.

RADIO CALL-UP PROCEDURES - ARTC CENTERS: Effective February 1, 1956, aircraft on IFR flight plans making position reports direct to ARTC centers shall, in the initial call-up include the fix or geographical location over which the aircraft is reporting. Examples: "Indianapolis Center, this is TWA 55, Maxwell, over."; "Indianapolis Center, this is Beechcraft 1234, 20 south of Maxwell, over."

Pilots are reminded, however, that direct communication with the center shall NOT be established until the pilot is specifically requested to do so.

UNACCEPTABLE RADIO MESSAGES: CAA facilities will no longer accept non-safety messages (requests for ground transportion, meals, telephone calls, etc.) from pilots of aircraft in flight. Arrangements should be made by a pilot prior to departure via public communications (telephone, telegraph, etc.) for such requirements. Pilots are also reminded that transmission of such messages violates the terms of their aircraft radio license as provided in Part 9 of the FCC Regulations.

CLASSIFICATION OF ILS BACK COURSES: ILS back courses have in the past been classified as either "usable" or "unusable". It now appears that further classification of the "unusable" courses are necessary, since some back courses formerly classified as "unusable" actually may be satisfactory for intersections, holding, transitions or missed approaches, even though they are not satisfactory for back course approaches.

ILS back courses will in the future be classified as follows:

Usable - suitable for ILS back course approaches

Restricted - not suitable for ILS back course approaches, but suitable for intersections, holding, transitions or missed approaches

Unusable - not suitable for any of the above.

SPURIOUS GLIDE SLOPE INDICATIONS: CAA glide slope facilities are intended to provide reliable glide slope signals for use in conjunction with the front course of the ILS localizer. Glide slope signals may be received in other azimuths (because of stray radiation from the antennas and reflections from nearby objects) which may in some cases be sufficient to activate the airborne warning flag. Any glide slope needle activity in these other azimuths should be disregarded.

All pilots are particularly cautioned to ignore glide slope indications when making back course localizer approaches. All CAA approved procedures for back course approaches are limited to use of the localizer portion of the ILS. Any attempt to fly spurious glide slope indications on such back course approaches could result in hazardous operations.

GLIDE SLOPE FLARE: Modification of null reference glide slope facilities will result in glide slope flare at about thirty (30) feet above runway. Caution advised on automatic approaches continued past runway threshold.

✓ LOCATION IDENTIFIERS: The following changes affect the use of the location identifiers:

MDW - Chicago, Illinois, Chicago Midway Airport

✓ FLIGHT INFORMATION MANUAL CORRECTIONS: Correct Flight Information Manual, Volume 9, dated June 15, 1955 as follows:

(1) Page 22 - Birmingham, Ala. Correct CAA telephone number to read: WOrth 1-6151.

(2) Page 22 - Washington, D. C. (National Arpt). Correct WB telephone number to read: NAtional 8-0491.

(3) Page 23 - Marianna, Fla. - Correct CAA telephone to read: HUdson 2-3363.

(4) Page 26 - Fort Worth, Tex. - Change listing to read: Fort Worth (Amon Carter Fld), Tex., WB telephone ATlas 4-2761; Fort Worth (Meacham Fld), Tex., CAA telephone Market 4-3463.

(5) Page 27 - Fort Worth, Tex. - Change listing under "General Safety" to read: Fort Worth (Amon Carter Fld.), Tex. telephone ATlas 4-2523; Fort Worth (Meacham Fld.), Tex. - telephone MArket 4-1184.

(6) Page 101 - Covington Ky. (Greater Cincinnati) Ground: correct to read: 043°; runway 27 E of intersection runways 27 and 22.

✓ AERONAUTICAL CHART CORRECTIONS: Correct the following Aeronautical Charts as indicated:

(1) On the Washington Sectional Chart, 43rd edition, dated January 12, 1956, change the frequency of the Atlantic City, N. J., low frequency radio range from 516 kc to 212 kc.

IFR COMPULSORY REPORTING POINTS: In the near future, a new symbol will be used on Coast and Geodetic Survey Radio Facility Charts to indicate those compulsory reporting points over which reports need not be made by aircraft operating above 15,200 feet. Approximately 200 of the existing compulsory reporting points will be converted to this class as the various charts are revised.

Compulsory reporting points for all aircraft, reagrdless of altitude, will continue to be depicted as a solid triangle. Subscribers to these charts will be furnished a new legend sheet prior to distribution of charts containing the new symbol.

FLIGHT IN RESTRICTED AREA: Pilots are responsible for obtaining an approval from the appropriate controlling agency prior to conducting flight in Restricted Areas, when governing restrictions are in effect. ATC is unable, because of communications workload and other factors, to obtain such approval for pilots. An ATC clearance should not be considered as authority to conduct flight in Restricted Areas EXCEPT where a control area overlays a Restricted Area as ATC has responsibility only within controlled airspace.

✓ AERONAUTICAL CHARTS OF THE U. S. COAST AND GEODETIC SURVEY

New editions of the charts listed below will be published in about one month making former prints obsolete for use in aviation. Orders for these particular charts should be kept to a minimum until new edition is printed.

Boise	Salt Lake City	WAC 404
Klamath Falls	San Francisco	WAC 405
Mt. Shasta	Los Angeles Local	WAC 470
Phoenix	San Diego Local	WAC 471
Sacramento	San Francisco Local	

NEW EDITIONS

A new edition or new chart for the charts listed below is now available for issue. Former prints should be destroyed or stamped "OBSOLETE FOR USE IN AVIATION."

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) - Month and day item was reported.

** - New or revised airport, caution area or miscellaneous data. Pilots should inscribe this information on charts and records.

★ - New or revised radio data. Pilots should inscribe this information on charts and records.

NOTE - Such items usually are cited only once, because of space limitations. Examples: erection or removal of radio or television towers, water tanks, oil derricks and permanent airport obstructions.

ALABAMA ★ANNISTON-RADIO: VOR courses 360°-070° not usable acct course bends and roughness. Apr 16, trans 255.4 mc cmsnd. Rcvd too late for ANRA pages.

BIRMINGHAM-RADIO: VOR operg on test-basis. (12-19)

BIRMINGHAM ARPT: Caution-traffic operg in area from 165° clockwise thru 235° not visible from twr to dist of 4 s mi. Rnwy 8-26 perm closed to high performance single engine conventional lndg gear type acft, including T-6. (4-8)

CLANTON-GRAGG ARPT: Closed - const. (3-21)

DOTHAN-NAPIER FLD: Caution - helicopters from Rucker Army Air Base trng.

★EVERGREEN-RADIO: Apr 15, trans 255.4 mc cmsnd. Rcvd too late for ANRA pages.

GUNTERSVILLE ARPT: Closed. (3-26)

HUNTSVILLE-RADIO: VOR radials 005°-030° unusable due to roughness and bends. (5-11)

HUNTSVILLE MUN ARPT: Caution - rnwy 18-36 under const.

**MONTGOMERY-DANNELLY FLD: Taxiway from rnwy 15 to E/W taxi strip perm clsd. Dips in E/W rnwy 1500' from E end. Lgtd ditch approx 200' NE of apch end rnwy 21. Acft landing and taking off are cautioned to avoid Maxwell AFB tfc pat. and control zone. Due to non-visibility twr unable to ctl tfc on E/W parallel taxi strip W of a point adj to Air National Guard hangar. Rnwy 15-33 open lgt acft xcpt first 500' from NW end unusable - holes. (3-16)

MUSCLE SHOALS-RADIO: VOR courses 020°-050°, 110°-150° and 285°-335° clockwise from stn not usable beyond 15 n mi acct scalloping and bends. (4-22)

**SELMA-SELFIELD ARPT: 213'(341'MSL) lgtd twr erect 4.2n mi W(262°T) lat 32-26, long 87-02.

★TUSCALOOSA-RADIO: Apr 16, trans 255.4 mc cmsnd. Rcvd too late for ANRA pages.

TUSCALOOSA-VAN DE GRAAFF ARPT: Tow car pulling glider intermittently on rnwy daylgt hrs durg VFR.

ARIZONA: SPECIAL NOTICE: Until July 24, 1956, captive balloons will be flown nightly from one hr after sunset to one hr before sunrise at lctns 10 mi W Gila Bend AF Aux, 2 mi S Sentinel and 3 mi E Dateland, Ariz. Surface to 1500' and lgtd by one red lgt. Extreme caution when flying at low alts near these lctns. (12-27)

AJO ARPT: Beacon and lights inoperative. (4-3)

COCHISE-RADIO: DME coverage 15°-35°, 35 n mi at 12,000'; 210°-245°, 35 n mi at 11,000'. March 12, VOR shut down - modernization. (3-12) When opern is resumed, freq of VOR will be changed from 112.1 to 117.7 mc. (3-9)

DATELAND: Captive balloons anchored on 1500' cables will be flown 1700M Mondays thru 2400M Thursdays at Dateland and Gila Bend Aux AFB, Ariz., for approx 6 weeks. Extreme caution advised-low altitudes near these lctns. (3-12)

GILA BEND-RADIO: VOR has slow bends and scalloping starting at approx 25 to 30 n mi on 247° radial and at 30 to 35 n mi on 106° radial.

HASSAYAMPA-RADIO: VOR/DME usable to 30 n mi from 30° - 70°, 240°-255°, 320°-345° and 40 n mi from 70°-85° at MEA. (3-30)

**KINGMAN: Effective April 17, 1956 Caution Area C-417 rescinded.

PHOENIX-RADIO: LFR has severe interference during hrs of darkness. About May 1 VOR / DME will be shut down until approx June 1 - modernization. (3-30)

PHOENIX-LUKE AFB-RADIO: USAF VHF DF unreliable below 13,000' beyond 30 n mi in WNW quad. (2-2)

PHOENIX-SKY HARBOR ARPT: Clsd to mil F-89 type acft or acft rqrg use of after burners for take-off, xcpt prior permission arpt manager. (4-11)

PRESCOTT-RADIO: VOR coverage 185°-225°, 35 n mi at 10,000'; 135°-145° and 165°-185°, 39 n mi at 10,000'.

SALOME, SITE # 27B, LAX-PHX: Clsd. (12-14)

SCOTTSDALE-THUNDERBIRD#2ARPT: Closed. (3-26)

TUCSON-RADIO: About May 1, VOR/DME will be shut down until approx June 1. (4-6)

TUCSON-DAVIS MONTHAN AFB-RADIO: USAF VHF and UHF - steers unrel beyond 35 mi at or below the following alt: (a) NW quad 10,000'; (b) SW quad 10,000'; (c) SE quad 12,000'; (d) NE quad 13,000'.

YUMA-RADIO: Mar 12 VOR shut down until approx May 12. (3-13)

YUMA-COUNTY ARPT: B-45 type acft towing 5000' of cable and tow target in vcnty. All acft refrain from flying in close proximity to B-45 type acft in Yuma area.

ARKANSAS: EL DORADO-RADIO: DME 2000'MSL coverage 43.5 mi 325° thru N to 225°; 2000' MSL coverage 35 mi 225° thru W to 325°. (3-30)

★FAYETTEVILLE-RADIO: About May 7, VOR will be shut down approx June 4 - modernization. Apr 16, trans 255.4 mc cmsnd. Rcvd too late for ANRA pages.

FT. SMITH-RADIO: ILS lclzr, glide slope, MM and LMM operg on test-basis. (3-13)

**FT. SMITH-ARPT: 178 lgtd twr erected 2.1 n mi W(281°T), lat 35-20-37, long 94-25-23.

(17 Apr 1956)

[redacted]: FT. SMITH ARPT: 136' lgtd drilling derrick erected 0.5 mi W and 1.0 mi S of E/W rnwy.

HARRISON ARPT: New NW/SE rnwy under const. (2-14)

HAZEN ARPT: Caution - E/W rnwy clsd. Men and equip. on fld. (11-21)

NORTH LITTLE ROCK-CENTRAL ARPT: Fld closed to all operns-const. (3-1)

TEXARKANA-RADIO: VOR 143° radial to rnwy 13 beyond tolerance due to roughness and bends.

★WALNUT RIDGE-RADIO: VOR radials 290°-320°, 120°-150° and 200°-210° unusable acct bends and course rough. Trans 255.4mc cmsnd.(4-16)Rcvd too late for ANRA pages.

[redacted]: SPECIAL NOTICE: Until May 2, Navy blimp will oper intermittently in vcnty of Wilmington and Dominguez, Calif from surface upward in connection with Los Angeles air pollution control. Flgts will originate at Santa Ana Lighter Than Air Base, will cross at Newport Beach and proceed seaward to Wilmington for opern in both areas. Return flgt will be reverse of outbound flgt. Operns will be conducted in conditions down to 500' ceiling and 1/2 mi visibility.

ARCATA ARPT: Experimental testing of rotating lgts in inner apch zone of rnwy 31 at infrequent times. Rotating lgts at 2100' and 1000' S of threshold of rnwy with six high intensity lgts rotating at 6 or 12 rpm.

AUBURN ARPT: Clsd to hvy acft. Lgt acft use extreme caution acct soft rnwys. (11-24)

BAKERSFIELD-RADIO: Mar 2, VOR shut down until approx May 2 - modernization. (3-9)

**BAKERSFIELD AIRPARK: 130' lgtd derrick erected 1130' NE N/S rnwy. (2-28)

BAKERSFIELD-KERN COUNTY ARPT-TOWER: Effect. April 29, hours of opers will be 0500-2100. (4-10)

BLUE CANYON, #13, SFO-SLC: Closed durg winter months. (12-21)

BLYTHE-RADIO: DME coverage 165°-188°, 39 n mi at 7000'; 189°-200°, 26 n mi at 6000'; 200°-220°, 39 n mi at 6000'; 220°-293°, 43 n mi at 9000'; 293°-310°, 26 n mi at 9000'; 310°-327°, 35 n mi at 9000'.

**BRAWLEY MUN ARPT: Unlgtd 55 ft. TV ant. erected approx 50 ft. in line with and from the end of SE rnwy. (10-18)

CAMARILLO-RADIO: All courses have multiples. (6-17)

**COLUMBIA ARPT: Formerly carried as Sonora, Columbia Arpt. (3-6)

CRESCENT CITY-RADIO: VOR arwy radials flgt-checked. Courses 90°-330° usable dist 22 n mi; 350°-90°, 26 n mi at 7000'; 43 n mi at 8000'.

DAGGETT-RADIO: VOR flgt-checked on arwy radials only.

**EUREKA ARPT: 155' lgtd rdo twrs erected 3.2 n mi NE(31°T) at lat 40-51-12, long. 124-05-00. (3-22)

FAIRFEILD-TRAVIS AFB-RADIO: USAF VHF/DF bearings and communications in NW quad unreliable below 8500'. Opers 0700-1600 Mon-Fri training status only. (7-5)

FILLMORE RADIO: VOR coverage 320°-355°, 35 n mi at 11,000'; 280°-320°, 26 n mi at 11,000'. (9-17)

FT. JONES-RADIO: VOR has lgt course roughness all quads. Only arwy radials flgt-checked.

FORTUNA-RADIO: VOR has light to moderate scalloping beyond 26 n mi. Only arwy radials flgt-checked. (10-6) DME coverage 335°-350°, 43 n mi at 3000'; 350°-10°, 43 n mi at 8000'; 10°-30°, 43 n mi at 9000'; 30°-120°, 35 n mi at 9000'; 120°-150°, 35 n mi at 6500'; 150°-335°, over water, not checked.

FRESNO AIR TERMINAL: Exercise extreme caution in vcnty, particularly when using VOR arwys. Jet acft climb. & descending in areas of extend. centerlines rnwys 29-11 & areas N & E of Arpt.

FULLERTON ARPT: Attended daylgt hrs only. (4-12)

FURNACE CREEK SITE 17 RIV-DLS: N 1200' of rnwy clsd to all operns-mrkd. Entire fld clsd to all hvy or multi-eng acft. S 4500' of rnwy open to lgt acft-caution. (4-3)

KLAMATH-McBETH ARPT: Closed. (1-3)

LONG BEACH-RADIO: DME coverage 43 n mi as follows: 280°-305°, 5000'; 305°-450° 7000'; 340°-040°, 12,000'; 040°-070°, 8000'; 070°-100°, 7000'; 100°-280°, 4000'. (6-16) ILS and LF rng during VFR conditions heavy simulated instrument apch traffic. (10-25)

**LONG BEACH ARPT: Several 230' MSL portable oil derricks NW, W and S of fld. (10-21) No fuel servicing avail. for civil acft 2400-0600. (11-1) N 800' apch end rnwy 16L perm clsd. (1-23)

LOS ANGELES-RADIO: VOR coverage 275°-315°, 30 n mi at min en route alt. Light to moderate scalloping below 3000' MSL. (6-4)

LOS ANGELES-AIR ROUTE TRAFFIC CONTROL CENTER: Center will activate high alt sector 0900 Mar 20. Sector will control all acft operg at specific alt at or above 25,000'. One thousand on top flgt will NOT be controlled by this sector. All military acft operg at [redacted] specific alts should contact the Los Angeles ARTC Center on 301.4 mc as soon as possible after departure from within the Los Angeles Control area or after entering the area inbound. (3-12)

LOS ANGELES INTERNATIONAL ARPT: Use paved areas only. New lgtd rnwy 16-34 approx 4000' W of Sepulveda Blvd open VFR tfc only. Equip. on and adj to const areas. Pilots are urged to use extreme caution when operg off-shore just W of arpt. All jet acft departing rnwys 25L-25R climbing in VFR conditions use a 200° departure corridor which originates at a maximum of 3000' MSL approx the intersection of the extended centerlines of the above rnwys with the shoreline. Acft procedding E-bound from Malibu Intersection in VFR conditions making a track which approximates the extended centerlines of the above rnwys are CAUTIONED NOT TO DESCEND BELOW 4000' MSL until passing the shoreline or Del Rey FM unless cleared otherwise by ATC. Jet acft pat down-wind leg is 2500'. Acft not intending lndg at arpt should avoid apch areas to W and E below 3000' in VFR wea. Recommend cross tfc plan crossing course at 3000' or above, ceiling permitting, directly over arpt, or between LF rng and arpt. Avoid shoreline W due high performance of departing jet acft. Due non-visibility twr unable ctl tfc on last 2400' rnwy 34. (2-10)

LOS ANGELES-SAN FERNANDO VALLEY ARPT: Tfc direction indicator inop 2300-0700.

MODESTO-RADIO: Mar 20, VOR shutdown until approx May 20 - moderization. (3-20)

OAKLAND: Pilots proposing transbay flgt should ascertain that VFR wea exists within both the San Francisco and Oakland Control Zones, or should obtain ATC clearance for flgt within a ctl zone when wea is less than VFR, since ceiling and visibility mid bay is frequently less than at the two terminals. Tfc operg in VFR wea should avoid vcnty of Alameda NAS. Extensive tfc including jets operate in tfc pat up to 2000' within a radius of 1.7 n mi of the fld. Exercise extreme caution in these areas.

OAKLAND-RADIO: VOR coverage 35 n mi N thru E at min instr alt. (1-14) DME coverage 30°-60°, 26 n mi at 5000'; 60°-80°, 35 n mi at 5000'; 280°-290°, 35 n mi at 4000'; 340°-350°, 35 n mi at 6000'; 350°-030°, 17 n mi at 4000'.

OAKLAND INTERNATIONAL ARPT-TOWER: ASR will issue distance values in nautical miles in connection with radar control. Steers unreliable below 7,000' within 10 mi of stn. FLD: Dredging and clam shell equip. working S of lndg area. All booms and equip. lgtd and mrkd. Use extreme caution when flying over or within this area. (9-30)

OCEANSIDE-RADIO: VOR coverage 310°-020°, 35 n mi at min en route alt. (10-10)

**OCEANSIDE ARPT: 163' unlgtd rdo twr erected approx 1-1/2 mi SE. (4-3)

ONTARIO-RADIO: DME coverage 135°-150°, 26 n mi at 7000'; 150°-200°, 17 n mi at 7000'; 200°-280°, 35 n mi at 7000'; 330°-350°, 26 n mi at 13,000'; 350°-0°, 35 n mi at 13,000'. About May 1, VOR will be shut down until approx June 1. (2-8)

ONTARIO INTERNATIONAL ARPT: Hi-intensity rnwy lgts being installed rnwy 7-25. Use rnwy and taxiways. Open ditches either side rnwy. New taxiway S side and parallel rnwy 7-25 usable-caution make turns on or off this taxiway at intsxns only. Engine run-ups in take-off position rnwy 7-25 should not be made less than 200' from ends of rnwy as mrkd by yellow paint lines either side. (4-11)

OXNARD AFB- RADIO: USAF VHF/DF unreliable below 12,000' within 50 n mi. (4-20)

PALMDALE-RADIO: VOR coverage 120°-150°, 35 n mi at 10,000'; 150°-180°, 35 n mi at 9000'. (3-14)

PASO ROBLES-RADIO: DME coverage 220°-235°, 35 n mi at 6000'; 235°-245°, 26 n mi at 6000'; 245°-270°, 35 n mi at 6000'.

QUINCY-GANSNER FLD: E 700' E/W rnwy and taxi strip unusable. (1-3)

RED BLUFF-RADIO: DME coverage 180°-208°, 26 n mi at 9000'; 208°-217°, 26 n mi at 10,000'; 217°-235°, 35 n mi at 10,000'. About Apr 18 VOR will be shut down until approx June 1; freq will be changed to 115.7 mc (4-6) During shut-down, the current Victor arwys may be used as direct routes using Red Bluff LFR, provided acft are equipped with ADF. MEAs remain the same as currently estab on Vicotr Arwys. (4-13)

RIDGECREST-DAVIS ARPT: Lgts inop. (4-11)

RIVERSIDE-RADIO: USAF VOR unreliable. (6-20)

**ROSEMEAD-FLETCHER ARPT: Delete from records - private fld. (3-23)

SACRAMENTO-RADIO: Disregard spurious signals and interruptions in service of voice communication INSACS and twr until approx April 30 - modernization. (3-30)

SACRAMENTO ARPT-TOWER: Voice on ILS freq 110.3 mc out of service. (2-7) FLD: Twr tfc operg in SW quad should exercise caution acct extensive simulated inst apchs including jets VFR weather actual apchs IFR weather. (4-2)

SACRAMENTO-McCLELLAN AFB- RADIO: USAF H fac unreliable beyond 15 mi

CALIFORNIA: SALINAS-RADIO: VOR coverage 20°-95° and 135°-295°, 35 n mi at min instr alt. DME coverage 20°-44°, 26 n mi at 7000'; 44°-49°, 17 n mi at 7000'; 49°-90°, 26 n mi at 7000'; 90°-130°, 43 n mi at 7000'; 130°-145°, 26 n mi at 7000'; 145°-153°, 17 n mi at 7000'; 153°-180°, 26 n mi at 7000'; 180°-225°, 43 n mi at 7000'; 225°-300°, 43 n mi at 5000'; 300°-20°, 43 n mi at 7000'

SAN DIEGO-RADIO: VOR coverage 50 mi MEA all quads except 20 mi MEA from 310° to 330°. (10-25)

SAN DIEGO-LINDBERGH FIELD:, 500' W end rnwy 9-27 clsd - jet barrier. (2-29)

SAN FRANCISCO: See Oakland Control Zone Notam.

SAN FRANCISCO-RADIO: DME coverage 10°-30°, 17 n mi at 5000'; 30°-85°, 26 n mi at 7000'; 85°-100°, 35 n mi at 7000'; 160°-180°, 26 n mi at 5000'; 180°-225°, 17 n mi at 5000', 225°-265°, 26 n mi at 5000'; 345°-10°, 35 n mi at 4000'.

SAN FRANCISCO GAP-RADIO: Homing fac unreliable in area 25° thru E to 130°. (11-15)

SAN RAFAEL-HAMILTON AFB-RADIO: USAF VHF/DF unreliable 340°-135° clockwise below 11,000'.

SANTA BARBARA-RADIO: DME coverage 325°-30°, 26 n mi at 9000'; 30°-45°, 35 n mi at 9000'; 80°-95°, 35 n mi at 4000'; 110°-260°, not checked. Reception 3023.5 kc unreliable daylgt hrs. (2-2)

SANTA MONICA-RADIO: TVOR radials 030°, 075°, 210°, 260° and 323° usable. (1-20)

SANTA MONICA ARPT: Service avail. only between 0700 and 2100 daily. Extreme caution advised during ngt use of fld due to unlgtd open storm drain ditch 175' from S edge of main rnwy. An unlgtd unmrkd difference in elev variable to as much as 25' exists between the open storm drain ditch and taxiway. All taxiways unlgtd. (1-20)

THERMAL-RADIO: VOR and DME coverage 330° thru 360° to 060°, 20 n mi; 060°-085°, 40 n mi; 145°-175°, 40 n mi; 175° thru 180° to 250°, 20 n mi; 250°-280°, 40 n mi at min en route alt. (3-14)

UKIAH-RADIO: DME coverage 43 n mi; 305°-355° at 6500' MSL; 355°-60° at 9000'; 60°-100° at 7000'; 100-150° at 6000'. 105° thru S and W to 305° over water not checked.(10-11)

VICTORVILLE-GEORGE AFB-RADIO: USAF VHF/DF steers unreliable 235°-325° and 360° 045°, below 15,000'.

**YUCCA VALLEY-SKY CORRAL ARPT: Abandoned. (3-22)

COLORADO: COLORADO SPRINGS-PETERSON FLD: Bcn inop. Caution-lndg acft - due to rise in terrain at apch end rnwy 21. Const on ramp SE of twr. (3-28)

DENVER-STAPLETON FLD: Rnwy 8L-26R clsd to operns heavier than DC-3 acft xcpt when absolutely necessary for taxiing W of rnwy 3-21. Hvy air tfc N and E due to extensive instrument trng. Flashing amber lgt in segmented circle indicates rgt hand tfc. Two-way rdo rqrd capable of communicating with twr.

GRAND JUNCTION-RADIO: About April 27, ILS glide slope will be shut down until approx June 8. (2-29) About May 7, lclzr will be shut down until approx May 14. (3-23)

LONGMONT ARPT: NW/SE rnwy under const. (3-13)

PUEBLO: Ordnance depot approx 14.8 n mi E at lat 38-16-53, long. 104-18-00, conducting demolition work - days.

**PUEBLO ARPT #1: Delete entire listing from Directory of Airports - no longer exists.

CONNECTICUT:**BRISTOL ARPT: Abandoned. (3-26)

**ESSEX-DOANE ARPT: Abandoned. (3-26)

**GROTON-TRUMBULL ARPT: Unicom. (3-26)

**MERIDEN ARPT: Unicom. (3-26)

SIMSBURY ARPT: Experimental dropping of parachutes on fld during VFR wea. days Mon thru Fri. Fld occasionally clsd by standard marker.

WAREHOUSE POINT-SKYLARK ARPK: Caution - const N side. (3-26)

WILTON-RADIO: VOR has minor bends in SW quad out to 17 n mi. DME coverage 270°-285°, 35 n mi at 3000'; 320°-360°, 35 n mi at 3000'; 360°-015°, 35 n mi at 2500'.

DELAWARE:**GEORGETOWN-SUSSEX COUNTY ARPT: E/W rnwy perm closed. (3-22) Caution -NNE/SSW and NNW/SSE rnwys rough. Men and equip. on fld. Extensive glider activity weekends and evenings. (3-29)

DIST. OF COLUMBIA: WASHINGTON-SPECIAL NOTICES: (1) Caution - dynamiting daily, heavy charges, dam const along E bank Potomac River, 3/4 mi N of Key Bridge at Dalecaria, Md. (2)Thru 31 July 1956, special VFR operating rules effective in hi-density zone. Zone identical with Wash . control zone excluding Washington-Virginia Arpt and prohibited areas. Altitudes - surface to 3000' N of and 700' to 3000' S of Washington rng. Two-way rdo required. Prior to take-off within zone or entry for landing in zone, establish rdo communication with ATC tower of take-off or landing and maintain continuous listening watch with WNA control twr. Helicopters excepted, regardless of other VFR clearance, no VFR flight within zone when grnd visibility less than one mile, except when smoke, dust, snow, sand, then VFR flight permissible with one-half mi visibility. Do not exceed 180 mph (156 knots) unless operational characteristics require more, in which case use minimum speed consistent with safety.

WASHINGTON-RADIO: LF rng SE course bends 4 to 9 n mi from stn; 17 to 22 n mi from stn, multiples 3°- to 3.5° S.

WASHINGTON NATIONAL ARPT-AIR ROUTE TRAFFIC CONTROL CENTER: Radar service will be provided UHF equip. acft on 250.2 mc, 318.2 mc and 348.6 mc only in Washington Metropolitan Area.

WASHINGTON NATIONAL ARPT-TOWER: PAR and VHF/DF shut down. (3-29) FLD: USAF, NAVY, CG: Clsd to all acft xcpt: (a) Acft carrying VIP and officers ABOVE rank of Major General or Rear Admiral. MOSES LAKE-LARSON AFB-RADIO: USAF VHF/DF unreliable below 7000' NE quad; 5000' all other quads. (11-1)

MT. CATHERINE BCN SITE #4, SEA-HLN: Bcn inop. (2-16)

OLYMPIA-RADIO: VOR coverage 340°-45°, 43n mi at 4000'; 45°-135°, 43 n mi at 8000' 135°-155°, 43 n mi at 7000'; 155°-225°, 43 n mi at 5000'; 225°-275°, 17 n mi at 5000'; 275°-340°, 43 n mi at 8000'; 314° radial on Shelton usable for 26 n mi at 2000'. 143° radial on Portland, Oregon intsxn usable for 35 n mi at 5000'. (5-3)

OLYMPIA ARPT: Farming area adj to taxiways and rnwys thru fall. (5-14)

OTHELLO ARPT: Caution - unlgtd power line approx 50' high E end - unmrkd.

SEATTLE-RADIO: VOR radial 158°unusable for instr apch. (3-15)

SEATTLE AIR ROUTE TRAFFIC CONTROL CENTER-RADIO: Flight Advisory Information is based upon an increase in separation standards from 500 to 1000' between flgt levels of 12,500' and 29,000' in the Seattle Flight Information region. 500' vertical separation will be acceptable for flight levels of 12,500' and below, 2,000' vertical separation above 29,000'. (3-15)

SEATTLE-BOEING FLD: All daylgt VFR operns of lgt acft confined to strip E of main rnwy. Avoid flying over main rnwy or apchs thereto. Lgt gun signals issued on final apch. Tfc pat to the E at 1000'. All turns when taxiing off lgt plane strip made toward twr. Hvy acft make tfc pat. W of fld at 1500' - use main rnwys, taxi strips only. Due to non-visibility twr unable to ctl tfc W blast fence in front Boeing Flgt Center and parking apron #4.

SEATTLE-TACOMA INTERNATIONAL ARPT-TOWER: ASR will issue dist values in n mi in connection with radar control. (8-17) Glide slope point of touchdown 1314' N of apch end rnwy 34. Glide slope rough not approved for automatic apch. (3-15) FLD: Soft dirt along both sides and N end N 1000' rnwy 16-34. (3-15)

SPOKANE-RADIO: DME and VOR coverage 36°-152°, 43 n mi at 7000'; 152-224°, 43 n mi at 5000'; 224°-264°, 43 n mi at 6000'; 264°-36°, 43 n mi at 8000'. (6-17)

SPOKANE-CALKINS ARPT: Rnwys N/S and E/W closed. (8-30)

SPOKANE-FAIRCHILD AFB-RADIO: USAF VHF/DF unreliable below 9500' in all quads. Operg on trng status only. (3-31)

SPOKANE-FELTS FLD: Lgt acft use rectangular tfc pat. and mrkd area S of rnwy. Equip. on fld.

SPOKANE-GEIGER FLD-TOWER: UHF/DF coverage 110°-260°, 50 n mi at 5000'; 260°-280° unreliable; 280°-330°, 40 n mi at 9000'; 330°-110°, 50 n mi at 9000'. FLD: Perm crash barriers 40 inches high lctd 150' off ends rnwy 3-21 - caution. Rnwy 16-34 clsd-const.

**SPOKANE-LEMEN ARPT: Abandoned. (3-30)

TACOMA ARPT:Rnwys being repaired. Roller and other equip on fld and rnwys. Caution - Land according to wind tee between rnwys. (1-26)

WASHINGTON-DEER PARK ARPT: Effective April 8, E/W rnwys clsd on alternate Sundays - drag races. (4-9)

YAKIMA-RADIO: VOR flgt-checked for en route Victor Arwys use only at min instr alts, & on the 123°, 161°, 191°298°, 321° and 336° radials at min terrain clearance alts.

WEST VIRGINIA: **BECKLEY-RALEIGH CO MEM'L ARPT: Five 90' lgtd poles 1 mile E rnwy28.

WEST VIRGINIA: CHARLESTON-RADIO: VOR coverage 10°-58°, 26 n mi at 3000'; 270°-330°, 26 n mi at 2500'. Moderate roughness all azimuths. About May 7, VOR/DME will be shut down until approx June 8 - modernization. (3-26)

ELKINS-RADIO: LF rng has multiples and fades all courses. DME coverage 35°-95°, 43 n mi at 6000'; 95°-120°, 35 n mi at 6800'; 120°-165°, 26 n mi at 6800'; 165°-195°, 35 n mi at 6800'; 195°-220°, 43 n mi at 6800'; 220°-35°, 43 n mi at 5000'.

ELKINS MUNICIPAL ARPT: Rnwy lgts 4-22 inop.

✱HUNTINGTON-RADIO: April 16, trans 255.4 mc cmsnd. Rcvd too late for ANRA pages.

MARTINSBURG-RADIO: DME coverage 50°-95°, 35 n mi at 2500'; 95°-150°, 35 n mi at 2000'.

MARTINSBURG ARPT: Glider flying - peak activity expected on week-ends and holidays. Serv fac avail. 0800 until sunset. 28' hangar 500' E of centerline and 1100' from S end rnwy 35, lgtd. Factory bldg 40' high under const 1000' E of S end rnwy 35 in flood lgtd area.

MORGANTOWN-RADIO: LF rng has multiples and fades all courses.

PARKERSBURG-WOOD COUNTY ARPT: Caution - dip midway rnwy 16-34 covering full width of rnwy. (5-4)

WISCONSIN: CABLE-UNION ARPT: Closed. (1-14)

FOND DU LAC SKYPORT: Caution in snow. Rnwy sides soft wet seasons. (4-9)

LA CROSSE-RADIO: VOR radials 320° to 335° unreliable 20 to 30 n mi from stn. (11-3)

MADISON-TRUAX FLD: Caution crossing hwy lndg rnwys 22, 26, 31. E taxiway N of Admin Bldg perm clsd to all acft over 10,000 lbs. Sod unsafe. Apch lgts rnwy 36 inop.

MILWAUKEE-GENERAL MITCHELL FLD-TOWER: ASR will issue distance values in nautical miles in connection with radar ctl. FLD: Rnwy 7L-25R open daylgt hrs only. E taxi strip clsd to all tri-gear acft and jets. Obstn lgts on apch end rnwy 13 are obscured by trees.

**RICE LAKE-ARROWHEAD ARPT: 466' (1783' MSL) lgtd antenna erected 2.9 n mi NW (311°T) at lat 45-30-27, long. 91-46-28. (3-28)

WAUKESHA COUNTY ARPT: Rnwy lgts being moved from NE/SW rnwy to E/W. Do not land NE/SW rnwy. (11-3)

WOODRUFF-ARBOR-VITAE-RADIO: Privately owned MH fac shut down until May 1, 1956. (Except on req.) (11-9)

WOODRUFF-ARBOR VITAE ARPT: Clsd winter months. (11-9)

WYOMING: **BUFFALO ARPT: 173' (4780' MSL) lgtd steel guyed twr erected 2 n mi NW.

CASPER-RADIO: ILS glide slope has moderate to severe path roughness above 7300' and beyond 6 n mi. Not to be used for auto. pilot apchs. April 9, VOR shut down until approx May 9 - modernization. Freq will be changed to 116.2 mc.

CASPER-NATRONA COUNTY ARPT: Caution all acft entering tfc pat. occasional jet acft opern with pickup and dropping of tow targets. (4-9)

CHEYENNE ARPT-TOWER: About Apr 17, ILS glide slope and lclzr will be shut down. About Apr 24, glide slope freq will be changed to 333.8 mc, lclzr to 109.9 mc.

GILLETTE ARPT: 50-75' W shoulder 1500' from N end N/S strip soft - clsd to hvy acft.

JACKSON ARPT: E/W rnwy clsd - fence const across rnwy just W of N/S rnwy. Small acft may use E end of E/W in case of emerg, but at own risk. N/S rnwy clsd, const. Use new auxiliary 150' x 5400' strip E of N/S rnwy.

KEMMERER ARPT: Entire fld clsd all operns, xcpt graded 4000' S end N/S rnwy. Use extreme caution when wet. (11-6)

LARAMIE-RADIO: DME coverage 155°-225°, 35 n mi at 15,000'; 225°-300°, 26 n mi at 15,000'.

RIVERTON ARPT: Men and equip. on fld. 5000' W end rnwy 28 surfaced and available. Remainder arpt closed. (4-12)

ROCK RIVER-RADIO: DME coverage 360°-40°, 43 n mi at 11,000'; 40°-110°, 43 n mi at 11,300'; 110°-160°, 43 n mi at 11,000'; 160°-230°, 43 n mi at 15,000'; 230°-260°, 43 n mi at 12,000'.

ROCK SPRINGS-RADIO: ILS glide slope has light to moderate roughness between OM and LF rng.

ROCK SPRINGS ARPT: Caution - first 500' NW end NW/SE rnwy clsd - marked.

SHERIDAN-RADIO: VOR coverage lmtd to approx 35 n mi between 150° and 280°. Moderate course roughness exists in mountainous area.

TORRINGTON ARPT: Oil well pumps and storage tanks edge all rnwys. Men and equip. on fld. Use extreme caution.

PUERTO RICO: ✱SAN JUAN-PUERTO RICO INTERNATIONAL ARPT-TOWER: Effect. Apr 1, trans and rcvr 126.18 mc discontd. FLD Parking circles 2, 3, 4 and 5 on N departure ramp not fully visible from twr. Caution.

LOW FREQUENCY RANGE PROCEDURES

If an LFR instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument approach procedure, unless an approach is conducted in accordance with a different procedure for such airport authorized by the Administrator of Civil Aeronautics. Initial approaches shall be made over specified routes. Minimum altitude (s) shall correspond with those established for en route operation in the particular area or as set forth below.

VHF OMNIRANGE (TVOR) PROCEDURES (DISTANCES ARE IN NAUTICAL MILES)

If a TVOR instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument approach procedure, unless an approach is conducted in accordance with a different procedure authorized by the Administrator of Civil Aeronautics for such airport. Initial approaches shall be made over specified routes. Minimum altitude (s) shall correspond with those established for en route operation in the particular area or as set forth below.

Refer to Form ACA-511.5 (GCA) (Willow Run) if detailed information on sector altitudes is desired.										

GROUND CONTROLLED APPROACH SYSTEM PROCEDURES (DISTANCES ARE IN NAUTICAL MILES)

If a GCA instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument procedure, unless an approach is conducted in accordance with a different procedure authorized by the Administrator of Civil Aeronautics for such airport. Initial approaches shall be made over specified routes. Minimum altitude (s) shall correspond with those established for en route operation in the particular area or as set forth below. Positive identification must be established with the radar controller. From initial contact with GCA to final authorized landing minimums the instructions of the radar controller are mandatory except when (A) visual contact is established on final approach at or before descent to the authorized landing minimums, or (B) at pilot's discretion if it appears desirable to discontinue the approach. Except when the radar controller may direct otherwise prior to final approach, a missed approach shall be executed as provided below when (A) communication on final approach is lost for more than 5 seconds during a PAR approach or, for more than 30 seconds during an ASR approach; (B) directed by radar controller; (C) visual contact is not established upon descent to authorized landing minimums; or (D) if landing is not accomplished.

VHF OMNIRANGE (VOR) PROCEDURES

(DISTANCES ARE IN STATUTE MILES)

If a VOR instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument approach procedure, unless an approach is conducted in accordance with a different procedure authorized by the Administrator of Civil Aeronautics for such airport. Initial approaches shall be made over specified routes. Minimum altitude (s) shall correspond with those established for en route operation in the particular area or as set forth below.

NOTICES TO AIRMEN

SPECIAL NOTICES

✓ Indicates New or Revised Special Notices

The Airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting, or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a Notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the Office of Aviation Information, Attention: W-52, CAA, Washington 25, D. C.)

Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate CAA Regional Office for coordination before they are included in the Airman's Guide.

ATC IFR CLEARANCE PHRASEOLOGY: Effective November 15, 1955, ATC facilities will resume general use of the phrase "VIA FLIGHT PLANNED ROUTE" in air traffic clearances to replace the lengthier detailed description of any portion of the route of flight that is identical to the route filed by the pilot. When used, the phrase will be preceded by sufficient detailed route of flight information to establish the flight on the filed route. The "VIA FLIGHT PLANNED ROUTE" phraseology does not include approval of altitudes filed in the flight plan. Specific altitudes assignments will be issued in each clearance. IFR flight plans filed by the pilots should contain the complete route of flight and should be relayed to air traffic control unchanged. Pilots may request route verification when considered necessary and are requested to do so whenever a filed route has been changed prior to departure. If route verification is desired prior to departure, the request should be included with the initial call for taxi clearance to avoid delay in receiving the information.

VHF INSACS-TO-PRIVATE AIRCRAFT CHANNELS: The national VHF channel for transmission from INSACS-to-private aircraft 122.2 mc was partially implemented beginning August 1, 1951. (The companion aircraft-to-INSACS frequency is 122.1 mc). Eventually all INSACS will transmit on 122.2 mc but in the meantime VHF reply to private aircraft will be furnished on the VHF range voice channel at INSACS which have not yet commissioned 122.2 mc. Pilots should consult the Airman's Guide and current Notams for information on frequencies available at specific stations. The frequency upon which the pilot expects reply should be specified in the initial call.

When an INSACS is unable to reply on the VHF range voice channel because of equipment failure or maintenance shut down, reply will be made on 121.5 mc. A small number of INSACS have not yet installed transmitting service on 121.5 mc. At these locations, the reply on 121.5 mc will be made by an adjacent control tower. Therefore, when a pilot calling such station has reason to believe that the VHF range voice channel is not operating, he should request reply on 121.5 mc.

USE OF OMNIRANGE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. The accuracy of course alignment of the omnirange over 360° azimuth is excellent when compared to that of the L/MF range, being generally within two degrees (plus or minus). On certain stations, some sectors may contain slightly larger errors, but no course published as usable in the Airman's Guide will be displaced more than 3-1/2 degrees from its theoretical location. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, infrequent brief flag alarm activity, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert of these apparent vagaries.

AUTOMATIC VOICE IDENTIFICATION: Voice identification has been added to numerous air navigational facilities (omnirange stations and outer compass locators).

Omniranges and outer compass locators where voice identification is functioning are designated in the ANRA pages by an asterisk (*) in the "class identification" column. The transmission consists of a voice announcement alternating with the usual Morse Code identification: e.g. Long Beach omnirange (voice) .—.. -.-. (LGB in Code).

For omniranges, as shown above, normal voice identification consists of the name of the omni followed by the word "omni". However, if the omni is unattended, i.e., if no facility for providing air-ground communications services is associated with the omni, the word "unattended" will precede the word "omni". Example: AIRVILLE UNATTENDED OMNI.

TRANSMISSION OF "V" BY VAR RANGES: The letter "V" is transmitted by all VAR ranges. It precedes the usual location identifier and is separated from it by a short space. It is intended to enable pilots to distinguish instantly between the aural directional signals of VAR ranges, and those of low or medium frequency ranges, ILS and VORs located in the same general area. It will, for example, guard against the possibility of an error occuring through accidental connection of a pilot's headset to the wrong receiver. The "V" is transmitted at an appreciable higher rate of speed than the location identifier.

CIVIL USE OF MILITARY FIELDS: U. S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission.

In the case of Air Force Bases, pilots must have on file with Headquarters USAF a "HOLD HARMLESS" AF form 180 and in their possession a properly signed and executed AF form 181 permit. Application for these forms may be made to: Assistant Chief of Staff, Installations, HQ, USAF, Washington 25, D. C. This regulation will be strictly enforced.

For Naval Installations, prior permission should be requested from the Chief of Naval Operations (OP 532) via the Commanding Officer of the field concerned, (who has the authority to approve landing rights for certain categories of civil aircraft). However, with minor exceptions, authority to use Navy fields is granted only to aircraft on government business, or when no suitable civil airport is available in the vicinity.

When instrument approaches are conducted by civil aircraft at military airports, they shall be conducted in accordance with the procedures and minimums approved by the military agency having jurisdiction over the airport.

WARNING OF MAINTENANCE AT CAA NAVAIDS: During periods of routine or emergency maintenance, the coded identification (or code and voice, where applicable) will be removed from certain CAA Navaids, namely, ILS localizers, VHF ranges (VOR, TVOR and VAR) and L/MF ranges but not from "H" facilities, compass locators or 75 mc marker beacons. The removal of identification serves as a warning to pilots that the facility has been officially taken over by "Maintenance" for tune-up or repair and may be unreliable even though on the air intermittently or constantly.

NAUTICAL MILE AND STATUTE MILE ABBREVIATIONS: In the Airman's Guide, "n miles" or "n mi" stands for nautical miles; "s miles" or "s mi" for statute miles.

DVFR FLIGHT PLANS: When an IFR flight plan is cancelled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

FLIGHT PLANS: Pilots are urged to file VFR flight plans in person or by telephone prior to departure. Radio should be used for filing flight plans only when it is impossible to file in person or by telephone. This procedure is necessary in order to avoid congestion on the already busy air-ground communications channels. These channels should be reserved for essential in-flight communications. All pilots will benefit by following this practice.

RUNWAY VISUAL RANGE REPORTS AT NEWARK, N. J.: Effective March 3, 1956, measurements of runway visibility for Runway 4 at Newark, New Jersey, will be in terms of Runway Visual Range which is the distance high intensity runway lights can be seen by an observer located at the runway threshold viewing the lights in the same direction as a pilot making an approach.

The ILS and PAR instrument approach procedures for Newark will be amended to authorize 2600' of runway visual range as an additional operating minimum for straight-in approaches to Runway 4. When measurements of Runway Visual Range are being taken, the tower will give pilots intending to land straight-in on runway 4, the reported Runway Visual Range. When the meteorological ceiling and visibility (contained in "main body" of sequence report which is the average weather for the airport proper) are reported below minimums, (e.g. 200.5), an approach may be conducted to Runway 4 provided Runway Visual Range is reported at or above 2600'. The "remarks" portion of the hourly weather sequence for Newark will report Runway Visual Range in hundreds of feet, and runway visibility will no longer be reported in miles and fractions.

Since Runway Visual Range recognizes the additional penetration provided by high intensity runway lights and is measured in terms of what a pilot actually sees, pilots will have better assurance of finding runway conditions substantially as reported when arriving over the threshold.

The Runway Visual Range minimum of 2600' is also based on the penetration ability of the approach lighting system installed at Newark which is designed to assure earlier transition from instrument to visual flight.

RADIO CALL-UP PROCEDURES - ARTC CENTERS: Effective February 1, 1956, aircraft on IFR flight plans making position reports direct to ARTC centers shall, in the initial call-up include the fix or geographical location over which the aircraft is reporting. Examples: "Indianapolis Center, this is TWA 55, Maxwell, over."; "Indianapolis Center, this is Beechcraft 1234, 20 south of Maxwell, over."

Pilots are reminded, however, that direct communication with the center shall NOT be established until the pilot is specifically requested to do so.

UNACCEPTABLE RADIO MESSAGES: CAA facilities will no longer accept non-safety messages (requests for ground transportion, meals, telephone calls, etc.) from pilots of aircraft in flight. Arrangements should be made by a pilot prior to departure via public communications (telephone, telegraph, etc.) for such requirements. Pilots are also reminded that transmission of such messages violates the terms of their aircraft radio license as provided in Part 9 of the FCC Regulations.

CLASSIFICATION OF ILS BACK COURSES: ILS back courses have in the past been classified as either "usable" or "unusable". It now appears that further classification of the "unusable" courses are necessary, since some back courses formerly classified as "unusable" actually may be satisfactory for intersections, holding, transitions or missed approaches, even though they are not satisfactory for back course approaches.

ILS back courses will in the future be classified as follows:

Usable - suitable for ILS back course approaches

Restricted - not suitable for ILS back course approaches, but suitable for intersections, holding, transitions or missed approaches

Unusable - not suitable for any of the above.

SPURIOUS GLIDE SLOPE INDICATIONS: CAA glide slope facilities are intended to provide reliable glide slope signals for use in conjunction with the front course of the ILS localizer. Glide slope signals may be received in other azimuths (because of stray radiation from the antennas and reflections from nearby objects) which may in some cases be sufficient to activate the airborne warning flag. Any glide slope needle activity in these other azimuths should be disregarded.

All pilots are particularly cautioned to ignore glide slope indications when making back course localizer approaches. All CAA approved procedures for back course approaches are limited to use of the localizer portion of the ILS. Any attempt to fly spurious glide slope indications on such back course approaches could result in hazardous operations.

GLIDE SLOPE FLARE: Modification of null reference glide slope facilities will result in glide slope flare at about thirty (30) feet above runway. Caution advised on automatic approaches continued past runway threshold.

IFR COMPULSORY REPORTING POINTS: In the near future, a new symbol will be used on Coast and Geodetic Survey Radio Facility Charts to indicate those compulsory reporting points over which reports need not be made by aircraft operating above 15,200 feet. Approximately 200 of the existing compulsory reporting points will be converted to this class as the various charts are revised.

Compulsory reporting points for all aircraft, reagrdless of altitude, will continue to be depicted as a solid triangle. Subscribers to these charts will be furnished a new legend sheet prior to distribution of charts containing the new symbol.

FLIGHT IN RESTRICTED AREA: Pilots are responsible for obtaining an approval from the appropriate controlling agency prior to conducting flight in Restricted Areas, when governing restrictions are in effect. ATC is unable, because of communications workload and other factors, to obtain such approval for pilots. An ATC clearance should not be considered as authority to conduct flight in Restricted Areas EXCEPT where a control area overlays a Restricted Area as ATC has responsibility only within controlled airspace.

RESTRICTED AREA AMENDMENTS: The following Restricted Area Amendments shall become effective as indicated:

(Part 608 - Restricted Areas - Amendment 161)

(May 25, 1956)

(1) In Section 608.41, the Albemarle Sound, N.C., area (R-1 formerly D-1), published on July 16, 1949 in 14 F.R. 4294, is amended by changing the "Controlling Agency" column to read: "COMAIRLANT, NAS Norfolk, Va."

(2) In Section 608.41, the Albemarle Sound, N.C., area (R-2 formerly D-2), published on July 16, 1949 in 14 F.R. 4294, is amended by changing the "Controlling Agency" column to read: "COMAIRLANT, NAS Norfolk, Va."

(3) In Section 608.41, the Albemarle Sound, N.C., area (R-3 formerly D-3), published on July 16, 1949 in 14 F.R. 4294, is amended by changing the "Controlling Agency" column to read: "COMAIRLANT, NAS Norfolk, Va."

(4) In Section 608.41, the Albemarle Sound, N.C., area (R-6 formerly D-6), published on July 16, 1949, in 14 F.R. 4294, is amended by changing the "Controlling Agency" column to read: "COMAIRLANT, NAS Norfolk, Va."

(5) In Section 608.41, the Albemarle Sound, N.C., area (R-7 formerly D-7), published on July 16, 1949 in 14 F.R. 4294, is amended by changing the "Controlling Agency" column to read: "COMAIRLANT, NAS Norfolk, Va."

(6) In Section 608.41, the Albemarle Sound, N.C., area (R-8 formerly D-8), published on July 16, 1949 in 14 F.R. 4294, is amended by changing the "Controlling Agency" column to read: "COMAIRLANT, NAS Norfolk, Va."

(7) In Section 608.41, the Albemarle Sound, N.C., area (R-9 formerly D-9), published on July 16, 1949 in 14 F.R. 4294, is amended by changing the "Controlling Agency" column to read: "COMAIRLANT, NAS Norfolk, Va."

(8) In Section 608.17, the Milford, Del., area (R-12 formerly D-12), amended on April 26, 1952 in 17 F.R. 3724, is further amended by changing the "Controlling Agency" column to read: "COMNAB FOUR, NAS Atlantic City, N.J."

(9) In Section 608.29, the Woods Hole, Mass., area (R-13 formerly D-13), amended on January 16, 1953 in 18 F.R. 350, is further amended by changing the "Controlling Agency" column to read: "COMFAIR QUONSET, NAS Quonset Point, R. I."

(10) In Section 608.29, the No Man's Land Island, Mass., area (R-18 formerly D-18), amended on January 16, 1953 in 18 F.R. 350, is further amended by changing the "Controlling Agency" column to read: "COMFAIR QUONSET, NAS Quonset Point, R.I."

(11) In Section 608.38, the Warren Grove, N.J., area (R-26 formerly D-26), amended on May 4, 1955 in 20 F.R. 2975, is further amended by changing the "Controlling Agency" column to read: "COMNAB FOUR, NAS Atlantic City, N.J."

(12) In Section 608.38, the New Gretna, N.J., area (R-27 formerly D-27), amended on May 4, 1955 in 20 F.R. 2975, is further amended by changing the "Controlling Agency" column to read: "COMNAB FOUR, NAS Atlantic City, N.J."

(13) In Section 608.38, the Brigantine, N.J., area (R-28 formerly D-28), amended on May 4, 1955 in 20 F.R. 2975, is further amended by changing the "Controlling Agency" column to read: "COMNAB FOUR, NAS Atlantic City, N.J."

(14) In Section 608.41, the Currituck Sound, N.C., area (R-31 formerly D-31), published on April 21, 1949 in 14 F.R. 1918, is amended by changing the "Controlling Agency" column to read: "COMAIRLANT, NAS Norfolk, Va."

(15) In Section 608.41, the Currituck Sound, N.C., area (R-32 formerly D-32), published on April 21, 1949 in 14 F.R. 1918, is amended by changing the "Controlling Agency" column to read: "COMAIRLANT, NAS Norfolk, Va."

(16) In Section 608.41, the Currituck Sound, N.C., area (R-33 formerly D-33), published on April 21, 1949 in 14 F.R. 1918, is amended by changing the "Controlling Agency" column to read: "COMAIRLANT, NAS Norfolk, Va."

(17) In Section 608.41, the Currituck Sound, N.C., area (R-34 formerly D-34), amended

on August 11, 1954 in 19 F.R. 5041, is further amended by changing the "Controlling Agency" column to read: "COMAIRLANT, NAS Norfolk, Va."

(18) In Section 608.54, the Camp Pickett, Va., area (R-44) amended on April 4, 1956, in 21 F.R. 2141, is further amended by changing the "Controlling Agency" column to read: "COMPHIBLANT, NAB Little Creek, Norfolk, Va."

(19) In Section 608.37, the New Boston, N.H., area (R-48 formerly D-48), amended on January 16, 1953 in 18 F.R. 350, is further amended by changing the "Controlling Agency" column to read: "COMFAIR QUONSET, NAS Quonset Point, R.I."

(20) In Section 608.54, the Pendleton, Va., area (R-74 formerly D-74), amended on May 19, 1953 in 18 F.R. 2877, is further amended by changing the "Controlling Agency" column to read: "COMFLETRAGRU CHESBAY, NOB Norfolk, Va CO FADTC, Dam Neck, Va."

(21) In Section 608.29, the Cuttyhunk, Mass., area (R-75 formerly D-75), amended on January 16, 1953 in 18 F.R. 350, is further amended by changing the "Controlling Agency" column to read: "COMFAIR QUONSET, NAS Quonset Point, R.I."

(22) In Section 608.29, the Cotuit, Mass., area (R-79 formerly D-79), amended on January 16, 1953 in 18 F.R. 350, is further amended by changing the "Controlling Agency" column to read: "COMFAIR QUONSET, NAS Quonset Point, R.I."

(23) In Section 608.41, the Center Hill, N.C., area (R-89 formerly D-89), published on January 24, 1952 in 17 F.R. 715, is amended by changing the "Controlling Agency" column to read: COMAIRLANT, NAS Norfolk, Va."

(24) In Section 608,47, the Block Island Sound, R. I., area (R-90 formerly D-90), amended on January 16, 1953 in 18 F.R. 350, is further amended by changing the "Controlling Agency" column to read: "COMFLETRAGRU NARRABAY, Newport, R.I."

(25) In Section 608.37, the Isle of Shoals, N.H., area (R-96 formerly D-96), amended on January 16, 1953 in 18 F.R. 350, is further amended by changing the "Controlling Agency" column to read: "COMFAIR QUONSET, NAS Quonset Point, R.I."

(26) In Section 608.41, the Long Shoal Point, N.C., area (R-128 formerly D-128), amended on November 10, 1953 in 18 F.R. 7056, is further amended by changing the "Controlling Agency" column to read: "COMAIRLANT, NAS Norfolk, Va."

(27) In Section 608.18, the Lake George, Fla., area (R-176), amended on April 9, 1955 in 20 F.R. 2301, is further amended by changing the "Controlling Agency" column to read: "COMFAIR JACKSONVILLE, NAS Jacksonville, Fla."

(28) In Section 608.54, the Chesapeake Bay, Va., area (R-388 formerly D-388), published on October 31, 1951 in 16 F.R. 11066, is amended by changing the "Controlling Agency" column to read: "COMFLETRAGRU CHESBAY, NOB Norfolk, Va."

(29) In Section 608.51, the Fort Hood, Tex., area (R-219 formerly D-219), amended on November 10, 1954 in 19 F.R. 7285, is further amended by changing the "Designated Altitudes" column to read: "Surface to 27,000 feet MSL."

(30) In Section 608.51, the Del Rio, Tex., area (R-425 formerly D-425), amended on January 16, 1953 in 18 F.R. 350, is rescinded.

(31) In Section 608.51, the Laughlin AFB, Tex., area (R-427 formerly D-427), amended on January 16, 1953 in 18 F.R. 350, is rescinded.

(Part 608 - Restricted Areas - Amendment 162)
(May 31, 1956)

(1) In Section 608.48, a MCAAS Beaufort, S. C., area (R-499), is added to read: "Description by Geographical Coordinates: Within a 3 nautical mi radius of a point at lat 32-31-50, long. 80-09-50; excluding revised Warning Area W-132. NOTE: To be used only durg VFR weather conditions. Designated Altitudes: Surface to unlimited. Time of Designation: Daylight hours only. Controlling Agency: MCAAS, Beaufort, S. C."

✓ LOCATION IDENTIFIERS: The following changes affect the use of the location identifiers:

BRT	-	Britton, Texas, VOR (Assignment)
CDT	-	Clarendon, Texas REP (Airport reference deleted)
PIH	-	Pocatello, Idaho, Pocatello Airport (Name change)
SBN	-	South Bend, Indiana, St. Joseph Co. Airport (Name change)
DS	-	Cedars, Quebec (Assignment)
HV	-	Hagersville, Ontario (Assignment)
LU	-	St. Agathe, Manitoba (Assignment)
MQ	-	St. Marie, Quebec (Assignment)
RQ	-	Rideau, Ontario (Assignment)

✓ C.A.B. "NEAR COLLISION" REPORTING PROGRAM: The Civil Aeronautics Board's "NEAR COLLISION" Reporting Program was inaugurated May 1, and "NEAR COLLISION" questionnaire forms are now being distributed throughout the entire industry. Pilos experiencing a "NEAR COLLISION" incident are requested to use one of these questionnaires to report the circumstances to the CAB. These reports will be anonymous and will be handled as confidential material. If forms cannot be obtained through normal organizational channels, or are not available at the nearest airport, write to the Civil Aeronautics Board, Washington 25, D. C., Attention: B-90, for a copy.

✓ CIVIL AIRWAY, CONTROL AREA, CONTROL AREA EXTENSION, CONTROL ZONE AND REPORTING POINT AMENDMENTS: Effective May 31, 1956, unless otherwise advised, the following civil airways, control areas, control area extensions, control zones and reporting points are amended in whole or in part as follows:

CIVIL AIRWAYS: (1) Green civil airway No. 8 (Cold Bay, Alaska to Northway, Alaska), is amended between Kenai, Alaska, rdo rng stn and Gulkana, Alaska, rdo rng stn to read: "Kenai, Alaska, rdo rng stn; the intersection of the NE course of the Kenai, Alaska, rdo rng and the W course of the Anchorage (Merrill), Alaska, rdo rng to the Anchorage (Merrill), Alaska, rdo rng stn. From the Anchorage, Alaska, rdo rng stn via the intsxn of the N course of the Anchorage, (Merrill), Alaska, rdo rng and the SE course of the Skwentna, Alaska, rdo rng; the intsxn of the SE course of the Skwentna, Alaska, rdo rng and the NE course of the Anchorage, Alaska, rdo rng; Gulkana, Alaska, rdo rng stn;"

(2) Red civil airway No. 41 (Cape Spencer, Alaska to Sisters Island, Alaska), caption changed and is amended to read: "From the intsxn of the NW course of the Sitka (Biorka Island), Alaska, rdo rng and the SW course of the Gustavus, Alaska, rdo rng via the Gustavus, Alaska, rdo rng stn to the Sisters Island, Alaska, nondirectional rdo bcn."

(3) Red civil airway No. 82 (Skwentna, Alaska, to Anchorage, Alaska), is amended to read: "From the Skwentna, Alaska, rdo rng stn to the intsxn of the SE course of the Skwentna, Alaska, rdo rng and the N course of the Anchorage (Merrill), Alaska, rdo rng."

(4) Red civil airway No. 103 (Anchorage, Alaska to Middleton Island, Alaska), caption changed and is amended to read: "From the Anchorage (Merrill), Alaska, rdo rng stn via the intsxn of the W course of the Anchorage (Merrill), Alaska, rdo rng and the NE course of the Kenai, Alaska, rdo rng; Kenai, Alaska, rdo rng stn; the intsxn of the SE course of the Kenai, Alaska, rdo rng and the SW course of the Anchorage, Alaska, rdo rng to the Middleton Island, Alaska, rdo rng stn."

(5) Blue civil airway No. 26 (Anchorage, Alaska, to Fairbanks, Alaska), caption changed and is amended to read: "From the Anchorage, Alaska rdo rng stn via the Talkeetna, Alaska, nondirectional rdo bcn; Summit, Alaska, rdo rng; intsxn of the N course of the Summit, Alaska, rdo rng and the SE course of the Nenana, Alaska, rdo rng; Nenana, Alaska, rdo rng stn to the Fairbanks, Alaska, rdo rng stn."

(6) Blue civil airway No. 32 (Anchorage, Alaska to Talkeetna, Alaska), caption changed and is amended to read: "From the Anchorage, Alaska, rdo rng stn via the Skwentna, Alaska, rdo rng stn to the Talkeetna, Alaska, nondirectional rdo bcn."

(7) Blue civil airway No. 43 (Nenana, Alaska, to Nenabank, Alaska), is added to read: "From the Nenana, Alaska, rdo rng stn to the intsxn of the NW course of the Nenana, Alaska, rdo rng and the W course of the Fairbanks, Alaska, rdo rng."

(8) VOR civil airway No. 2 (Seattle, Wash., to Boston, Mass.), is amended by changing the portion which reads: "Miles City, Mont., omnirng stn; Golva, N. Dak., omnirng stn; Dickinson, N. Dak., omnirng stn;" to read: "Miles City, Mont., omnirng stn; Dickinson, N. Dak., omnirng stn;"

(9) VOR civil airway No. 3 (Key West, Fla., to Presque Isle, Maine), is amended by changing the portion which reads: "Brunswick, Ga., omnirng stn, including a west alternate via the intsxn of the Jacksonville omnirng 309° T and the Brunswick omnirng 203° T radials;" to read: "Brunswick, Ga., omnirng stn, including a W alternate via the intsxn of the Jacksonville omnirng 304° T and the Brunswick omnirng 203° T radials;" and by changing the portion which reads: "From the point of intersection of the Herndon, Va., omnirng 045° T and the Martinsburg, W. Va., omnirng 101° T radials via the intsxn of the Herndon omnirng 045° T and the West Chester omnirng 253° T radials; West Chester, Pa., omnirng stn;" to read: "From the point of intsxn of the Washington, D. C., terminal omnirng 016° T and the Herndon, Va., omnirng 104° T radials, excluding the portion which overlaps the Washington Prohibited Area (P-56), via the point of intsxn of the Herndon omnirng 045° T and the Baltimore, Md., omnirng 346° T radials; point of intsxn of the Herndon omnirng 045° T and the West Chester omnirng 253° T radials; West Chester, Pa., omnirng stn;"

(10) VOR civil airway No. 5 (Miami, Fla. to London, Ont.), is amended by changing all before the Nashville, Tenn., omnirng stn to read: "That airspace over United States territory from the Miami, Fla., omnirng stn via the intsxn of the Miami omnirng 338° T and the Orlando omnirng 164° T radials; Orlando, Fla., omnirng stn; Jacksonville, Fla., omnirng stn including an E alternate from the Orlando omnirng stn to the Jacksonville omnirng stn via the Daytona Beach, Fla., omnirng stn and the point of intsxn of the Daytona Beach omnirng 311° T and the Jacksonville omnirng direct radial to the Orlando omnirng stn; intsxn of the Jacksonville omnirng 319° T and the Alma omnirng 148° T radials; Alma, Ga., omnirng stn, including an E alternate and a W alternate from the Jacksonville omnirng stn to the Alma omnirng stn; Macon, Ga., omnirng stn; intsxn of the Macon omnirng 330° T and the Chattanooga omnirng 152° T radials; Chattanooga, Tenn., omnirng stn, including a W alterante from the Alma, Ga., omnirng stn to the Chattanooga, Tenn., omnirng stn via the intsxn of the Alma omnirng 305° T and the Atlanta omnirng 151° T radials, the Atlanta, Ga., omnirng stn and the intsxn of the Atlanta omnirng 352° T and the Chattanooga omnirng 152° T radials; Nashville, Tenn., omnirng stn;"

(11) VOR civil airway No. 7 (Miami, Fla., to Green Bay, Wisc.), is amended by changing all after the Terre Haute, Ind., omnirng stn to read: "Terre Haute, Ind., omnirng stn, including a W alternate; Lafayette, Ind., omnirng stn, including a W alternate via the intsxn of the

Terre Haute omnirng 348°T and the Lafayette omnirng 213°T radials; Chicago Heights, Ill., omnirng stn, including an E alternate via the intsxn of the Lafayette omnirng 353° T and the Chicago Heights omnirng 143°T radials; Milwaukee, Wis., omnirng stn; to the Green Bay, Wis. omnirng stn. The portions of this arwy above 19,000' above MSL, which lie within the Tyndall AFB Restricted Area (R-336) and the Tyndall AFB Warning Area (W-337), are excluded daily between sunset and sunrise."

(12) VOR civil airway No. 8 (Long Beach, Calif., to Washington, D. C.), is amended by changing the portion which reads: "Martinsburg, W. Va., omnirng stn; intsxn of the Martinsburg omnirng 123°T and the Washington term omnirng 319°T radials; to the Washington, D.C., term omnirng stn." to read: "Martinsburg, W. Va., omnirng stn; to the Washington, D. C., term omnirng stn."

(13) VOR civil airway No. 10 (Pueblo, Colo., to New York, N. Y.), is amended by changing the portion which reads: "Litchfield, Mich., omnirng stn; including a N alternate; Carleton, Mich., omnirng stn;" to read: "Litchfield, Mich., omnirng stn, including a N alternate; intsxn of the Litchfield omnirng 098°T and the Carleton omnirng 264°T radials; Carleton, Mich., omnirng stn;"

(14) VOR civil airway No. 12 (Santa Barbara, Calif., to Philadelphia, Pa.), is amended by changing the portion which reads: "Needles, Calif., omnirng stn;" to read: "Needles, Calif Calif., omnirng stn, including a N alternate via the intsxn of the Daggett omnirng 078°T and the Needles omnirng 289°T radials;" by changing the portion which reads: "Indianapolis, Ind., omnirng stn, including a S alternate via the intsxn of the Terre Haute omnirng 082°T and the Indianapolis omnirng 232°T radials;" to read: "Indianapolis, Ind., omnirng stn, including a S alternate via the intsxn of the Terre Haute omnirng 082°T and the Indianapolis omnirng 230°T radials;" and by changing the portion which reads: "Harrisburg, Pa., omnirng stn, including a S alternate via the intsxn of the Johnstown omnirng 107°T and the Harrisburg omnirng 259°T radials; to the West Chester, Pa., omnirng stn." to read: "Harrisburg, Pa., omnirng stn, including a S alternate; West Chester, Pa., omnirng stn; to the point of intsxn of the West Chester omnirng 120°T radial and the Philadelphia, Pa., International Arpt ILS lclzr 256° T course."

(15) VOR civil airway No. 19 (El Paso, Tex., to Great Falls, Mont.), is amended by changing all between the Raton, N. Mex., omnirng stn and the Douglas, Wyo., omnirng stn to read: "Raton, N. Mex., omnirng stn, including an E alternate; Pueblo, Colo., omnirng stn; Kiowa, Colo., omnirng stn; intsxn of the Kiowa omnirng 360°T and the Cheyenne omnirng 162°T radials; Cheyenne, Wyo., omnirng stn; Douglas, Wyo., omnirng stn, including an E alternate."

(16) VOR civil airway No. 20 (Laredo, Tex. to Richmond, Va.), is amended by changing the portion which reads: "Evergreen, Ala., omnirng stn;" to read: "Evergreen, Ala., omnirng stn, including a N alternate via the intsxn of the Mobile omnirng 015°T and the Evergreen omnirng 244°T radials;"

(17) VOR civil airway No. 21 (Long Beach, Calif., to United States-Canadian Border), is amended by changing the portion which reads: "Mormon Mesa, Nev., omnirng stn, including an E alternate via the intsxn of the Las Vegas omnirng 086°T and the Mormon Mesa omnirng 192°T radials;" to read: "Mormon Mesa, Nev., omnirng stn, including an E alternate from the Las Vegas omnirng stn to the Mormon Mesa omnirng stn via the intsxn of the Las Vegas omnirng 086°T and the Needles, Calif., omnirng direct radial to the Mormon Mesa omnirng stn;" and by changing the portion which reads: "Delta, Utah, omnirng stn; intsxn of the Delta omnirng 023°T and the Salt Lake City omnirng 179°T radials; Salt Lake City, Utah, omnirng stn;" to read: "Delta, Utah, omnirng stn; Utah Lake, Utah, omnirng stn; Salt Lake City, Utah, omnirng stn;"

(18) VOR civil airway No. 26 (Cherokee, Wyo., to Cleveland, Ohio), is amended by changing the portion which reads: "Salem, Mich., omnirng stn; intsxn of the Salem omnirng 123°T and the Cleveland omnirng 330°T radials; to the Cleveland, Ohio, omnirng stn." to read: "Salem, Mich., omnirng stn; point of intsxn of the Carleton, Mich., omnirng direct radial to the Perry, Ohio, nondirectional rdo bcn and the Cleveland omnirng direct radial to the Windsor, Ont., omnirng stn; to the Cleveland, Ohio, omnirng stn."

(19) VOR civil airway No. 29 (Salisbury, Md., to United States-Canadian Border), is amended by changing the portion which reads: "Dover, Del., omnirng stn; West Chester, Pa., omnirng stn;" to read: "Dover, Del., omnirng stn; Woodstown, N. J., omnirng stn; point of intsxn of the Philadelphia, Pa., Intnl Arpt ILS lclzr 256°T course and the West Chester omnirng 120°T radial; West Chester, Pa., omnirng stn;"

(20) VOR civil airway No. 36 (Toronto, Ontario, to New York, N. Y.), is amended to read: "That airspace over United States territory from the Toronto, Ont., omnirng stn via the intsxn of the Toronto omnirng 141°T and the Buffalo omnirng 312°T radials; Buffalo, N.Y., omnirng stn; Elmira, N. Y., omnirng stn, including a S alternate; Wilkes-Barre-Scranton, Pa., omnirng stn; to the point of intsxn of the Wilkes-Barre-Scranton omnirng 117°T and the Wilton, Conn., omnirng 240°T radials."

(21) VOR civil airway No. 38 (Chicago, Ill., to Elkins, W. Va.), is amended by changing the portion which reads: "Columbus, Ohio. omnirng stn, including a S alternate;" to read: "Columbus, Ohio, omnirng stn;"

(22) VOR civil airway No. 39 (South Boston, Va., to Kennebunk, Maine), is amended by changing the first portion to read: "From the South Boston, Va., omnirng stn via the Gordonsville, Va., omnirng stn; Herndon, Va., omnirng stn; to the point of intsxn of the Herndon omnirng 045°T and the Baltimore, Md., omnirng 346°T radials."

(23) VOR civil airway No. 42 (Flint, Mich., to Washington, D. C.), is amended to read: "That airspace over United States territory from the point of intsxn of the Lansing, Mich., omnirng 068°T and the Salem, Mich., omnirng 342°T radials via the Windsor, Ont. omnirng stn; Cleveland, Ohio, omnirng stn; intsxn of the Cleveland omnirng 116°T and the Pittsburgh omnirng 311°T radials; Pittsburgh, Pa., omnirng stn; Johnstown, Pa., omnirng stn; Martinsburg, W. Va., omnirng stn; to the Washington, D. C., term omnirng stn."

(24) VOR civil airway No. 45 (Lexington, Ky., to Lansing, Mich.), is amended to read: "From the Lexington, Kt., omnirng stn via the York, Ky., omnirng stn; Columbus, Ohio omnirng stn; to the Waterville, Ohio omnirng stn. From the point of intsxn of the Waterville omnirng 328°T and the Litchfield, Mich. omnirng 090°T radials to the Lansing, Mich., omnirng stn. The portions of this arwy which conflict with the Wilmington Restricted Area (R-109) are excluded."

(25) VOR civil airway No. 47 (Louisville, Ky., to Detroit, Mich.), is amended by changing all after the Waterville, Ohio, omnirng stn to read: "Waterville, Ohio, omnirng stn; point of intsxn of the Carleton, Mich., omnirng 264°T radial and the Detroit Willow Run Arpt ILS lclzr front course; Detroit, Mich., Willow Run Arpt ILS lclzr; to the point of intsxn of the Detroit, Willow Run Arpt ILS lclzr back course and the Salem, Mich., omnirng direct radial to the Windsor, Ont., omnirng stn."

(26) VOR civil airway No. 51 (Miami, Fla., to Chicago, Ill.), is amended to read: "From the Miami, Fla., omnirng stn via the intsxn of the Miami omnirng 338°T and the Vero Beach omnirng 192°T radials; Vero Beach, Fla., omnirng stn; Daytona Beach, Fla., omnirng stn; Jacksonville, Fla., omnirng stn; intsxn of the Jacksonville omnirng 319°T and the Alma omnirng 148°T radials; Alma, Ga., omnirng stn, including an E and a W alternate from the Jacksonville omnirng stn to the Alma omnirng stn; Macon, Ga., omnirng stn; intsxn of the Macon omnirng 330°T and the Chattanooga omnirng 152°T radials; Chattanooga, Tenn., omnirng stn, including a W alternate from the Alma, Ga., omnirng stn to the Chattanooga, Tenn., omnirng stn via the intsxn of the Alma omnirng 305°T and the Atlanta omnirng 151°T radials, the Atlanta, Ga., omnirng stn and the intsxn of the Atlanta omnirng 352°T and the Chattanooga, omnirng 152°T radials; Crossville, Tenn., omnirng stn, including an E alternate via the intsxn of the Chattanooga omnirng 063°T and the Crossville omnirng 171°T radials; Louisville, Ky., omnirng stn; intsxn of the Louisville omnirng 356°T and the Indianapolis omnirng 137°T radials; Indianapolis, Ind., omnirng stn; Lafayette, Ind., omnirng stn; Chicago Heights, Ill., omnirng stn; to the point of intsxn of the Chicago Heights, Ill., omnirng 342°T and the Naperville, Ill., omnirng 090°T radials. The portions of this arwy which overlap the Sterling Restricted Area (R-169 and R-170) are excluded."

(27) VOR civil airway No. 53 (Charleston, S.C., to Chicago, Ill.), is amended to read: "From the Charleston, S.C., omnirng stn via the Columbia, S.C., omnirng stn; Spartanburg, S.C., omnirng stn; Asheville, N.C., omnirng stn; Tri-City, Tenn., omnirng stn; Lexington, Ky., omnirng stn; Louisville, Ky. omnirng stn; intsxn of Louisville omnirng 333°T and Indianapolis, omnirng 170°T radials; Indianapolis, Ind., omnirng stn; Lafayette, Ind., omnirng stn, including a W alternate; Peotone, Ill., omnirng stn; to the Chicago, Ill. Midway Arpt term omnirng stn."

(28) VOR civil airway No. 57 (Graham, Tenn., to Scotland, Ind.), is amended to read: "From the Graham, Tenn., omnirng stn via the Bowling Green, Ky., omnirng stn; to the Scotland, Ind., omnirng stn."

(29) VOR civil airway No. 72 (Troy, Ill., to Albany, N.Y.), is amended by changing the portion which reads: "Lafayette omnirng 080°T" to read: "Lafayette omnirng 089°T."

(30) VOR civil airway No. 88 (Tulsa, Okla., to Mansfield, Ohio), is amended by changing the portion which reads: "to the Mansfield, Ohio, omnirng stn including a N alternate." to read: "to the Mansfield, Ohio, omnirng stn."

(31) VOR civil airway No. 89 (Denver, Colo., to Rapid City, S. Dak.), is amended to read: "From the Denver, Colo., omnirng stn via the Cheyenne, Wyo., omnirng stn, including an E alternate via the intsxn of the Denver omnirng 016°T and the Cheyenne omnirng 131°T radials; Chadron, Nebr., omnirng stn, including an E alternate via the intsxn of the Cheyenne omnirng 054°T and the Chadron omnirng 197°T radials; to the Rapid City, S. Dak., omnirng stn; including an E alternate. The portion of this arwy which overlaps the Scenic Restricted Area (R-190) is excluded."

(32) VOR civil airway No. 90 (Litchfield, Mich., to Windsor, Ont.), is added to read: "That airspace over United States territory from the Litchfield, Mich., omnirng stn to the Windsor, Ont., omnirng stn."

(33) VOR civil airway No. 96 (Lafayette, Ind., to Toledo, Ohio), is amended to read: "From the Lafayette, Ind., omnirng stn via the intsxn of the Lafayette omnirng 089°T and the Fort Wayne omnirng 226°T radials; Fort Wayne, Ind., omnirng stn; to the Waterville, Ohio, omnirng stn."

(34) VOR civil airway No. 97 (Miami, Fla., to Alexandria, Minn.), is amended by changing the portion which reads: "intsxn of the Indianapolis omnirng 342°T and the Chicago Heights omnirng 140°T radials;" to read: "intsxn of the Indianapolis omnirng 341°T and the Chicago Heights omnirng 143°T radials."

(35) VOR civil airway No. 105 (Phoenix, Ariz., to Las Vegas, Nev.), is amended to read: "From the Phoenix, Ariz., omnirng stn via the Prescott, Ariz., omnirng stn, including an E alternate via the Phoenix omnirng 004°T and the Prescott omnirng 135°T radials; to the Las Vegas, Nev., omnirng stn."

(36) VOR civil airway No. 116 (Kansas City, Mo., to New York, N.Y.), is amended by changing the portion which reads: "Salem, Mich., omnirng stn; Erie, Pa., omnirng stn;" to read:

"Salem, Mich., omnirng stn; Windsor, Ont., omnirng stn; Erie, Pa., omnirng stn;"

(37) VOR civil airway No. 128 (Chicago, Ill., to New Bern, N.C.), is amended by changing all before the Cincinnati, Ohio, omnirng stn to read: "From the Chicago, Ill. Midway Arpt term omnirng stn via the Peotone, Ill., omnirng stn; Lafayette, Ind., omnirng stn; intsxn of the Lafayette omnirng 122°T and the Cincinnati omnirng 318°T radials; Cincinnati, Ohio, omnirng stn;"

(38) VOR civil airway No. 140 (Amarillo, Tex., to New York, N.Y.), is amended by changing the last two sentences to read: "From the Baltimore, Md., omnirng stn via the point of intsxn of the Baltimore omnirng 045°T and the Woodstown omnirng 269°T radials; Woodstown, N.J., omnirng stn; point of intsxn of the Woodstown omnirng 106°T and the Dover, Del., omnirng direct radial to the Coyle, N.J., omnirng stn; Coyle, N.J., omnirng stn; to the Colts Neck, N.J., omnirng stn, excluding the portions of this arwy between the Coyle, N.J., omnirng stn and the Colts Neck, N.J., omnirng stn more than 3 miles either side of the center line and the portions which overlap the Aberdeen Restricted Area (R-54)."

(39) VOR civil airway No. 142 (Erie, Pa., to Rochester, N.Y.), is amended to read: "From the Erie, Pa., omnirng stn via the point of intsxn of the Erie omnirng 080°T and the Bradford, Pa., omnirng 308°T radials; Buffalo, N.Y., omnirng stn; intsxn of the Buffalo omnirng 034°T and the Rochester omnirng 289°T radials; to the Rochester, N.Y., omnirng stn."

(40) VOR civil airway No. 143 (Charlotte, N.C., to Washington, D.C.), is amended by changing the last portion to read: "From the Front Royal, Va., omnirng stn to the point of intsxn of the Martinsburg, W.Va., omnirng direct radial to the Washington, D. C., term omnirng stn and the Herndon, Va., omnirng direct radial to the Harrisburg, Pa., omnirng stn."

(41) VOR civil airway No. 166 (Martinsburg, W. Va., to New York, N.Y.), is amended to read: "From the Martinsburg, W. Va., omnirng stn to the West Chester, Pa., omnirng stn. From the point of intsxn of the Philadelphia, Pa., Intnl Arpt ILS lclzr 256°T course and the West Chester, Pa., omnirng 170°T radial via the Philadelphia Intnl Arpt ILS lclzr to the Colts Neck, N.J., omnirng stn."

(42) VOR civil airway No. 170 (Erie, Pa., to Philadelphia, Pa.), is amended to read: "From the Erie, Pa., omnirng stn via the Bradford, Pa., omnirng stn, including a N alternate via the intsxn of the Erie omnirng 080°T and the Bradford omnirng 308°T radials; Selinsgrove, Pa., omnirng stn; to the West Chester, Pa., omnirng stn."

(43) VOR civil airway No. 221 (Fort Wayne, Ind., to Detroit, Mich.), is amended to read: "From the Fort Wayne, Ind., omnirng stn via the Litchfield, Mich., omnirng stn; intsxn of the Litchfield omnirng 050°T and the Salem omnirng 257°T radials; Salem, Mich., omnirng stn; to the point of intsxn of the Salem omnirng 079°T radial with the Windsor, Ont., omnirng direct radial to the point of intsxn of the Lansing, Mich., omnirng 068°T and the Salem, Mich., omnirng 342° T radials."

(44) VOR civil airway No. 227 (Louisville, Ky., to Indianapolis, Ind.), is added to read: "From the Louisville, Ky., omnirng stn via the intsxn of the Louisville, omnirng 310°T and the Indianapolis omnirng 185°T radials; to the Indianapolis, Ind., omnirng stn."

(45) VOR civil airway No. 235 (Utah Lake, Utah, to Fort Bridger, Wyo.), is added to read: "From the Utah Lake, Utah, omnirng stn to the Fort Bridger, Wyo. omnirng stn."

(46) VOR civil airway No. 236 (Bonneville, Utah, to Ogden, Utah), is added to read: "From the Bonneville, Utah, omnirng stn via the intsxn of the Bonneville omnirng 084°T and the Ogden omnirng 235°T radials; to the Ogden, Utah, omnirng stn."

(47) VOR civil airway No. 237 (Needles, Calif., to Mormon Mesa, Nev.), is added to read: "From the Needles, Calif., omnirng stn to the Mormon Mesa, Nev., omnirng stn."

(48) VOR civil airway No. 238 (Philadelphia, Pa., to Atlantic City, N.J.), is added to read: "From the point of intsxn of the West Chester, Pa., 120°T radial and the Philadelphia, Pa., Intnl Arpt ILS lclzr 256°T course via the Woodstown, N.J., omnirng stn; to the point of intsxn of the Dover, Del., omnirng 070°T and the Coyle, N.J., omnirng 203°T radials."

(49) VOR civil airway No. 239 (Wildwood, N.J., to Philadelphia, Pa.), is added to read: "From the point of intsxn of the Coyle, N.J., omnirng 203°T and the Woodstown omnirng 154° T radials via the Woodstown, N.J., omnirng stn; to the point of intsxn of the West Chester, Pa., omnirng 120°T radial and the Philadelphia, Pa., Intnl Arpt ILS lclzr 256°T course."

CONTROL AREAS: (1) Blue civil airway No. 43 (Nenana, Alaska, to Nenabank, Alaska), is added to read: "All of Blue Civil Airway No. 43."

(2) VOR civil airway No. 5 (Miami, Fla., to London, Ont.), is amended to read: "All of VOR civil airway No. 5, including E and W alternates, but excluding the airspace between the main arwy and its W alternate from the Alma, Ga., omnirng stn to the Chattanooga, Tenn., omnirng stn, and also excluding the airspace between the main arwy and its E alternate from the Bowling Green, Ky., omnirng stn to the Louisville, Ky., omnirng stn."

(3) VOR civil airway No. 36 (Toronto, Ont., to New York, N.Y.), is amended to read: "All of VOR civil airway No. 36, including a S alternate."

(4) VOR civil airway No. 38 (Chicago, Ill., to Elkins, W. Va.), is amended to read: "All of VOR civil airway No. 38."

(5) VOR civil airway No. 42 (Flint, Mich., to Washington, D.C.), is amended to read: "All of VOR civil airway No. 42."

(6) VOR civil airway No. 51 (Miami, Fla., to Chicago, Ill.), is amended to read: "All of VOR civil arwy No. 51, including E and W alternates, but excluding the airspace between the main arwy and its W alternate from the Alma, Ga., omnirng stn to the Chattanooga, Tenn., omnirng stn."

(7) VOR civil airway No. 57 (Graham, Tenn., to Scotland, Ind.), is amended to read: "All of VOR civil airway No. 57."

(8) VOR civil airway No. 88 (Tulsa, Okla., to Mansfield, Ohio), is amended to read: "All of VOR civil airway No. 88."

(9) VOR civil airway No. 89 (Denver, Colo., to Rapid City, S. Dak.), is amended to read: "All of VOR civil airway No. 89, including E alternates."

(10) VOR civil airway No. 90 (Litchfield, Mich., to Windsor, Ont.), is added to read: "All of VOR civil airway No. 90."

(11) VOR civil airway No. 96 (Lafayette, Ind., to Toledo, Ohio), is amended to read: "All of VOR civil airway No. 96."

(12) VOR civil airway No. 105 (Phoenix, Ariz., to Las Vegas, Nev.), is amended to read: "All of VOR civil airway No. 105 including an E alternate."

(13) VOR civil airway No. 142 (Erie, Pa., to Rochester, N.Y.), is amended to read: "All of VOR civil airway No. 142."

(14) VOR civil airway No. 166 (Martinsburg, W. Va., to New York, N.Y.), is amended to read: "All of VOR civil airway No. 166."

(15) VOR civil airway No. 170 (Erie, Pa., to Philadelphia, Pa.), is amended to read: "All of VOR civil airway No. 170 including a N alternate."

(16) VOR civil airway No. 227 (Louisville, Ky., to Indianapolis, Ind.), is added to read: "All of VOR civil airway No. 227."

(17) VOR civil airway No. 235 (Utah Lake, Utah, to Fort Bridger, Wyo.), is added to read: "All of VOR civil airway No. 235."

(18) VOR civil airway No. 236 (Bonneville, Utah, to Ogden, Utah), is added to read: "All of VOR civil airway No. 236."

(19) VOR civil airway No. 237 (Needles, Calif., to Mormon Mesa, Nev.), is added to read: "All of VOR civil airway No. 237."

(20) VOR civil airway No. 238 (Philadelphia, Pa., to Atlantic City, N.J.), is added to read: "All of VOR civil airway No. 238."

(21) VOR civil airway No. 239 (Wildwood, N.J., to Philadelphia, Pa.), is added to read: "All of VORcivil airway No. 239."

CONTROL AREA EXTENSIONS: (1) (Augusta, Ga.), is added to read: "Within 5 mi either side of the 320°T radial of the Augusta omnirng extending from the omnirng stn to a point 15 mi NW."

(2) (Riverside, Calif.), is amended to read: "That airspace E of March AFB bounded on the E by a line extending between a point at lat 33-51-00, long. 116-50-40 and a point at lat 33-45-45, long. 116-50-00, on the S by VOR civil arwy No. 64, on the NW by VOR civil arwy No. 8 and on the N by Green civil arwy No. 5; that airspace SE of March AFB bounded on the N by VOR civil arwy No. 64, on the E by VOR civil arwy No. 117, on the SE and S by Red civil arwy No.65 and on the SW by Caution Area C-444."

(3) (Seattle, Wash.), is amended by adding the following portion to present ctl area extension: "and that airspace N of Seattle bounded on the S by Red civil arwy No. 79 and on the E by Green civil arwy No. 10 and on the NW by a line extending from a point at lat 48-02-00, long. 122-26-00 to a point at lat 47-55-00, long. 122-32-00."

(4) (Cochise, Ariz.), is revoked.

(5) (Utah Lake, Utah), is added to read: "Within 5 mi either side of the 125°T radial of the Utah Lake omnirng extending from the omnirng stn to a point 25 mi SE."

(6) (Grandview, Mo.), is revoked.

(7) (Olathe, Kans.), is added to read: "That airspace bounded on the NW by Green civil arwy No. 4, on the E by VOR civil arwys Nos. 13 and 71, on the S by lat 38-12-00, and on the W by Amber civil airway No. 4."

(8) (Las Vegas, Nev.), is amended by changing the words which read: "Mormon Mesa, Nev., omnirng 192°T radial" to read: "Mormon Mesa, Nev., omnirng 184°T radial".

(9) (Denver, Colo.), is amended to read: "That airspace within 5 mi either side of a line bearing 174°T extending from the Aurora nondirectional rdo bcn to a point 25 mi S; that airspace NE of Denver bounded on the E by VOR civil arwy No. 19, on the SE by VOR civil arwy No. 160 and on the W by VOR civil arwy No. 89; that airspace SE of Denver bounded on the NE by VOR civil arwy No. 4, on the E by VOR civil arwy No. 19, on the SW by the Colorado Springs, Colo., ctl area extension, and on the W by Amber civil arwy No. 3, excluding the portion which overlaps Restricted Area (R-195)."

(10) (Anchorage, Alaska), is amended to read: "That airspace within 5 mi either side of direct lines between the Anchorage, Alaska, rdo rng stn, the intsxn of the SE course of the Anchorage rdo rng with the NW course of the Hinchinbrook, Alaska, rdo rng, the Middleton Island, Alaska, rdo rng stn, and the Sandspit, B.C., Canada, rdo rng stn, extending from the Anchorage, Alaska, rdo rng stn to the United States-Canadian Border."

(11) (Middleton Island, Alaska), is added to read: "That airspace within 5 mi either side of the NE and SW courses of the Middleton Island, Alaska rdo rng extending from the rdo rng stn to points 25 mi NE and SW."

(12) (Yakataga, Alaska), is added to read: "Within 5 mi either side of SW course of Yakataga, Alaska, rdo rng extending from the intsxn of the SW course of the Yakataga rdo rng and the SE course of the Hinchinbrook, Alaska, rdo rng to a point 20 mi SW, and within 5 mi either side of the SE course of the Yakataga rdo rng extending from the intsxn of the SE course of the Yakataga rdo rng and the NW course of the Yakutat, Alaska, rdo rng to a point 20 mi SW."

(13) (Pierre, S. Dak.), is added to read: "That airspace within a 25 mi radius of the Pierre, S. Dak., Arpt."

(14) (Peru, Ind.), is added to read: "That airspace within a 25 mi radius of Bunker Hill AFB, Peru, Ind."

CONTROL ZONES: (1) (Pierre, S. Dak.), is amended to read: "Within a 5 mi radius of Pierre Arpt, within 2 mi either side of the E course of the Pierre rdo rng extending from the rdo rng stn to a point 12 mi E, and within 2 mi either side of the 260°T and 080°T radials of the Pierre omnirng extending from the five mi radius zone to a point 12 mi NE of the omnirng stn."

(2) (Lafayette, Ind.), is amended to read: "Within a 5 mi radius of Purdue University Arpt and within 2 mi either side of the 137° and 317°T radials of the Lafayette omnirng extending from the 5 mi radius zone to a point 12 mi NW of the omnirng stn."

(3) (Minneapolis, Minn.), is amedned to read: "Within a 5 mi radius of the Minneapolis-St. Paul Intnl Arpt, within 2 mi either side of the SE course of the Minneapolis rdo rng extending from the rdo rng stn to a point 12 mi SE, within 2 mi either side of the SE (front) course of the Minneapolis ILS lclzr extending from the lclzr to a point 12 mi SE of the outer marker and within 2 mi either side of the NW (back) course of the ILS lclzr extending from the lclzr to a point 17 mi NW of the arpt."

(4) (Minot, N. Dak.), is amedned to read: "Within a 5 mi radius of Port O'Minot Field, within 2 mi either side of the SE course of the Minot rdo rng extending from the rdo rng stn to a point 12 mi SE, and within 2 mi either side of the 254° and 074°T radials of the Minot omnirng extending from the 5 mi radius zone to a point 12 mi NE of the omnirng stn."

(5) (Charlotte, N.C.), is amended by adding the following portion to present control zone: "and within 2 miles either side of the 005°T and 185°T radials of the Charlotte omnirng extending from the 5 mi radius zone to a point 10 mi S of the omnirng stn."

(6) (Aberdeen, S. Dak.), is amended to read: "Within a 5 mi radius of the Aberdeen Mun Arpt (Saunders Field), within 2 mi either side of the S course of the Aberdeen rdo rng extending from the rdo rng stn to a point 12 mi S, and within 2 mi either side of the 131°T radial of the Aberdeen omnirng extending from the omnirng stn to a point 12 mi SE."

(7) (Sioux Falls, S. Dak.), is amended to read: "Within a 5 mi radius of Sioux Falls Mun Arpt, within 2 mi either side of the NW course of the Sioux Falls rdo rng extending from the rdo rng stn to a point 12 mi NW, within 2 mi either side of the 336°T radial of the Sioux Falls omnirng extending from the omnirng stn to a point 12 mi NW, within 2 mi either side of the NE (back) course of the Sioux Falls ILS lclzr extending from the lclzr to a point 16 mi NE."

(8) (Fairbanks, Alaska), is amended to read: "Within a 5 mi radius of Ladd AFB, within a 5 mi radius of Fairbanks Intnl Arpt, and within 5 mi either side of a line bearing 39°T extending from the Fairbanks Intnl Arpt to the ILS outer marker."

(9) (Yakataga, Alaska), is amended to read: "Within a 5 mi radius of the Yakataga Arpt, within 5 mi either side of the SE and SW courses of the Yakataga rdo rng extending from the rdo rng stn to Amber civil arwy No. 1."

(10) (Peru, Ind.), is added to read: "Within a 5 mi radius of Bunker Hill AFB, Peru, Ind., and within 2 mi either side of the extended centerline of the Bunker Hill AFB NE/SW rnwy extending to a point 9 mi SW of the rnwy end."

(11) (Beaufort, S.C.), is added to read: "Within a 5 mi radius of MCAAS Beaufort, S.C., within 2 mi either side of a line bearing 43°T extending from the arpt to a point 16 mi NE and within 2 mi either side of a line bearing 137°T extending from the arpt southeastward to Warning Area W-132."

REPORTING POINTS: (1) Amber civil airway No. 1 (United States-Mexican Border to Nome, Alaska), is amended by deleting the following reporting point: "the intsxn of the NW course of the Yakutat, Alaska, rdo rng and the S course of the Yakataga, Alaska, rdo rng;" and by substituting the following reporting point therefor: "the intsxn of the NW course of the Yakutat, Alaska, rdo rng and the SE course of the Yakataga, Alaska, rdo rng;"

(2) Blue civil airway No. 43 (Nenana, Alaska, to Nenabank, Alaska), is added to read: "No reporting point designation."

VOR REPORTING POINTS: (1) Domestic VOR reporting points is amended by adding the following reporting points: (a) Perry, Ohio, nondirectional rdo bcn; (b) Elko, Nev., omnirng stn; (c) Hanksville, Utah, omnirng stn; (d) Fort Bridger, Wyo., omnirng stn; (e) Pocatello, Idaho, omnirng stn; (f) Dubois, Idaho, omnirng stn; (g) Lucin, Utah, omnirng stn; (h) Cherokee, Wyo., omnirng stn; (i) Bonneville, Utah, omnirng stn; (j) Utah Lake, Utah, omnirng stn; (k) Kiowa, Colo., omnirng stn; (l) Point Reyes, Calif., omnirng stn; (m) Klamath Falls, Oreg., omnirng stn; (n) Maricopa Intsxn - the intsxn of Bakersfield, Cal., omni 210°T and Coalinga, Cal., omni 153°T radials; (o) Geyersville Intsxn - the intsxn of Williams, Cal., omni 241°T and the radials; (o) Geyersville Intsxn - the intsxn of the Williams, Calif., omnirng 241°T and the Point Reyes., Calif., omnirng 352°T radials. (p) Saugus Intsxn - the intsxn of the Palmdale, Calif., omnirng 247°T and the Los Angeles, Calif., omnirng 355°T radials; (q) White Oaks Intsxn - the intsxn of the Bakersfield, Calif., omnirng 149°T and the Palmdale, Calif., omnirng 292°T radials; (r) Pacoima Intsxn - the intsxn of the Fillmore, Calif., omnirng 111°T and the Los Angeles, Calif. 355°T radials; (s) Avalon Intsxn - the intsxn of the Oceanside, Calif., omnirng 295°T and the Long Beach, Calif., omnirng 215°T radials; (t) Corona Intsxn - the intsxn of the Long Beach, Calif., omnirng 095°T and the Ontario, Calif., omnirng 180°T radials; (u) Berry Intsxn - the intsxn of the Ontario, Calif., omnirng 300°T, the Long Beach, Calif., omnirng 346°T and the Los Angeles, Calif., omnirng 035°T radials; (v) Purgatoire Intsxn - the intsxn of the Pueblo, Colo., omnirng 145°T and the Lamar, Colo., omnirng 231°T radials; (w) Saltair Intsxn - the intsxn of the Salt Lake City, Utah, omnirng 265°T and the Ogden, Utah, omnirng 190°T radials; (x) Davenport Intsxn - the intsxn of the Salinas, Calif., omnirng 300°T and the Point Reyes, Calif., omnirng 155°T radials; (y) Marin Intsxn - the intsxn of the San Francisco, Calif., omnirng 304°T and the Ukiah, Calif., omnirng 172°T radials; (z) Stinson Beach Intsxn - the intsxn of the San Francisco, Calif., omnirng 304°T and the Point Reyes, Calif., omnirng 155°T radials; (aa) Fontana Intsxn - the intsxn of the Palmdale, Calif., omnirng 136°T, the Ontario, Calif., omnirng 038°T and the Daggett, Calif., omnirng 218°T radials; (bb) Radnor Intsxn - the intsxn of the Lafayette, Ind., omnirng 089°T and the Indianapolis, Ind., omnirng 342°T radials.

(2) Domestic VOR reporting points is amended by changing the following reporting point to read: (a) Kokomo Intsxn - the intsxn of the Indianapolis, Ind., omnirng 021°T and the Lafayette, Ind., omnirng 089°T radials.

(3) Domestic VOR reporting points is amended by revoking the following reporting points: (a) Birmingham, Ala., omnirng stn; (b) Rossville Intsxn - the intsxn of the Lafayette, Ind., omnirng 080°T and the Indianapolis, Ind., omnirng 342°T radials.

ON-REQUEST REPORTING POINTS: The following on-request reporting points are designated, redesignated or cancelled and shall become effective 31 May 1956:

NAME CHANGE:

(1) FLAT WOODS, W. VA. INTSXN - the intsxn of the SW course Morgantown, W.Va., LFR and the 074° mag bearing Elkins, W.Va. (Formerly Sutton, W.Va. Intsxn.)

DESIGNATE:

(1) ANGELICA, N.Y. INTSXN - the intsxn of the Bradford, Pa., VOR radial to intsxn of Buffalo, N.Y. VOR 147° mag radial and Elmira, N.Y. VOR 299° mag radial.

(2) ANTELOPE, TEXAS (VHF) INTSXN - the intsxn of the El Paso, Tex. VOR 080° mag and Hudspeth, Tex. VOR 284° mag radials. Holding not authorized.

(3) ARCOLA, ILL. INTSXN - the intsxn of the Terre Haute, Ind. VOR 281° mag radial (V-50) and the Vandalia, Ill. VOR 145° mag radial (V-72).

(4) AUBURN, MICH. INTSXN - the intsxn of the Salem, Mich., VOR 043° mag radial and the Windsor, Ont., VOR 320° mag radial (V-42).

(5) AUGUSTA (VHF) INTSXN - the intsxn of the 271°T radial of the Great Falls, Mont. VOR and the 180°T radial of the Cutbank, Mont. VOR.

(6) BAINBRIDGE, N.J. INTSXN - the intsxn of the Baltimore, Md. VOR 052° mag radial and the Woodstown, N.J. VOR 278° mag radial.

(7) BRAINARD, N.Y. INTSXN - the intsxn of the Poughkeepsie, N.Y. VOR 020° mag radial and the Albany, N.Y., VOR 153° mag radial.

(8) BLUE JACKET INTSXN - the intsxn of the Jacksonville, Fla. VOR 173° mag radial and a 087° mag bearing from NAS Cecil, Fla., (NZC) rdo bcn.

(9) BRYCEVILLE (VHF) INTSXN - the intsxn of the Jacksonville, Fla. VOR 272° mag and Brunswick, Ga., VOR 215° mag radials.

(10) CABINS (VHF) INTSXN - the intsxn of the Jacksonville, Fla. VOR 303° mag and the Alma, Ga. VOR 162° mag radials.

(11) CARL'S (LF) INTSXN - the intsxn of the Jacksonville, Fla. LF rng N course and the 044° mag bearing from Jacksonville, Fla. ILS LMM.

(12) CEDAR MOUNTAIN, UTAH INTSXN - the intsxn of the Ogden, Utah VOR 218° mag radial and the Bonneville, Utah VOR 067° mag radial.

(13) CHARLO (VHF) INTSXN - the intsxn of the 354°T radial of the Missoula, Mont. VOR and the 090°T radial of the Mullan Pass, Idaho VOR.

(14) COLCHESTER, ONT. INTSXN - the intsxn of the Carleton, Mich. VOR 103° mag radial (V-10/V-188) and the Windsor, Ont. VOR 181° mag radial.

(15) COLESBURG (VHF) INTSXN - the intsxn of the Jacksonville, Fla. VOR 333° mag and the Brunswick, Ga. 235° mag radials.

(16) CRYSTOL, FLA. (VHF) INTSXN - the intsxn of the Tampa, Fla. VOR 329° mag and the Lakeland, Fla. VOR 285° mag radials.

(17) DOVE, TEX (VHF) INTSXN - the intsxn of the El Paso, Tex. VOR 080° mag and the Hudspeth, Tex. VOR 310° mag radials.

(18) EARL (VHF) INTSXN - the intsxn of the 174°T radial of the Pueblo, Colo. VOR and the 238°T radial of the Lamar, Colo. VOR.

(19) FENTON, MICH. INTSXN - the intsxn of the Salem, Mich. VOR 345° mag radial (V-133) and the Lansing, Mich. VOR 087° mag radial (formerly V-180, renumbered to V-84).

(20) FOLKSTON(VHF) INTSXN - the intsxn of the Jacksonville, Fla. VOR 318° mag and the Brunswick, Ga. VOR 235° mag radials.

(21) FORT MEADE, MD. INTSXN - the intsxn of the Washington, D. C. TVOR 055° mag radial and 160° mag bearing from the Baltimore, Md. LOM.

(22) GARY, IND. INTSXN - the intsxn of the Joliet VOR 085° mag radial, the Chicago Heights VOR 042° mag radial, and the SE course of the Chicago (Midway) ILS lclzr.

(23) HAZLETON, PA. INTSXN - the intsxn of the Stroudsburg, Pa. VOR 280° mag radial Wilkes-Barre, Pa. VOR 227° mag radial and the Williamsport, Pa. VOR 134° mag radial.

(24) HECETA HEAD (VHF) INTSXN - the intsxn of the 265°T radial of the Eugene, Oreg, VOR and the 184°T radial of the Newport, Oreg. VOR.

(25) HILLIARD (VHF) INTSXN - the intsxn of the Jacksonville, Fla. VOR 303° mag and the Brunswick, Ga. VOR 235° mag radials.

(26) HUECO, REX (LF) INTSXN - the intsxn of the E course of the El Paso, Tex. LF rng and a 114° mag bearing from the Newman, Tex. rdo bcn.

(27) KATY, FLA (VHF) INTSXN - the intsxn of the Tampa, Fla. VOR 059° mag and the Lakeland, Fla. 329° mag radials. (Same as existing Plant City, Fla. intsxn. being cancelled.)

(28) KNOB, ARIZ. INTSXN - the intsxn of the Phoenix, Ariz. VOR 350° mag radial and the Hassayampa, Ariz. VOR 055° mag radial.

(29) LEE, FLA. (VHF) INTSXN - the intsxn of the Tallahassee, Fla. VOR 088° mag and the Valdosta, Ga., VOR 180° mag radials.

(30) LEMON GROVE (LF) INTSXN - the intsxn of the E course of the San Diego, Calif. LFR and the 165°T bearing from the Miramar, Calif. rdo bcn.

(31) MT. ZION, ILL. INTSXN - the intsxn of the Roberts, Ill. VOR 214° mag radial (V-191) and the Springfield, ILL. VOR 097° mag radial (V-50).

(32) NORTH, WASHINGTON, D.C. INTSXN - the intsxn of the Washington, D.C. TVOR 023° mag radial and the Herndon, Va. VOR 110° mag radial.

(33) NORVELL, MICH. INTSXN - the intsxn of the Litchfield, Mich. VOR 082° mag radial (proposed Litchfield Windsor Airway) and the Lansing, Mich. VOR 150° mag radial (V-45).

(34) OCALA, FLA. (VHF) INTSXN - the intsxn of the Cross City, Fla. VOR 123° mag and the Lakeland, Fla. 345° mag radials.

(35) PARADISE, MO. INTSXN - the intsxn of the St. Joseph, Mo. VOR 141° mag radial and the Kansas City, Mo. VOR 012° mag radial (V-13, V-15E).

(36) PARK, MICH. INTSXN - the intsxn of the Salem, Mich. VOR 127° mag radial (V-26) and the Windsor, Ont. VOR 264° mag radial (proposed Windsor/Litchfield Airway).

(37) PERRY, FLA (VHF) INTSXN - the intsxn of the Cross City, Fla. VOR 331° mag and the Valdosta, Ga. VOR 187° mag radials.

(38) QUINTON, N. J. INTSXN - the intsxn of the Dover, Del. VOR 020° mag radial and the Woodstown, N. J. VOR 260° mag radial.

(39) QUITMAN, GA. (VHF) INTSXN - the intsxn of the Albany, Ga. VOR 150° mag and the Valdosta, Ga. VOR 270° mag radials.

(40) RANCH, ARIZ. INTSXN - the intsxn of the Prescott, Ariz. VOR 120° mag radial and the Phoenix, Ariz. VOR 350° mag radial.

(41) REEDY, S. C. (LF) INTSXN - the intsxn of the Greenville, S. C. ILS south localizer course and Spartanburg, S. C., LFR southwest course.

(42) ST. MARYS (VHF) INTSXN - the intsxn of the Jacksonville, Fla. VOR 008° mag and the Alma, Ga. 132° mag radials.

(43) STATE LINE, IND. INTSXN - the intsxn of the Lafayette, Ind. VOR 228° mag radial (V-72) and the Terre Haute, Ind. VOR 346° mag radial (V-171).

(44) SWAMP (VHF) INTSXN - the intsxn of the Jacksonville, Fla. VOR 288° mag and the Brunswick, Ga. VOR 235° mag radials.

(45) TAYLOR (VHF) INTSXN - the intsxn of the Jacksonville, Fla. VOR 272° mag and the Brunswick, Ga. VOR 235° mag radials.

(46) VINELAND, N.J. INTSXN - the intsxn of the Woodstown, N.J. 115° mag direct radial to the Atlantic City Intsxn, N.J. and Dover, Del. direct VOR radial to Coyle Intsxn, N.J. 245° mag radial.

(47) WALLACEBURG, ONT. (VHF) INTSXN - the intsxn of the Windsor, Ont. VOR 063° mag radial (proposed Windsor/London Airway V-98) and the Mt. Clements (Selfridge), Mich. VOR (127°T) 131° mag radial. (This agrees with the proposal of DOT Canada.)

(48) WILDWOOD, N.J. INTSXN - the intsxn of the Woodstown, N.J. VOR 163° mag radial and the Coyle, N.J. VOR 213° mag radial.

(49) WINLOCK (VHF) INTSXN - the intsxn of the W course of the Toledo, Wash. LFR and the 359°T radial of the Newberg, Oreg. VOR.

REDESIGNATE:

(1) BELLE, MICH. INTSXN - the intsxn of the Salem, Mich., VOR 082° mag radial (proposed Victor Arwy from the Salem VOR to the junction with V-42) and the Windsor, Ont. VOR 320° mag radial (V-42).

(2) BOOTHWYN, N.J. INTSXN - the intsxn of the Woodstown, N.J. VOR 335° mag radial to the intsxn of the SW course of the Philadephia, Pa. LFR and the NW course of the Milville, N.J. LFR.

(3) BRIDGEWATER, MICH. (LF) INTSXN - the intsxn of the W course of the Detroit, Mich. LFR and the Waterville, Ohio VOR 347° mag radial (projection of the radial forming realigned V-47)

(4) BRIDGEWATER, MICH. (VHF) INTSXN - the intsxn of the Salem, Mich. VOR 230° mag radial (V-11) and the Litchfield, Mich. VOR 082° mag radial (proposed Litchfield/Windsor Victor Airway).

(5) CANARD, ONT. INTSXN - the intsxn of the Salem, Mich. VOR 127° mag radial (V-26) and the Carleton, Mich. VOR 079° mag radial (formerly V-98, to be renumbered).

(6) DAWSONVILLE, VA. INTSXN - the intsxn of the Herndon, Va. VOR 051° mag radial and the Martinsburg, W.Va. 136° mag radial.

(7) DEERFIELD, MICH. INTSXN - the intsxn of the Carleton, Mich. VOR 237° mag radial (V-98) and the Waterville, Ohio VOR 347° mag radial (V-47).

(8) DELPHI, IND. INTSXN - the intsxn of the Indianapolis, Ind. VOR 340° mag radial (V-97) and the Lafayette, Ind. VOR 061° mag radial.

(9) ESSEX, ONT. INTSXN - the intsxn of the Windsor, Ont. VOR 150° mag radial (V-42) and the Carleton, Mich. VOR 079° mag radial (formerly V-98, to be renumbered.)

(10) HORTON, IND. INTSXN - the intsxn of the Indianapolis, Ind. VOR 020° mag radial (V-11) and the Lafayette, Ind. VOR 120° mag radial (V-128).

(11) MEAD, NEV. INTSXN - the intsxn of the Las Vegas, Nev. VOR 070° mag radial and the Mormon Mesa, Nev. VOR 169° mag radial.

(12) MIDCRAFT, MICH. INTSXN - the intsxn of the Salem, Mich. VOR 108° mag radial (V-116) and the 050° mag (back) course of the Ypsilanti (Willow Run), Mich. ILS lclzr.

(13) MILAN, MICH. INTSXN - the intsxn of the Carleton, Mich. VOR 267° mag radial (realigned V-10), the 230° mag (front) course of the Ypsilanti (Willow Run), Mich. ILS lclzr, and the Waterville, Ohio VOR 347° mag radial (realigned V-47).

(14) MONTICELLO, IND. INTSXN - the intsxn of the Chicago Heights, Ill. VOR 141° mag radial (V-97) and the Indianapolis, Ind. VOR 340° mag radial (V-97).

(15) NEWLAND, IND. INTSXN - the intsxn of the Chicago Heights, Ill. VOR 141° mag radial (V-97/V-7E/V-51E) and the Lafayette, Ind. VOR 351° mag radial (V-7E/V-51E).

(16) PELEE, ONT. INTSNX - the intsxn of the Windsor, Ont. VOR 150° mag radial (V-42) the Carleton, Mich. VOR 103° mag radial (V-10/V-188) and the Salem, Mich. VOR 127° mag radial (V-26).

(17) PITTSBORO, IND. INTSXN - the intsxn of the Indianapolis, Ind. VOR 323° mag radial (V-51/V-53) and the Terre Haute, Ind. VOR 054° mag radial.

(18) ROCKWOOD, MICH. INTSXN - the intsxn of the Salem, Mich. VOR 143° mag radial (V-133) and the Carleton, Mich. VOR 079° mag radial (formerly V-98, to be renumbered).

(19) ST. JOHNS (VHF) INTSXN - the intsxn of the Jacksonville, Fla. VOR 088° mag, Daytona Beach, Fla., VOR 360° mag and the Savannah, Ga. VOR 181° mag radials.

(20) SHELBY, ILL. INTSXN - the intsxn of the Chicago Heights, Ill. VOR 156° mag radial (V-7/V-51/V-57) and the Peotone, Ill. VOR 094° mag radial (V-38/V-144).

(21) SUTTON, W. VA. (MIXED VHF/L/MF) INTSXN - the intsxn formed by the Parkersburg VOR 130° mag and the Elkins VOR 249° mag radials.

(22) THAYER, ILL. INTSXN - the intsxn of the Chicago Heights, Ill. VOR 141° mag radial (V-97/V-7E/V-51E) and the Peotone, Ill. V-094° mag radial (V-38/V-144).

(23) TILBURY, ONT. INTSXN - the intsxn of the Windsor, Ont. VOR 100° mag radial (V-116) and the Carleton, Mich. VOR 079° mag radial (formerly V-98, to be renumbered).

(24) TIPTON, MICH. INTSXN - the intsxn of the Salem, Mich. VOR 230° mag radial (V-11) and the Litchfield, Mich. VOR 099° mag radial (realigned V-10).

(25) ZIONSVILLE, IND. INTSXN - the intsxn of the Indianapolis, Ind. VOR 020° mag radial (V-11) and the Lafayette, Ind. VOR 133° mag radial.

CANCEL:

(1) ABERNANT, ALA. INTSXN - the intsxn of the Birmingham, Ala. 223° mag radial and the Tuscaloosa, Ala. 080° mag radial.

(2) BRADFORD, ALA. (LF) INTSXN - the intsxn of the Birmingham, Ala 355° maf and the Anniston 287° mag radials.

(3) CALERA, ALA. (VOR) INTSXN - the intsxn of the Anniston 230° mag and the Birmingham 178° mag radials.

(4) CALUMET, ILL. INTSXN - the intsxn of the Chicago Heights, Ill. VOR 007° mag and the Naperville, ILL. VOR 106° mag radials.

(5) ELOISE, MICH. INTSXN - the intsxn of the 032° mag (back) course of the Detroit (Wayne-Major), Mich. ILS lclzr and the 124° mag radial of the Salem, Mich. omnirng.

(6) HINDSBORO, ILL. INTSXN - the intsxn of the Vandalia, Ill. VOR radial directed toward the Lafayette, Ind. VOR and the Terre Haute, Ind. VOR radial directed toward the Springfield, Ill. VOR.

(7) NARROWS, ALA. INTSXN - the intsxn of the S course of the Birmingham LFR and the Anniston VOR 250° mag radial.

(8) OGDEN, MICH. INTSXN - the intsxn of the 330° mag radial of the Waterville, Ohio omnirng and the 239° mag radial of the Carleton, Mich. omnirng.

(9) PERRYSVILLE, IND. INTSXN - the intsxn of the Terre Haute, Ind. omnirng radial directed toward the Peotone, Ill. omnirng and the Lafayette, Ind. omnirng rad directed toward the Vandalia, Ill. omnirng.

(10) RIVERSIDE, ONT., CANADA INTSXN - the intsxn of the Carleton, Mich. VOR 055° mag radial and the Salem, Mich. VOR 101° mag radial.

(11) SPRINGVILLE, ALA. (VHF) INTSXN - the intsxn of the Birmingham 041° mag and the Anniston 307° mag radials.

(12) SPRINGVILLE, MICH. INTSXN - the intsxn of the 274° mag radial of the Carleton, Mich. VOR and the 150° mag radial of the Lansing, Mich. VOR.

(13) STEPPVILLE, ALA (VHF) INTSXN

(14) STERRETT, ALA. (VHF) INTSXN - the intsxn of the Birmingham 135° mag and the Anniston 250° mag radials.

(15) SYLACAUGA, ALA. (VHF) INTSXN - the intsxn of the Birmingham 135° mag and the Montgomery 355° mag radials.

(16) WARREN, MICH. INTSXN - the intsxn of the Salem, Mich. omnirng 082° mag radial and the NW course of the Windsor, Ont. Canada, LFR.

(17) WOLF LAKE, MICH. INTSXN - the intsxn of the 252° mag radial of the Salem, Mich. VOR and the 150° mag radial of the Lansing, Mich. VOR.

NON-STANDARD HOLDING PATTERNS: The following non-standard holding patterns are established and shall become effective 31 May 1956:

(1) AUBURN, MICH. INTSXN - direction of holding - NW on Windsor VOR 320° mag radial; direction of turn - LEFT; time - two minutes; minimum altitude - 2700'.

(2) BLUE JACKET, FLA. INTSXN - direction of holding - S on Jacksonville, Fla. VOR 173° mag radial (inbound course 092° mag); direction of turn - RIGHT; time - one minute; minimum altitude - 1200'.

(3) BRIDGEWATER, MICH. (LF) INTSXN - direction of holding - W on W course Detroit LFR; direction of turn - LEFT; time - one minute; minimum altitude - 2300'.

(4) BRIDGEWATER, MICH. (VHF) INTSXN - direction of holding - W on Litchfield VOR 082° mag radial (proposed Litchfield/Windsor Arwy); direction of turn - LEFT; time - one minute; minimum altitude - 2000'.

(5) BRYCEVILLE, FLA. (LF) INTSXN - direction of holding - W on W course Jacksonville, Fla. LFR (inbound course 090° mag); direction of turn - RIGHT; time - one minute; minimum altitude - 1200'.

(6) BRYCEVILLE, FLA. (VHF) INTSXN - direction of holding - W on Jacksonville, Fla. VOR 272° mag radial (inbound course 092° mag); direction of turn - RIGHT; time - one minute; minimum altitude - 1500'.

(7) FORT WAYNE, IND (VHF) INTSXN - direction of holding - W of facility on 277° mag radial (V-144); direction of turn - LEFT; time - two minutes; minimum altitude - 2200'.

(8) GLENVIEW, ILL. (LFR) INTSXN - direction of holding - NW; direction of turn - LEFT; time - one minute; minimum altitude - 2000'.

(9) HUECO, TEX. (LF) INTSXN - direction of holding - E on E course of El Paso, Tex. LFR (inbound course 258° mag); direction of turn - LEFT; time - two minutes; minimum altitude - 7000'.

(10) MILAN, MICH INTSXN - direction of holding - SW on 230° mag (front) course of the Ypsilant ILS lclzr; direction of turn - RIGHT; time - one minute; minimum altitude - 2000'.

(11) MOLINE, ILL. (LF) INTSXN - direction of holding - W; direction of turn - LEFT; time - two minutes; minimum altitude - 2000'.

(12) PARADISE, MO. INTSXN - direction of holding - N of intsxn of 012° mag radial; direction of turn - RIGHT; time - one minute; minimum altitude - 2400'.

(13) PARK, MICH. INTSXN - direction of holding - SE on Salem, Mich. VOR 127° mag radial (V-26); direction of turn - RIGHT; time - one minute; minimum altitude; 2300'.

(14) QUINTON, N.J. INTSXN - direction of holding - S of intsxn on 020° mag radial of Dover, Del. VOR; direction of turn - RIGHT; time - one minute.

(15) ST. MARYS, FLA. (VHF) INTSXN - direction of holding - N on Jacksonville, Fla. VOR 008° mag radial (inbound course 188° mag); direction of turn - RIGHT; time - one minute; minimum altitude - 1200'.

(16) SUNBEAM, FLA. (LF) INTSXN - direction of holding - S on SE course Jacksonville, Fla. LF rng (inbound course 338° mag); direction of turn - RIGHT; time - one minute; minimum altitude - 1200'.

(17) SUNBEAM, FLA. (VHF) INTSXN - direction of holding - S on Jacksonville, Fla. VOR 163° mag radial (inbound course 343° mag); direction of turn - RIGHT; time - one minute; minimum altitude - 1200'.

CANCEL - The following non-standard holding pattern is cancelled effective immediately:

(1) FAYETTEVILLE, N. C. Rdo bcn.

FLIGHTS IN GRAND CANYON NATIONAL PARK: Pilots are cautioned that any unauthorized flight below the rim of the Canyon within the Park boundaries will constitute an undue hazard to persons or property and will subject the pilot to appropriate violation action. Grand Canyon National Park Regulations prohibit the landing of any aircraft within the boundaries of the Park.

FLIGHT INFORMATION MANUAL CORRECTIONS: Correct Flight Information Manual, Volume 9, dated June 15, 1955 as follows:

(1) Page 22 - Denver, Colo.: Correct WB telephone number to read: FLorida 5-6878.

(2) Page 25 - Utica, New York: Correct CAA telephone number to read: UTica 6-9023.

AERONAUTICAL CHARTS OF THE U. S. COAST AND GEODETIC SURVEY

New editions of the charts listed below will be published in about one month making former prints obsolete for use in avaition. Orders for these particular charts should be kept to a minimum until new edition is printed.

Bellingham	Portland	Yellowstone Park
Douglas	San Diego	WAC 136
Pocatello	Seattle	WAC 193

NEW EDITIONS

A new edition or new chart for the charts listed below is now available for issue. Former prints should be destroyed or stamped "OBSOLETE FOR USE IN AVIATION."

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) - Month and day item was reported.
** - New or revised airport, caution area or miscellaneous data. Pilots should inscribe this information on charts and records.
★ - New or revised radio data. Pilots should inscribe this information on charts and records.
NOTE - Such items usually are cited only once, because of space limitations. Examples: erection or removal of radio or television towers, water tanks, oil derricks and permanent airport obstructions.

ALABAMA: **ANNISTON-RADIO:** VOR courses 360°-070° not usable acct course bends and roughness.

BIRMINGHAM-RADIO: VOR operg on test-basis. (4-27)

BIRMINGHAM ARPT: Caution-traffic operg in area from 165° clockwise thru 235° not visible from twr to dist of 4 s mi. Rnwy 8-26 perm closed to high performance single engine conventional lndg gear type acft, including T-6. (4-8)

CLANTON-GRAGG ARPT: Closed - const. (3-21)

DOTHAN-NAPIER FLD: Caution - helicopters from Rucker Army Air Base trng.

ELBA MUN ARPT: Unattended. Lgts on req. (4-27)

EVERGREEN-RADIO: VOR radials 320° thru N unusable acct severe scalloping and bends.

GUNTERSVILLE ARPT: Closed. (3-26)

HUNTSVILLE-RADIO: VOR radials 005°-030° unusable due to roughness and bends. (5-11)

HUNTSVILLE MUN ARPT: Caution - rnwy 18-36 under const.

**MONTGOMERY-DANNELLY FLD: Taxiway from rnwy 15 to E/W taxi strip perm clsd. Dips in E/W rnwy 1500' from E end. Lgtd ditch approx 200' NE of apch end rnwy 21. Acft landing and taking off are cautioned to avoid Maxwell AFB tfc pat. and control zone. Due to non-visibility twr unable to ctl tfc on E/W parallel taxi strip W of a point adj to Air National Guard hangar. Rnwy 15-33 open lgt acft xcpt first 500' from NW end unusable - holes.(3-16)

MUSCLE SHOALS-RADIO: VOR courses 020°-050°, 110°-150° and 285°-335° clockwise from stn not usable beyond 15 n mi acct scalloping and bends. (4-22)

TUSCALOOSA-VAN DE GRAAFF ARPT: Tow car pulling glider intermittently on rnwy daylgt hrs durg VFR.

ARIZONA: **SPECIAL NOTICE:** Until July 24, 1956, captive balloons will be flown nightly from one hr after sunset to one hr before sunrise at lctns 10 mi W Gila Bend AF Aux, 2 mi S Sentinel and 3 mi E Dateland, Ariz. Surface to 1500' and lgtd by one red lgt. Extreme caution when flying at low alts near these lctns. (12-27)

AJO ARPT: Beacon and lights inoperative. (4-3)

★**COCHISE-RADIO:** VOR/DME flgt -checked, opern normal. Coverage 015-045°, 30 n mi; 090°-110°, 40 n mi; 190°-215°, 35 n mi; 215°-235°, 30 n mi; 235°-255°, 35 n mi at MEA. VOR freq changed from 112.1 mc to 117.7 mc. (4-28)

DATELAND: Captive balloons anchored on 1500' cables will be flown 1700M Mondays thru 2400M Thursdays at Dateland and Gila Bend Aux AFB, Ariz., for approx 6 weeks. Extreme caution advised-low altitudes near these lctns. (3-12)

GILA BEND-RADIO: VOR has slow bends and scalloping starting at approx 25 to 30 n mi on 247° radial and at 30 to 35 n mi on 106° radial.

HASSAYAMPA-RADIO: VOR/DME usable to 30 n mi from 30° - 70°, 240°-255°, 320°-345° and 40 n mi from 70°-85° at MEA. (3-30)

**KINGMAN: Effective April 17, 1956 Caution Area C-417 rescinded.

PHOENIX-RADIO: LFR has severe interference during hrs of darkness. About May 1, VOR/DME will be shut down until approx June 1 - modernization. During shutdown, the following Victor Arwys are unusable for instr opern: Victor 95 Phoenix - Winslow; V-105, Phoenix-Prescott; V16 Hassayampa - Toltex Intersection. (4-16)

PHOENIX-LUKE AFB-RADIO: USAF VHF/DF unreliable below 13,000' beyond 30 n mi in WNW quad. (2-2)

PHOENIX-SKY HARBOR ARPT: Clsd to mil F-89 type acft or acft rqrg use of after burners for take-off, xcpt prior permission arpt manager. (4-11)

ARIZONA: PRESCOTT-RADIO: VOR coverage 185°-225°, 35 n mi at 10,000'; 135°-145° and 165°-185°, 39 n mi at 10,000'.

SALOME, SITE #27B, LAX-PHX: Closed. (12-14)

SCOTTSDALE-THUNDERBIRD #2 ARPT: Closed. (3-26)

TUCSON-RADIO: About May 1, VOR/DME will be shut down until approx June 1. (4-6)

TUCSON-DAVIS MONTHAN AFB-RADIO: USAF VHF and UHF - steers unrel beyond 35 mi at or below the following alt:(a) NW quad 10,000'; (b) SW quad 10,000'; (c) SE quad 12,000'; (d) NE quad 13,000'.

YUMA-RADIO: Mar 12 VOR shut down until approx May 12. (3-13)

YUMA-COUNTY ARPT: B-45 type acft towing 5000' of cable and tow target in vcnty. All acft refrain from flying in close proximity to B-45 type acft in Yuma area.

ARKANSAS: EL DORADO-RADIO: DME 2000'MSL coverage 43. 5 mi 325° thru N to 225°; 2000' MSL coverage 35 mi 225° thru W to 325°. (3-30)

FAYETTEVILLE-RADIO: About May 7, VOR will be shut down approx June 4 - modernization. (3-28)

★FT. SMITH-RADIO: April 13, ILS relctd, flgt-checked and recmsnd. Freq: 109.5 mc, with voice. Ident: FSM. Glide slope freq: 332.6 mc. OM and LOM lctd 3.7 s mi from apch end rnwy at lat 35-20-45, long 94-17-30. Freq: 219 kc. Ident: FS. MM and LMM lctd 0.73 s mi at lat 35-20-18, long 94-20-44. Freq: 201 kc. Ident: SM. Apch bear: 253°. Alt over OM 1530' MSL, over MM 725' MSL. Glide slope 1200' in from apch end of rnwy and 400' S edge of rnwy. Lclzr 1675' SW of end of rnwy. BC-unusable. (4-17)

FT. SMITH ARPT: 136' lgtd drilling derrick erected 0.5 mi W and 1.0 mi S of E/W rnwy.

HARRISON ARPT: New NW/SE rnwy under const. (2-14)

HAZEN ARPT: Caution - E/W rnwy closed. Men and equip. on fld. (11-21)

NORTH LITTLE ROCK-CENTRAL ARPT: Fld closed to all operns - const. (3-1)

TEXARKANA-RADIO: VOR 143° radial to rnwy 13 beyond tolerance due to roughness and bends.

WALNUT RIDGE-RADIO: VOR radials 290°-320°, 120°-150° and 200°-210° unusable acct bends and course roughness.(10-14)

CALIFORNIA: SPECIAL NOTICE: Until May 2, Navy blimp will oper intermittently in vcnty of Wilmington and Dominguez, Calif. from surface upward in connection with Los Angeles air pollution control. Flgts will originate at Santa Ana Lighter Than Air Base, will cross at Newport Beach and proceed seaward to Wilmington for opern in both areas. Return flgt will be reverse of outbnd flgt. Operns will be conducted in conditions down to 500' ceiling and 1/2 mile visibility.

ARCATA ARPT: Experimental testing of rotating lgts in inner apch zone of Rnwy 31 at infrequent times. Rotating lgts at 2100' and 1000' S of threshold of rnwy with six high intensity lgts rotating at 6 or 12 rpm.

AUBURN ARPT: Clsd to hvy acft. Lgt acft use extreme caution acct soft rnwys. (11-24)

★BAKERSFIELD-KERN COUNTY ARPT-TOWER: Effect April 29, hours of opers 0500 - 2100. (4-10)

BLUE CANYON, #13, SFO-SLC: Closed durg winter months. (12-21)

BLYTHE-RADIO: DME coverage 165°-188°, 39 n mi at 7000'; 189°-200°, 26 n mi at 6000'; 200°-220°, 39 n mi at 6000'; 220°-293°, 43 n mi at 9000'; 293°-310°, 26 n mi at 9000'; 310°-327°, 35 n mi at 9000'. About May 1, VOR will be shut down until approx July 1. During this period, the following arwys will not be usable: Victor 64 Thermal to Blythe; V-16 Palm Springs Intersection to Hassayampa, Ariz; V-135 Needles to Yuma, Ariz. (4-12)

**BORREGO VALLEY-SAN DIEGO COUNTY ARPT: 140' lgtd microwave twr erected 1000 ft. NW of W end of the E-W rnwy and approx 2½ mi E at lat 33 -15 -48 , long 116-19-46.(4-6)

CAMARILLO-RADIO: All courses have multiples. (6-17)

**CORNING ARPT: Reopened. Fuel: F2. (4-9)

CRESCENT CITY-RADIO: VOR arwy radials flgt-checked. Courses 90°-330° usable dist 22 n mi; 350°-90°, 26 n mi at 7000'; 43 n mi at 8000'.

DAGGETT-RADIO: VOR flgt-checked on arwy radials only.

FAIRFIELD-TRAVIS AFB-RADIO: USAF VHF/DF bearings and communications in NW quad unreliable below 8500'. Opers 0700-1600 Mon-Fri training status only. (7-5)

FILLMORE-RADIO: VOR coverage 320°-355°, 35 n mi at 11,000'; 280°-320°, 26 n mi at 11,000'. (9-17)

FT. JONES-RADIO: VOR has lgt course roughness all quads. Only arwy radials flgt-checked.

FORTUNA-RADIO: VOR has light to moderate scalloping beyond 26 n mi. Only arwy radials flgt-checked. (10-6) DME coverage 335°-350°, 43 n mi at 3000'; 350°-10°, 43 n mi at 8000'; 10°-30°, 43 n mi at 9000'; 30°-120°, 35 n mi at 9000'; 120°-150°, 35 n mi at

CALIFORNIA: 6500'; 150°-335°, over water, not checked.

FRESNO AIR TERMINAL: Exercise extreme caution in vcnty, particularly when using VOR arwys. Jet acft climbing and descending in areas of extended centerlines rnwys 29-11 and areas N and E of arpt. (10-28)

FULLERTON ARPT: Attended daylight hrs only. (4-12)

FURNACE CREEK SITE 17 RIV-DLS: N 1200' of rnwy clsd to all operns-mrkd. Entire fld clsd to all hvy or multi-eng acft. S 4500' of rnwy open to lgt acft-caution. (4-3)

KLAMATH-McBETH ARPT: Closed. (1-3)

LONG BEACH-RADIO: DME coverage 43 n mi as follows: 280°-305°, 5000'; 305°-340°, 7000'; 340°-040°, 12,000'; 040°-070°, 8000'; 070°-100°, 7000'; 100°-280°, 4000'. (6-16) ILS and LF rng during VFR conditions heavy simulated instrument apch traffic. (10-25)

**LONG BEACH ARPT: Several 230' MSL portable oil derricks NW, W and S of fld. (10-21) No fuel servicing avail. for civil acft 2400-0600. (11-1) N 800' apch end rnwy 16L perm closed. (1-23)

LOS ANGELES-RADIO: VOR coverage 275°-315°, 30 n mi at min en route alt. Light to moderate scalloping below 3000' MSL. (6-4)

LOS ANGELES AIR ROUTE TRAFFIC CONTROL CENTER: Center will activate high alt sector 0900 Mar 20. Sector will control all acft operg at specific alt at or above 25,000'. One thousand on top flgt will NOT be controlled by this sector. All military acft operg at specific alts should contact the Los Angeles ARTC Center on 301.4 mc as soon as possible after departure from within the Los Angeles Control area or after entering the area inbound. (3-12)

LOS ANGELES INTERNATIONAL ARPT: Use paved areas only. New lgtd rnwy 16-34 approx 4000' W of Sepulveda Blvd open VFR tfc only. Equip. on and adj to const areas. Pilots are urged to use extreme cau tion when operg off-shore just W of arpt. All jet acft departing rnwys 25L-25R climbing in VFR conditions use a 200° departure corridor which originates at a maximum of 3000' MSL approx the intersection of the extended centerlines of the above rnwys with the shoreline. Acft proceeding E-bound from Malibu Intersection in VFR conditions making a track which approximates the extended centerlines of the above rnwys are cautioned not to descend below 4000' MSL until passing the Shoreline or Del Rey FM unless cleared otherwise by ATC. Jet acft pat down-wind leg is 2500'. Acft not intending lndg at arpt should avoid apch areas to W and E below 3000' in VFR wea. Recommend cross tfc plan crossing course at 3000' or above, ceiling permitting, directly over arpt, or between LF rng and arpt. Avoid shoreline W due high performance of departing jet acft. Due non-visibility twr unable ctl tfc on last 2400' rnwy 34. (2-10)

LOS ANGELES-SAN FERNANDO VALLEY ARPT: Tfc direction indicator inop 2300-0700.

MODESTO-RADIO: Mar 20, VOR shut down until approx May 20 - modernization. (3-20)

OAKLAND: Pilots proposing transbay flgt should ascertain that VFR wea exists within both the San Francisco and Oakland Control Zones, or should obtain ATC clearance for flgt within a ctl zone when wea is less than VFR, since ceiling and visibility mid bay is frequently less than at the two terminals. Tfc operg in VFR wea should avoid vcnty of Alameda NAS. Extensive tfc including jets operate in tfc pat up to 2000' within a radius of 1.7 n mi of the fld. Exercise extreme caution in these areas.

OAKLAND-RADIO: VOR coverage 35 n mi N thru E at min instr alt. (1-14) DME coverage 30°-60°, 26 n mi at 5000'; 60°-80°, 35 n mi at 5000'; 280°-290°, 35 n mi at 4000'; 340°-350°, 35 n mi at 6000'; 350°-030°, 17 n mi at 4000'.

OAKLAND INTERNATIONAL ARPT-TOWER: ASR will issue distance values in nautical miles in connection with radar control. UHF/DF steers unreliable below 7,000' within 10 of stn. (4-24) FLD: Dredging and clam shell equip. working S of lndg area. All booms and equip. lgtd and mrkd. Use extreme caution when flying over or within this area.(9-30)

OCEANSIDE-RADIO: VOR coverage 310°-020°, 35 n mi at min en route alt. (10-10)

ONTARIO-RADIO: DME coverage 135°-150°, 26 n mi at 7000'; 150°-200°, 17 n mi at 7000'; 200°-280°, 35 n mi at 7000'; 330°-350°, 26 n mi at 13,000'; 350°-0°, 35 n mi at 13,000'. About May 1, VOR will be shut down until approx June 1. (2-8)

**ONTARIO INTERNATIONAL ARPT: Make turns on or off taxiway south side runway 7-25 at intersections only. Engine runups in take-off position runway 7-25 prohibited less than 200' from ends of runway as marked by yellow paint lines either side. Hi-intensity runway lights operate runway 7-25. (4-27)

OXNARD AFB-RADIO: USAF VHF/DF unreliable below 12,000' within 50 n mi. (4-20)

**OXNARD-VENTURA COUNTY ARPT: 160' lgtd derrick erected 700 ft N center of arpt.

PALMDALE-RADIO: VOR coverage 120°-150°, 35 n mi at 10,000'; 150°-180°, 35 n mi at 9000'. (3-14)

CALIFORNIA: PASO ROBLES-RADIO: DME coverage 220°-235°,35 n mi at 6000'; 235°-245°, 26 n mi at 6000'; 245°-270°, 35 n mi at 6000'.

**PLACERVILLE-EL DORADO COUNTY ARPT: Formerly carried as Placerville Mun Arpt.

QUINCY-GANSNER FLD: E 700' E/W rnwy and taxi strip unusable. (1-3)

**RAVENDALE ARPT: Correct lat and long: 40-48-15, 120-22-00. Elevation: 5300'. (4-16)

RED BLUFF-RADIO: DME coverage 180°-208°, 26 n mi at 9000'; 208°-217°, 26 n mi at 10,000'; 217°-235°, 35 n mi at 10,000'. Apr 19, VOR shut down until approx June 1, freq will be changed to 115.7 mc. During shut-down, the current Victor arwys may be used as direct routes using Red Bluff LFR, provided acft are equipped with ADF. MEAs remain the same as currently estab on Victor Arwys.

RIDGECREST-DAVIS ARPT: Lgts inop. (4-11)

RIVERSIDE-RADIO: USAF VOR unreliable. (6-20)

SACRAMENTO-RADIO: Disregard spurious signals and interruptions in service of voice commun INSACS and twr until approx April 30-modernization. (3-30) About May 15, VOR will be shut down until approx July 15-modernization. During this period the following Victor Arwys are affected: V-150 Sacramento to West Point intersection may be used utilizing 082° bear. from Sacramento LFR provided acft is equip. with ADF; MEA westbound 5000', Eastbound 8000'; Modesto VOR to Williams VOR direct MEA 3000'. Following arwys are not usable: V-23 Sacramento to intersection with V-200;V-195 Rio intersection to Williams;V-6 Rio intersection to Reno·V-6N Sacramento to Mt. Lola intersection; V-212 Auburn intersection to Reno. (4-16)

SACRAMENTO ARPT-TOWER: Voice on ILS freq 110.3 mc out of service. (4-27) FLD: Twr tfc operg in SW quad should exercise caution acct extensive simulated inst apchs including jets VFR weather actual apchs IFR weather. (4-2)

SACRAMENTO-McCLELLAN AFB-RADIO: USAF H fac unreliable beyond 15 mi.

SALINAS-RADIO: VOR coverage 20°-95° and 135°-295°, 35 n mi at min instr alt. DME coverage 20°-44°, 26 n mi at 7000'; 44°-49°, 17 n mi at 7000'; 49°-90°, 26 n mi at 7000'; 90°-130°, 43 n mi at 7000'; 130°-145°, 26 n mi at 7000'; 145°-153°, 17 n mi at 7000'; 153°-180°, 26 n mi at 7000'; 180°-225°, 43 n mi at 7000'; 225°-300°, 43 n mi at 5000'; 300°-20°, 43 n mi at 7000'.

SAN DIEGO-RADIO: VOR coverage 50 mi MEA all quads except 20 mi MEA from 310° to 330°. (10-25)

★SAN DIEGO-LINDBERGH FLD-TOWER: April 20, trans & rcvr 348.6 mc cmsnd. FLD: 500' W end rnwy 9-27 clsd - jet barrier. (2-29)

SAN FRANCISCO: See Oakland Control Zone Notam.

★SAN FRANCISCO-RADIO: June 25, 1955, ctl of all domestic air/ground voice freqs including VOR and LF ranges was transferred to Oakland INSACS. Acft calling San Francisco will receive reply from Oakland using San Francisco as the ident. Pilot briefing and other services at San Francisco remain unchanged. (6-27-55) DME coverage 10°-30°, 17 n mi at 5000'; 30°-85°, 26 n mi at 7000'; 85°-100°, 35 n mi at 7000'; 160°-180°, 26 n mi at 5000'; 180°-225°, 17 n mi at 5000'; 225°-265°, 26 n mi at 5000'; 345°-10°, 35 n mi at 4000'

SAN FRANCISCO INTERNATIONAL ARPT-TOWER: Interference on 119.1 mc vicinity ILS OM. (4-24)

SAN FRANCISCO GAP-RADIO: Homing fac unreliable in area 25° thru E to 130°. (11-15)

NEW YORK CITY-SPECIAL NOTICE: Unless authorized by ATC all acft shall follow standard left-hand rectangular tfc pat. within 4.3 n mi radius of arpt; in lndg join tfc pat. at or above 1200'MSL, weather premitting. This applies to New York International (Idlewild) Arpt; La Guardia Fld, N.Y., and Newark Arpt, N.J.
**NEW YORK CITY-SPECIAL NOTICE: Beginning the night of May 3 at 2000 and each night thereafter the Empire State Bldg searchlight beacons will operate until 0100 when the north, east and west lgts will be extinguished. South beacon pointing southward will remain on in fixed position until 15 minutes before sunrise. (4-27) Four 60-inch searchlight beacons showing clear have been installed on the Empire State Bldg at lat 40-44-50, long. 73-59-00. The beacons are powered by 2500 watt mercury arc lamps. One beacon will be installed on each side of the tower at the base of the mooring mast section, about 1140'MSL. The beacons will rotate horizontally, counterclockwise, at an angle of not less than 5° above horizontal and at a speed of 1 r.p.m. Except when each beacon approaches the building in its sweep, all of the beacons will point in the same direction at any given time. As each beacon approaches the building in turn, it will swing upward, be directed on the tower, and then swing downward back to its position 5° above horizontal. Thus, while two beacons are rotating in their nearly horizontal position, the other two will be in the midst of either an upward or downward sweep. The beacons will go on and off by means of a time clock with an astronomical dial. When the beacons are turned on, it will take approximately ten minutes for them to reach full strength. (4-12)
NEW YORK INTERNATIONAL (IDLEWILD) ARPT: Lndgs and take-offs prohibited unless aircraft equipped with two-way radio. Closed to fighter type aircraft. Closed military aircraft except on official business or flag rank or higher. Closed to motorless aircraft. Closed to jet propelled aircraft except prior permission of airport manager. Rnwy 1L-19R and 7L-25R permanent closed for landings and take-offs, both available for taxiing. Rolling surface conditions between southerly end runway 1R-19L and 7R-25L. Caution. Taxiway X, east of taxiway CC closed to aircraft movement. Use paved surfaces only. NATCC preferential runways system in effect. 185'MSL control tower - highest airport structure. Follow exact centerline when using taxiway CC at road overpass. Caution - taxiing taxiway A - aircraft running up on closed runways 7L-25R, S of intersection with runways 13L-31R. No through taxiing past gates 7A-8A. Access to gates 1E to 7A via taxi B. Access to gates 8A to 25 via taxi C. Construction in progress adjacent all paved surfaces. 150' cranes and heavy truck operations within airport boundary - marked. Runway 1R-19L closed - available taxiing only. (4-2) Taxiway H now in operation. (4-12)

NEW YORK: NEW YORK-LA GUARDIA FLD-TOWER: ADF on LOM subject to 30° oscillations in W quad. All inbound acft shall make initial contact with La Guardia Apch ctl on 119.9 mc regardless of weather. No UHF freqs avail. for twr contacts. FLD: Closed to fighter type acft. Clsd to all military acft xcpt those carrying high government officials. See Special Notice under New York City. Pilots adhere strictly to CAA approved tfc pat. An 8' by 4' open ditch adj to dike located 100' from apch end of rnwys 22, 27, 13, 31. Transient helicopters land N of bullseye at Marine Air Terminal. Lndgs and take-offs prohibited unless acft equipped with functioning radio capable of 2-way direct commun with ctl twr. All acft must be equipped with the CAA assigned freq for direct commun with ctl twr, on ground ctl 121.7 mc. Clsd to jet propelled acft.

PUERTO RICO: ✱SAN JUAN-ISLA GRANDE ARPT-TOWER: Hrs. of opern 1000-0200. (4-23)

SAN JUAN-PUERTO RICO INTERNATIONAL ARPT: Parking circles 2, 3, 4 and 5 on N departure ramp not fully visible from twr - caution. (6-7)

Attention, Pilots!

CHECK YOUR AERONAUTICAL CHARTS AND MAKE SURE THAT EACH OF THE OBSTRUCTIONS LISTED BELOW IS CARRIED!
IF ANY ARE MISSING, INSERT THEM NOW, DON'T DELAY! ONLY YOU CAN MARK YOUR CHARTS: IT IS YOUR RESPONSIBILITY!

This list covers recent obstructions(television towers, smoke stacks, etc.) which are 500 feet or more above the ground. It will be carried in the Airman's Guide at frequent intervals. When the list does not appear in the Guide, all new obstructions will be carried as two-starred items in the NOTAMS. The list will be brought up to date each time it is issued; newly added or changed material will be indicated by arrows.

The Coast and Geodetic Survey sectional charts show all known dangerous obstructions at the time a particular chart is issued. As these charts are published at intervals of six months to a year, dangerous obstructions built during the interim between issues must be placed on the charts by the user. The position height and top elevation above MSL of these new obstructions can be taken from the list given below. New obstructions will be carried in this list until six months after the issuance of the sectional charts depicting the obstruction data and then deleted.

WYOMING

LEGEND:

"B" denotes antenna structure on a building.
DISTANCE is given in nautical miles.
BEARINGS are true.
(MSL) Mean Sea Level.
(AGL) Above Ground Level.

LOW FREQUENCY RANGE PROCEDURES

If an LFR instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument approach procedure, unless an approach is conducted in accordance with a different procedure for such airport authorized by the Administrator of Civil Aeronautics. Initial approaches shall be made over specified routes. Minimum altitude (s) shall correspond with those established for en route operation in the particular area or as set forth below.

AIR NAVIGATION RADIO AIDS

ALWAYS CHECK NOTICES TO AIRMEN SECTION

INSACS = Interstate Airway Communications Station/s (CAA)

VHF OMNI-RANGE: "Non-commissioned" VHF omni-ranges may lack certain items, such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly.

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES: Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated INSACS. (C) The station identification is monitored continuously by the communicator at the associated INSACS. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated INSACS. Category I (VOR) = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category I are met. NOTE: Category II indicated by parenthetical (2). Category III = Facility monitored soley through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an INSACS, and located too distant from INSACS to be monitored with a VHF receiver will fall into Category III. NOTE: Category III indicated by parenthetical (3).

NOTE: Letters between range courses are quadrant identifiers, e.g., "90 YN 180", indicates the quadrant between the two courses is a yellow N quadrant. The letter immediately following a range course indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual: "A" or "N" aural. In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

LEGEND

(A) = Air Force facility. (N) = Navy facility. (P) = Private facility. (S) = State facility.
(g) = Twr equipped with 121.9 mc or (g.7)=Twr equipped with 121.7 mc for ctl of gnd traffic.
(0700-2300) = Hours of operation local time.
(3) = Monitoring category
(B) = Blue Hemisphere. (Y) = Yellow Hemisphere
→ New or revised data
• = Automatic voice identification
[redacted] Information deleted.

RADIO CLASS DESIGNATIONS

AC. . . . . Approach Control Tower, CAA (transmits on voice channel of associated ranges and ILS in addition to frequencies listed)
B. . . . . Scheduled Broadcast Station (broadcasts weather at 15 and 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C. . . . . Control Tower, CAA
CI. . . . . Control Tower, (City, County, Private, etc.)
D. . . . . Distantly controlled
DME. . . . Distance Measuring Equipment
FM. . . . . VHF fan marker (100 watts)
GCA. . . . Ground Controlled approach system
H. . . . . Non-directional radio beacon (homing), power 50 watts to less than 2000 watts
HH. . . . . Non-directional radio beacon (homing), power 2000 watts or more
ILS. . . .. Instrument Landing System (voice on localizer channel)
J. . . . . L/MF (200-415 kc) voice facility on other than range frequency
LFM. . . . VHF fan marker, low powered (5 watts)
LMM. . . Compass locator station when installed at middle marker site
LOM. . . . Compass locator when installed at outer marker site
LVOR. . . Low power VOR (with standby equipment)
MH. . . . . Non-directional radio beacon (homing) power less than 50 watts
ML. . . . . Range (loop radiators), power less than 50 watts
MM. . . . VHF middle marker
MOR. . . . Low frequency omni-drectional range
MRA. . . . Range (adcock, vertical radiators), power 50 or more, but less than 150 watts
MRL. . . . Range (loop radiators), power 50 or more, but less than 150 watts
OM. . . . . VHF outer marker
P. . . . . Point-to-Point radio
RA. . . . . Range (adcock, vertical radiators), power 150 watts or more
RAPCON Radar Approach Control Center.
RL. . . . . Range (loop radiators), power 150 watts or more
S. . . . . Simultaneous range, homing and voice signals available. Inclusion suffix "W" indicates range and homing signals only
T. . . . . Teletype
TVOR. . . Low power VOR (no standby equipment) located on airport
TX. . . . . Principal teletype
V. . . . . Additional VHF voice feature on other than range frequency
VAR. . .. Visual-aural VHF range
VOR. . . . VHF omni-directional range (omni-range)
W. . . . . Without voice facilities on range frequency
Z. . . . . VHF station location marker at a range station

NOTES

1. Range courses are magnetic in-bearings
2. All CAA MH facilities operate continuously unless cited as follows: (on req)
3. All CAA ranges operate continuously. Those which are not manned continuously are cited in the remarks column with hours of operation in parentheses, e.g., (0600-2400)
4. VHF and LF/LMF ranges listed with the same identifier are controlled by the same INSACS. Due to space limitations the DTV and communication frequencies which are listed with the LF/LMF facility are not repeated with the VOR facility

Pilots are requested to indicate when calling C.A.A. airway communications stations and control towers the frequency on which the reply is expected.

RADAR AVAILABLE : How and Where

(15 May 1956)

PAR = Precision Approach Radar. ASR = Airport Surveillance Radar. GCA = Ground Controlled Approach - Military Equivalent of Combined ASR and PAR Equipment. TASR = Terminal Area Surveillance Radar. RAPCON = Radar Approach Control Center.

GROUND CONTROLLED APPROACHES - The only airborne equipment required for ground controlled approaches is a functioning radio transmitter and receiver. There are two types of ground controlled approaches - Precision and Surveillance.

PRECISION APPROACHES - Aircraft are guided to final approach to the designated instrument runway. The final approach flight path on a precision scope (PAR) is greatly expanded for increased accuracy and furnishes the controller with range, azimuth and altitude information. This permits the controller to accurately guide aircraft to touchdown on the runway.

SURVEILLANCE or ASR APPROACHES - Only the ASR scope is used and aircraft may be directed to any selected runway over approximately the same flight path the pilot would take if flying VFR. This scope furnishes range and azimuth information only. Since no altitude information is available to the controller, pilots must control their descent based on the glide angle desired, and the distance from the runway as furnished by the controller. Because ASR does not permit the same degree of accuracy as PAR, the weather minimums for a surveillance approach are usually higher than for a precision approach.

RADAR ARRIVAL AND DEPARTURE CONTROL - Radar is utilized by certain radar equipped facilities to control the flight paths of arriving or departing IFR aircraft for the purpose of expediting the flow of traffic. Aircraft operating on IFR flight plans will be afforded a minimum of three miles horizontal separation unless standard non-radar vertical, lateral or longitudinal separation exists. This should not be confused with Ground Controlled Approach (GCA) which is an instrument approach aid.

CAA RADAR UNITS - Operate continuously at the locations listed. Available to all pilots, civil and military. Contact associated CAA control tower on any frequency guarded for initial instructions, or in an emergency any CAA facility for information on nearest Radar Control. Weather minimums, associated runways and GCA procedures are listed in the Airman's Guide.

RAPCON - At certain locations, the surveillance portion of Military RAPCONS is operated by the CAA and service is available to all aircraft. These are listed below.

AIR FORCE AND NAVY GCA UNITS - Available to civil pilots in emergency or by prior arrangement with C.O. of respective facility.
Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call the nearest air traffic control facility (radio, airways, or tower, etc.) requesting GCA and further instructions.
Contact under VFR: VFR check-out of training flights should be arranged locally through Base Operations or the Control Tower.
Emergency: When receiver or transmitter difficulties exist, the tower may relay GCA approach instructions to the pilot, or the GCA operator may transmit, in blind, instructions for aircraft to make 360 degree turns for identification. In either case, instructions will be followed at the pilot's discretion.
After being inoperative, GCA units require 20 to 30 minutes for warming up. Pilots shoud anticipate requirements for GCA in flight planning and request alerting of GCA units as far in advance as possible
Civil Minimums at military installations established by the CAA are 400' ceiling and 1 statute mile visibility except in emergency unless Air Force or Navy facility being used has higher minimums. Navy units are prepared to transmit on HF from 2,000 to 18,000 kc and receive any frequency from 1,500 to 9,050 kc to aid any plane in emergency.

RADAR FLIGHT ADVISORY SERVICE: If radar advisory service is desired, the pilot of an aircraft will request such service through the appropriate Air Route Traffic Control Center, using normal en route communications facilities. ARTC will determine if service can be provided and will request pilot to change to appropriate frequency for direct communication with radar. Radar station will be identified by "THIS IS AIR FORCE RADAR ADVISORY". All suggested vectors to circumnavigate storm areas will be of advisory nature and do not relieve pilot of responsibility for safety of aircraft. If advisory service cannot be furnished for any reason, the procedure word "UNABLE" will be used. This will terminate radar advisory service to the aircraft without further explanation. This service will be available in the following ARTC Flight Advisory Areas; Chicago, St. Louis, Minneapolis, Kansas City, Albuquerque, San Antonio, Ft. Worth, Oakland, Denver, Great Falls, Los Angeles, and the area immediately around Knoxville, Tenn.

CAA OPERATED RADAR UNITS

NOTE: Transmitting frequencies below 118 mc. are not guarded. Other transmitting frequencies listed are guarded plus 122.5 mc. and 3023.5 kc. Transmit and guard 121.5 mc. all locations.

NOTICES TO AIRMEN

SPECIAL NOTICES

✓ Indicates New or Revised Special Notices

The Airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting, or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a Notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the Office of Aviation Information, Attention: W-52, CAA, Washington 25, D. C.)

Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate CAA Regional Office for coordination before they are included in the Airman's Guide.

ATC IFR CLEARANCE PHRASEOLOGY: Effective November 15, 1955, ATC facilities will resume general use of the phrase "VIA FLIGHT PLANNED ROUTE" in air traffic clearances to replace the lengthier detailed description of any portion of the route of flight that is identical to the route filed by the pilot. When used, the phrase will be preceded by sufficient detailed route of flight information to establish the flight on the filed route. The "VIA FLIGHT PLANNED ROUTE" phraseology does not include approval of altitudes filed in the flight plan. Specific altitudes assignments will be issued in each clearance. IFR flight plans filed by the pilots should contain the complete route of flight and should be relayed to air traffic control unchanged. Pilots may request route verification when considered necessary and are requested to do so whenever a filed route has been changed prior to departure. If route verification is desired prior to departure, the request should be included with the initial call for taxi clearance to avoid delay in receiving the information.

VHF INSACS-TO-PRIVATE AIRCRAFT CHANNELS: The national VHF channel for transmission from INSACS-to-private aircraft 122.2 mc was partially implemented beginning August 1, 1951. (The companion aircraft-to-INSACS frequency is 122.1 mc). Eventually all INSACS will transmit on 122.2 mc but in the meantime VHF reply to private aircraft will be furnished on the VHF range voice channel at INSACS which have not yet commissioned 122.2 mc. Pilots should consult the Airman's Guide and current Notams for information on frequencies available at specific stations. The frequency upon which the pilot expects reply should be specified in the initial call.

When an INSACS is unable to reply on the VHF range voice channel because of equipment failure or maintenance shut down, reply will be made on 121.5 mc. A small number of INSACS have not yet installed transmitting service on 121.5 mc. At these locations, the reply on 121.5 mc will be made by an adjacent control tower. Therefore, when a pilot calling such station has reason to believe that the VHF range voice channel is not operating, he should request reply on 121.5 mc.

USE OF OMNIRANGE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. The accuracy of course alignment of the omnirange over 360° azimuth is excellent when compared to that of the L/MF range, being generally within two degrees (plus or minus). On certain stations, some sectors may contain slightly larger errors, but no course published as usable in the Airman's Guide will be displaced more than 3-1/2 degrees from its theoretical location. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, infrequent brief flag alarm activity, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert of these apparent vagaries.

AUTOMATIC VOICE IDENTIFICATION: Voice identification has been added to numerous air navigational facilities (omnirange stations and outer compass locators).

Omniranges and outer compass locators where voice identification is functioning are designated in the ANRA pages by an asterisk (*) in the "class identification" column. The transmission consists of a voice announcement alternating with the usual Morse Code identification: e.g. Long Beach omnirange (voice) .—..- -.-.... (LGB in Code).

For omniranges, as shown above, normal voice identification consists of the name of the omni followed by the word "omni". However, if the omni is unattended, i.e., if no facility for providing air-ground communications services is associated with the omni, the word "unattended" will precede the word "omni". Example: AIRVILLE UNATTENDED OMNI.

TRANSMISSION OF "V" BY VAR RANGES: The letter "V" is transmitted by all VAR ranges. It precedes the usual location identifier and is separated from it by a short space. It is intended to enable pilots to distinguish instantly between the aural directional signals of VAR ranges, and those of low or medium frequency ranges, ILS and VORs located in the same general area. It will, for example, guard against the possibility of an error occuring through accidental connection of a pilot's headset to the wrong receiver. The "V" is transmitted at an appreciable higher rate of speed than the location identifier.

CIVIL USE OF MILITARY FIELDS: U. S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission.

In the case of Air Force Bases, pilots must have on file with Headquarters USAF a "HOLD HARMLESS" AF form 180 and in their possession a properly signed and executed AF form 181 permit. Application for these forms may be made to: Assistant Chief of Staff, Installations, HQ, USAF, Washington 25, D. C. This regulation will be strictly enforced.

For Naval Installations, prior permission should be requested from the Chief of Naval Operations (OP 532) via the Commanding Officer of the field concerned, (who has the authority to approve landing rights for certain categories of civil aircraft). However, with minor exceptions, authority to use Navy fields is granted only to aircraft on government business, or when no suitable civil airport is available in the vicinity.

When instrument approaches are conducted by civil aircraft at military airports, they shall be conducted in accordance with the procedures and minimums approved by the military agency having jurisdiction over the airport.

WARNING OF MAINTENANCE AT CAA NAVAIDS: During periods of routine or emergency maintenance, the coded identification (or code and voice, where applicable) will be removed from certain CAA Navaids, namely, ILS localizers, VHF ranges (VOR, TVOR and VAR) and L/MF ranges but not from "H" facilities, compass locators or 75 mc marker beacons. The removal of identification serves as a warning to pilots that the facility has been officially taken over by "Maintenance" for tune-up or repair and may be unreliable even though on the air intermittently or constantly.

NAUTICAL MILE AND STATUTE MILE ABBREVIATIONS: In the Airman's Guide, "n miles" or "n mi" stands for nautical miles; "s miles" or "s mi" for statute miles.

DVFR FLIGHT PLANS: When an IFR flight plan is cancelled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

FLIGHT PLANS: Pilots are urged to file VFR flight plans in person or by telephone prior to departure. Radio should be used for filing flight plans only when it is impossible to file in person or by telephone. This procedure is necessary in order to avoid congestion on the already busy air-ground communications channels. These channels should be reserved for essential in-flight communications. All pilots will benefit by following this practice

RUNWAY VISUAL RANGE REPORTS AT NEWARK, N. J.: Effective March 3, 1956, measurements of runway visibility for Runway 4 at Newark, New Jersey, will be in terms of Runway Visual Range which is the distance high intensity runway lights can be seen by an observer located at the runway threshold viewing the lights in the same direction as a pilot making an approach.

The ILS and FAR instrument approach procedures for Newark will be amended to authorize 2600' of runway visual range as an additional operating minimum for straight-in approaches to Runway 4. When measurements of Runway Visual Range are being taken, the tower will give pilots intending to land straight-in on runway 4, the reported Runway Visual Range. When the meteorological ceiling and visibility (contained in "main body" of sequence report which is the average weather for the airport proper) are reported below minimums, (e.g. 200.5), an approach may be conducted to Runway 4 provided Runway Visual Range is reported at or above 2600'. The "remarks" portion of the hourly weather sequence for Newark will report Runway Visual Range in hundreds of feet, and runway visibility will no longer be reported in miles and fractions.

Since Runway Visual Range recognizes the additional penetration provided by high intensity runway lights and is measured in terms of what a pilot actually sees, pilots will have better assurance of finding runway conditions substantially as reported when arriving over the threshold.

The Runway Visual Range minimum of 2600' is also based on the penetration ability of the approach lighting system installed at Newark which is designed to assure earlier transition from instrument to visual flight.

RADIO CALL-UP PROCEDURES - ARTC CENTERS: Effective February 1, 1956, aircraft on IFR flight plans making position reports direct to ARTC centers shall, in the initial call-up include the fix or geographical location over which the aircraft is reporting. Examples: "Indianapolis Center, this is TWA 55, Maxwell, over."; "Indianapolis Center, this is Beechcraft 1234, 20 south of Maxwell, over."

Pilots are reminded, however, that direct communication with the center shall NOT be established until the pilot is specifically requested to do so.

UNACCEPTABLE RADIO MESSAGES: CAA facilities will no longer accept non-safety messages (requests for ground transportion, meals, telephone calls, etc.) from pilots of aircraft in flight. Arrangements should be made by a pilot prior to departure via public communications (telephone, telegraph, etc.) for such requirements. Pilots are also reminded that transmission of such messages violates the terms of their aircraft radio license as provided in Part 9 of the FCC Regulations.

CLASSIFICATION OF ILS BACK COURSES: ILS back courses have in the past been classified as either "usable" or "unusable". It now appears that further classification of the "unusable" courses are necessary, since some back courses formerly classified as "unusable" actually may be satisfactory for intersections, holding, transitions or missed approaches, even though they are not satisfactory for back course approaches.

ILS back courses will in the future be classified as follows:

Usable - suitable for ILS back course approaches

Restricted - not suitable for ILS back course approaches, but suitable for intersections, holding, transitions or missed approaches

Unusable - not suitable for any of the above.

SPURIOUS GLIDE SLOPE INDICATIONS: CAA glide slope facilities are intended to provide reliable glide slope signals for use in conjunction with the front course of the ILS localizer. Glide slope signals may be received in other azimuths (because of stray radiation from the antennas and reflections from nearby objects) which may in some cases be sufficient to activate the airborne warning flag. Any glide slope needle activity in these other azimuths should be disregarded.

All pilots are particularly cautioned to ignore glide slope indications when making back course localizer approaches. All CAA approved procedures for back course approaches are limited to use of the localizer portion of the ILS. Any attempt to fly spurious glide slope indications on such back course approaches could result in hazardous operations.

GLIDE SLOPE FLARE: Modification of null reference glide slope facilities will result in glide slope flare at about thirty (30) feet above runway. Caution advised on automatic approaches continued past runway threshold.

IFR COMPULSORY REPORTING POINTS: In the near future, a new symbol will be used on Coast and Geodetic Survey Radio Facility Charts to indicate those compulsory reporting points over which reports need not be made by aircraft operating above 15,200 feet. Approximately 200 of the existing compulsory reporting points will be converted to this class as the various charts are revised.

Compulsory reporting points for all aircraft, reagrdless of altitude, will continue to be depicted as a solid triangle. Subscribers to these charts will be furnished a new legend sheet prior to distribution of charts containing the new symbol.

FLIGHT IN RESTRICTED AREA: Pilots are responsible for obtaining an approval from the appropriate controlling agency prior to conducting flight in Restricted Areas, when governing restrictions are in effect. ATC is unable, because of communications workload and other factors, to obtain such approval for pilots. An ATC clearance should not be considered as authority to conduct flight in Restricted Areas EXCEPT where a control area overlays a Restricted Area as ATC has responsibility only within controlled airspace.

FLIGHTS IN GRAND CANYON NATIONAL PARK: Pilots are cautioned that any unauthorized flight below the rim of the Canyon within the Park boundaries will constitute an undue hazard to persons or property and will subject the pilot to appropriate violation action. Grand Canyon National Park Regulations prohibit the landing of any aircraft within the boundaries of the Park.

✓ ON REQUEST REPORTING POINTS: The following on-request reporting points are designated and redesignated and shall become effective 31 May 1956:

NAME CHANGE

(1) PORT DEPOSIT, MD. INTSXN - the intsxn of the Baltimore, Md. VOR 52° mag radial and the Woodstown, N.J. VOR 278° mag radial. (Formerly Bainbridge, Md. Intsxn)

DESIGNATE

(1) GILL (LAKE, MICH.) INTSXN - the intsxn of the Carleton, Mich. VOR 103° mag radial and the Cleveland, Ohio VOR 027° mag radial.

(2) HOOPES, DEL. INTSXN - the intsxn of the West Chester, Pa. VOR 179° mag radial and the front course of the Philadelphia, Pa. ILS lclzr.

(3) JACKSON, MICH. INTSXN - the intsxn of the Litchfield, Mich. VOR 051° mag radial and the Salem, Mich. VOR 260° mag radial.

(4) OGDEN, MICH. INTSXN - the intsxn of the Waterville, Ohio VOR 330° mag radial and the Carleton, Mich. VOR 237° mag radial.

REDESIGNATE

(1) ATLANTIC CITY, N.J. INTSXN - the intsxn of the Woodstown, N.J. VOR 115° mag radial and the Coyle, N.J. VOR 213° mag radial.

(2) BLUE PIKE (LAKE ERIE) INTSXN - the intsxn of the Erie, Pa. VOR 284° mag radial and the SW course of Clear Creek, Canada LFR.

(3) BOOTHWYN, PA. (LF) INTSXN - the intsxn of the SW course of the Philadelphia, Pa. LFR and the NW course of the Millville, N.J. LFR.

(4) BOOTHWYN, PA. (VHF) INTSXN - the intsxn of the West Chester, Pa. VOR 129° mag radial, the front course of the Philadelphia, Pa. ILS lclzr and the Woodstown, N.J. VOR 335° mag radial.

(5) CHARLO, MONT. INTSXN - the intsxn of the Missoula, Mont. VOR 334° mag radial and the Mullan Pass, Mont. VOR 068° mag radial.

(6) DAWSONVILLE, VA. INTSXN - the intsxn of the Herndon, Va. VOR 021° mag radial and the Martinsburg, W. Va., 136° mag radial.

(7) EARL, COLO. INTSXN - the intsxn of the Pueblo, Colo. VOR 161° mag radial and the Lamar, Colo., VOR 226° mag radial.

(8) HALSMER INTSXN - the intsxn of the NW course of the Indianapolis, Ind. LF rng and the 077° mag radial of the Lafayette, Ind. VOR.

(9) MIDCRAFT, MICH. INTSXN - the intsxn of the Salem, Mich. VOR 109° mag radial and the 050° of the back course of the Ypsilanti, Mich. (Willow Run) ILS lclzr course.

(10) PITMAN, N.J. (VHF and LF) INTSXN - the intsxn of the West Chester, Pa. VOR 129° mag radial and the SE course of the Philadelphia, Pa. LFR.

(11) WINLOCK, WASH. INTSXN - the intsxn of the Olympia, Wash. VOR 162° mag radial and the Toledo, Wash. LFR west course.

✓ NON-STANDARD HOLDING PATTERNS: The following non-standard holding pattern is established and shall become effective 31 May 1956:

(1) SCOTT (BELLEVILLE), ILL. AFB INTSXN - direction of holding - SW on SW leg of LFR; direction of turn - LEFT; time - one minute; minimum altitude - 1900' MSL.

✓ RESTRICTED AREA AMENDMENTS: The following Restricted Area Amendments shall become effective as indicated:

(Part 608 - Restricted Areas - Amendment 163)
(8 June 1956)

(1) In Section 608.25, the Fort Campbell, Kentucky, area (R-63 formerly D-63), amended on July 25, 1951 in 16 F.R. 7277, is further amended by changing the "Designated Altitudes" column to read: "Surface to 26,000 feet MSL."

(2) In Section 608.48, the Fort Jackson, South Carolina, area (R-114 formerly D-114), amended on February 21, 1952 in 17 F.R. 1612, is further amended by changing the "Designated Altitudes" column to read: "Surface to 26,000 feet MSL."

(Part 608 - Restricted Areas - Amednment 164)
(14 June 1956)

(1) In Section 608.12, a Gila Bend, Ariz. area #2 (R-501), is added to read: "Description by Geographical Coordinates: Beginning at lat 32-50-25, long. 112-49-00; thence to lat 32-50-52, long. 112-42-53; thence to lat 32-49-00, long. 112-39-00; thence to lat 32-29-00, long. 112-43-00; thence to lat 32-29-00, long. 112-53-30; thence to point of beginning. Designated Altitudes: Unlimited. Time of Designation: Unlimited. Controlling Agency: Luke AFB, Ariz.

(2) In Section 608.30, a Sturgeon Bay, Mich., area (R-502), is added to read: "Description tion by Geographical Coordinates: From lat 44-48-00, long. 87-16-00; thence to lat 45-23-00, long. 86-47-00; thence to lat 45-18-00, long. 86-28-00; thence to lat 45-10-00, long. 86-17-00; thence to lat 44-39-00, long. 86-42-00; thence to lat 44-28-00, long. 86-47-00; thence to lat 44-34-00, long. 87-23-00, to point of beginning. Designated Altitudes: Surface to 45,000' MSL. Time of Designation: Sunrise to sunset, 7 days a week. Controlling Agency: Commander, 37th Air Division, Truax Fld, Madison, Wisc.".

(3) In Section 608.30, the Lower Lake Huron, Mich., area (R-60 formerly D-60), published on July 16, 1949 in 14 F.R. 4287, is redesignated as follows: "Description by Geographical Coordinates: From lat 43-33-00, long. 82-34-30; thence to lat 44-00-00, long. 82-40-00; thence to lat 44-00-00, long. 82-12-00; thence to lat 43-34-30, long. 82-07-30; thence to point of beginning. Designated Altitudes: Surface to 45,000' MSL. Time of Designation: Sunrise to sunset, 7 days a week. Controlling Agency: Commander, 4708th Air Defense Wing, Selfridge AFB, Mich.".

(4) In Section 608.30, the Lower Lake Huron, Mich., area (R-59 formerly D-59), published on July 16, 1949 in 14 F.R. 4287, is rescinded.

(5) In Section 608.39, the Melrose, N. Mex., area (R-185), amended on May 11, 1955 in 20 F.R. 3187, is further amended by changing the "Description by Geographical Coordinates" column to read: "Beginning at lat 34-28-00, long. 103-43-15; thence to lat 34-25-25, long. 103-40-00; thence to lat 34-10-00, long. 103-40-00; thence to lat 34-10-00, long. 103-55-00; thence to lat 34-28-00, long. 103-55-00; thence to point of beginning."

(Part 608 - Restricted Areas - Amendment 165)
(12 June 1956)

(1) In Section 608.58, a Guernsey, Wyo., Temporary Area is added to read: "Description by Geographical Coordinates: Beginning at lat 42-28-00, long. 104-54-00; thence to lat 42-28-00, long. 104-50-00; thence to lat 42-20-00, long. 104-44-00; thence to lat 42-18-00, long. 104-44-00; thence to lat 42-18-00, long. 104-50-30; thence to lat 42-22-00, long. 104-53-30; thence to point of beginning. Designated Altitudes: Surface to 16,000' MSL. Time of Designation: Daily 0700-2200 hours (MST), June 12 thru June 22, 1956. Controlling Agency: Adj. General, Wyoming National Guard, Cheyenne, Wyo."

✓ FLIGHT INFORMATION MANUAL CORRECTIONS: Correct Flight Information Manual, Volume 9, dated June 15, 1955 as follows:

(1) Page 24 - Columbia, Mo.: Correct CAA telephone number to read: Gibson 3-6498.
(2) Page 24 - Dillon, Mont.: Correct CAA telephone number to read: 345.
(3) Page 24 - New York, N.Y.: Correct CAA telephone number to read: OLympia 6-5370.
(4) Page 25 - Fargo, N. Dak.: Correct CAA telephone number to read: 5-8894.

✓ AERONAUTICAL CHARTS OF THE U. S. COAST AND GEODETIC SURVEY

New editions of the charts listed below will be published in about one month making former prints obsolete for use in aviation. Orders for these particular charts should be kept to a minimum until new edition is printed.

Green Bay	WAC 215	WAC 363
Spokane	WAC 268	WAC 364

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) - Month and day item was reported.
** - New or revised airport, caution area or miscellaneous data. Pilots should inscribe this information on charts and records.
★ - New or revised radio data. Pilots should inscribe this information on charts and records.
NOTE - Such items usually are cited only once, because of space limitations. Examples: erection or removal of radio or television towers, water tanks, oil derricks and permanent airport obstructions.

(15 May 1956)

ALABAMA: ANNISTON-RADIO: VOR courses 360°-070° not usable acct course bends and roughness.

BESSEMER-DURHAM ARPT: Caution-auto drag strip runs parallel to sod landing strip with separation of 50'. Auto racing is NOT done on rnwy. Drag strip ends are mrkd.

BIRMINGHAM-RADIO: VOR operg on test-basis. (4-27)

BIRMINGHAM ARPT: Caution-traffic operg in area from 165° clockwise thru 235° not visible from twr to dist of 4 s mi. Rnwy 8-26 perm closed to high performance single engine conventional lndg gear type acft, including T-6. (4-8)

CLANTON-GRAGG ARPT: Closed - const. (3-21)

DOTHAN-NAPIER FLD: Caution - helicopters from Rucker Army Air Base trng.

ELBA MUN ARPT: Unattended. Lgts on req. (4-27)

EVERGREEN-RADIO: VOR radials 320° thru N unusable acct severe scalloping and bends.

GUNTERSVILLE ARPT: Closed. (3-26)

HUNTSVILLE-RADIO: VOR radials 005°-030° unusable due to roughness and bends.

HUNTSVILLE MUN ARPT: Caution - rnwy 18-36 under const.

**MONTGOMERY-DANNELLY FLD: Taxiway from rnwy 15 to E/W taxi strip perm clsd. Dips in E/W rnwy 1500' from E end. Lgtd ditch approx 200' NE of apch end rnwy 21. Acft lndg & taking off are cautioned to avoid Maxwell AFB tfc pat. & ctl zone. Due to non-visibil, twr unable to ctl tfc on E/W parallel taxi strip W of a point adj to Air Nat'l Guard jangar. Clsd to mil. acft-const. E/W rnwy open first 5000' on E end-days, 6000' ngts-mrkd ngts, days.

MUSCLE SHOALS-RADIO: VOR courses 020°-050°, 110°-150° and 285°-335° clockwise from stn not usable beyond 15 n mi acct scalloping and bends. (4-22)

TUSCALOOSA-VAN DE GRAAFF ARPT: Tow car pulling glider intermittently on rnwy daylgt hrs durg VFR.

ARIZONA: SPECIAL NOTICE: Until July 24, 1956, captive balloons will be flown nightly from one hr after sunset to one hr before sunrise at lctns 10 mi W Gila Bend AF Aux, 2 mi S Sentinel and 3 mi E Dateland, Ariz. Surface to 1500' and lgtd by one red lgt. Extreme caution when flying at low alts near these lctns. (12-27)

AJO ARPT: Beacon and lights inoperative. (4-3)

COCHISE-RADIO: VOR/DME flgt-checked, opern normal. Coverage 015°-045°, 30 n mi; 090°-110°, 40 n mi; 190°-215°, 35 n mi; 215°-235°, 30 n mi; 235°-255°, 35 n mi at MEA.

DATELAND-SPECIAL NOTICE: Captive balloons anchored on 1500' cables will be flown 1700M Mondays thru 2400M Thursdays at Dateland and Gila Bend Aux AFB, Ariz., for approx 6 weeks. Extreme caution advised-low altitudes near these lctns. (3-12)

GILA BEND-RADIO: VOR has slow bends and scalloping starting at approx 25 to 30 n mi on 247° radial and at 30 to 35 n mi on 106° radial.

HASSAYAMPA-RADIO: VOR/DME usable to 30 n mi from 30° - 70°, 240° - 255°, 320°-345° and 40 n mi from 70°-85° at MEA. (3-30)

PHOENIX-LUKE AFB-RADIO: USAF VHF/DF unreliable below 13,000' beyond 30 n mi in WNW quad. (2-2)

PHOENIX-SKY HARBOR ARPT: Clsd to mil F-89 type acft or acft rqrg use of after burners for take-off, xcpt prior permission arpt manager. (4-11)

PRESCOTT-RADIO: VOR coverage 185°-225°, 35 n mi at 10,000'; 135°-145° & 165°-185° 39 n mi at 10,000'

SALOME, SITE# 27B, LAX-PHX: Closed. (12-14)

**TEMPE ARPT: Abandoned. (5-11)

SCOTTSDALE-THUNDERBIRD #2 ARPT: Clsd. (3-26)

TUCSON-RADIO: About May 1, VOR/DME will be shut down until approx June 1. (4-6)

TUCSON-DAVIS MONTHAN AFB-RADIO: USAF VHF and UHF - steers unrel beyond 35 mi at or below the following alt: (a) NW quad 10,000'; (b) SW quad 10,000'; (c) SE quad 12,000'; (d) NE quad 13,000'.

YUMA-RADIO: March 12 VOR shut down.

YUMA-COUNTY ARPT: B-45 type acft towing 5000' of cable and tow target in vcnty. All acft refrain from flying in close proximity to B-45 type acft in Yuma area.

ARKANSAS: EL DORADO-RADIO: DME 2000' MSL coverage 43.5 mi 325° thru N to 225°; 2000' MSL coverage 35 mi 225° thru W to 325°. (3-30)

FAYETTEVILLE-RADIO: About May 7, VOR will be shut down until approx June 4 - modernization. (3-28)

FT. SMITH ARPT: 136' lgtd drilling derrick erected 0.5 mi W and 1.0 mi S of E/W rnwy.

HARRISON ARPT: N/S, new NW/SE rnwys clsd-const. Fld clsd ngts.

HAZEN ARPT: Caution - E/W rnwy clsd. Men and equip. on fld. (11-21)

NORTH LITTLE ROCK-CENTRAL ARPT: Fld closed to all operns - const. (3-1)

TEXARKANA-RADIO: VOR 143° radial to rnwy 13 beyond tolerance due to roughness and bends.

ARKANSAS: WALNUT RIDGE-RADIO: VOR radials 290°-320°, 120°-150° and 200°-210°, unusable acct bends and course roughness. (10-14)

CALIFORNIA: ARCATA ARPT: Experimental testing of rotating lgts in inner apch zone of Rnwy 31 at infrequent times. Rotating lgts at 2100' and 1000' S of threshold of rnwy with six high intensity lgts rotating at 6 or 12 rpm.

AUBURN ARPT: Clsd to hvy acft. Lgt acft use extreme caution acct soft rnwys. (11-24)

BLYTHE-RADIO: DME coverage 165°-188°, 39 n mi at 7000'; 189°-200°, 26 n mi at 6000'; 200°-220°, 39 n mi at 6000'; 220°-293°, 43 n mi at 9000'; 293°-310°, 26 n mi at 9000'; 310°-327°, 35 n mi at 9000'. About May 15 VOR will be shut down until approx July 15. During this period, the following arwys will not be usable: Victor 64 Thermal to Blythe; V-16 Palm Springs Intersection to Hassayampa, Ariz; V-135 Needles to Yuma, Ariz.

**BORREGO VALLEY-SAN DIEGO COUNTY ARPT: 140' lgtd microwave twr erected 1000 ft NW of W end of the E-W rnwy and approx 2-1/2 mi E at lat 33-15-48, long. 116-19-46.

CAMARILLO-RADIO: All courses have multiples. (6-17)

**CORNING ARPT: Reopened. Fuel: F2. (4-9)

CRESCENT CITY-RADIO: VOR arwy radials flgt-checked. Courses 90°-330° usable dist 22 n mi; 350°-90°, 26 n mi at 7000'; 43 n mi at 8000'.

DAGGETT-RADIO: VOR flgt-checked on arwy radials only.

FAIRFIELD-TRAVIS AFB-RADIO: USAF VHF/DF bearings and communications in NW quad unreliable below 8500'. Opers 0700-1600 Mon-Fri training status only. (7-5)

FILLMORE-RADIO: VOR coverage 320°-355°, 35 n mi at 11,000'; 280°-320°, 26 n mi at 11,000'. (9-17)

FT. JONES-RADIO: VOR has lgt course roughness all quads. Only arwy radials flgt-checked.

FORTUNA-RADIO: VOR has light to moderate scalloping beyond 26 n mi. Only arwy radials flgt-checked. (10-6) DME coverage 335°-350°, 43 n mi at 3000'; 350°-10°, 43 n mi at 8000'; 10°-30°, 43 n mi at 9000'; 30°-120°, 35 n mi at 9000'; 120°-150°, 35 n mi at 6500'; 150°-335°, over water, not checked.

FRESNO AIR TERMINAL: Exercise extreme caution in vcnty, particularly when using VOR arwys. Jet acft climbing and descending in areas of extended centerlines Rnwys 29-11 and areas N and E of arpt. (10-28)

FULLERTON ARPT: Attended daylight hrs only. (4-12)

FURNACE CREEK SITE 17 RIV-DLS: N 1200' of rnwy clsd to all operns-mrkd. Entire fld clsd to all hvy or multi-eng acft. S 4500' of rnwy open to lgt acft-caution. (4-3)

KLAMATH-McBETH ARPT: Closed. (1-3)

LONG BEACH-RADIO: DME coverage 43 n mi as follows: 280°-305°, 5000'; 305°-340° 7000'; 340°-040°, 12,000'; 040°-070°, 8000'; 070°-100°, 7000'; 100°-280°, 4000'. (6-16) ILS and LF rng during VFR conditions heavy simulated instrument apch traffic. (10-25)

**LONG BEACH ARPT: Several 230' MSL portable oil derricks NW, W and S of fld. (10-21) No fuel servicing avail. for civil acft 2400-0600. N 800' apch end rnwy 16L perm clsd.

LOS ANGELES-RADIO: VOR coverage 275°-315°, 30 n mi at min en route alt. Light to moderate scalloping below 3000' MSL. (6-4)

LOS ANGELES AIR ROUTE TRAFFIC CONTROL CENTER: Center will activate high alt sector 0900 March 20. Sector will control all acft operg at specific alt at or above 25,000', IFR including jet acft operg at least 1,000' on top. All jet acft specific alt or at least 1,000' on top should ctc ARTC 301.4 mc as soon as possible after departure within or entering area inbound. (5-11)

LOS ANGELES INTERNATIONAL ARPT: Use paved areas only. New lgtd rnwy 16-34 approx. 4000' W of Sepulveda Blvd open VFR tfc only. Equip. on and adj to const areas. Pilots are urged to use extreme caution when operg off-shore just W of arpt. All jet acft departing rnwys 25L-25R climbing in VFR conditions use a 200° departure corridor which originates at a maximum of 3000' MSL approx the intersection of the extended centerlines of the above rnwys with the shoreline. Acft proceeding E-bound from Malibu Intersection in VFR conditions making a track which approximates the extended centerlines of the above rnwys are cautioned not to descend below 4000' MSL until passing the Shoreline or Del Rey FM unless cleared otherwise by ATC. Jet acft pat down-wind leg is 2500'. Acft not intending lndg at arpt should avoid apch areas to W and E below 3000' in VFR wea. Recommend cross tfc plan crossing course at 3000' or above, ceiling permitting, directly over arpt, or between LF rng and arpt. Avoid shoreline W due high performance of departing jet acft. Due non-visibility twr unable ctl tfc on last 2400' rnwy 34.

LOS ANGELES-SAN FERNANDO VALLEY ARPT: Tfc direction indicator inop 2300-0700.

[redacted]: MODESTO-RADIO: March 20, VOR shutdown until approx May 20-modernization.

OAKLAND-SPECIAL NOTICE: Pilots proposing transbry flgt should ascertain that VFR wea exists within both San Francisco and Oakland Control Zones, or should obtain ATC clearance for flgt within a ctl zone when wea is less than VFR, since ceiling and visibility mid-bay is frequently less than at the two terminals. Tfc operg in VFR wea should avoid vcnty of Alameda NAS. Extensive tfc including jets operate in tfc pat up to 2000' within a radius of 1.7 n mi fld. Exercise extreme caution in these areas.

OAKLAND-RADIO: VOR coverage 35 n mi N thru E at min instr alt. (1-14) DME coverage 30°-60°, 26 n mi at 5000'; 60°-80°, 35 n mi at 5000'; 280°-290°, 35 n mi at 4000'; 340°-350°, 35 n mi at 6000'; 350°-030°, 17 n mi at 4000'.

OAKLAND INTERNATIONAL ARPT-TOWER: ASR will issue distance values in nautical miles in connection with radar control. UHF/DF steers unreliable below 7,000' within 10 mi of stn. FLD: Dredging and clam shell equip. working S of lndg area. All booms and equip. lgtd and mrkd. Use extreme caution when flying over or within this area.

OCEANSIDE-RADIO: VOR coverage 310°-020°, 35 n mi at min en route alt.

ONTARIO-RADIO: DME coverage 135°-150°, 26 n mi at 7000'; 150°-200°, 17 n mi at 7000'; 200°-280°, 35 n mi at 7000'; 330°-350°, 26 n mi at 13,000'; 350°-0°, 35 n mi at 13,000'. May 7, VOR shut down until approximately June 1.

**ONTARIO INTERNATIONAL ARPT: Make turns on or off taxiway S side rnwy 7-25 at intsxns only. Eng runups in take-off position rnwy 7-25 prohibited less than 200' from ends of rnwy as mrkd by yellow paint lines either side. Hi intensity rnwy lgts oper. rnwy 7-25. Formation take-offs and lndgs prohibited xcpt ANG 196th lighter interceptor acft.(5-14)

OXNARD AFB-RADIO: USAF VHF/DF unreliable below 12,000' within 50 n mi.

**OXNARD VENTURA COUNTY ARPT: 160' lgtd derrick erected 700 ft N center of arpt.

PALMDALE-RADIO: VOR coverage 120°-150°, 35 n mi at 10,000'; 150°-180°, 35 n mi at 9000'.

PASO ROBLES-RADIO: DME coverage 220°-235°, 35 n mi at 6000'; 235°-245°, 26 n mi at 6000'; 245°-270°, 35 n mi at 6000'.

**PLACERVILLE-EL DORADO COUNTY ARPT: Formerly carried as Placerville Mun Arpt.

QUINCY-GANSNER FLD: E 700' E/W rnwy and taxi strip unusable.

**RAVENDALE ARPT: Correct lat and long: 40-48-15, 120-22-00. Elevation: 5300'.

RED BLUFF-RADIO: DME coverage 180°-208°, 26 n mi at 9000'; 208°-217°, 26 n mi at 10,000'; 217°-235°, 35 n mi at 10,000'. April 19 VOR shut down until approx June 1; freq will be changed to 115.7 mc. During shut-down, the current Victor Arwys may be used as direct routes using Red Bluff LFR, provided acft are equipped with ADF. MEA's remain the same as currently established on Victor Airways.

RIDGECREST-DAVIS ARPT: Lgts inop.

RIVERSIDE-RADIO: USAF VOR unreliable.

RIVERSIDE ARPT: Closed to all itinerant tfc-const.

**ROSAMOND ARPT: Elev: 2415'.

SACRAMENTO-RADIO: Disregard spurious signals and interruptions in service of voice commun INSACS and twr until approx April 30-modernization. (3-30) About May 15, VOR will be shut down until approx July 15-modernization. During this period the following Victor Arwys are affected: V-150 Sacramento to West Point intersection may be used utilizing 082° bear. from Sacramento LFR provided acft is equip. with ADF; MEA westbound 5000', Eastbound 8000'; Modesto VOR to williams VOR direct MEA 3000'. Following arwys are not usable: V-23 Sacramento to intersection with V-200; V-195 Rio intersection to Williams; V-6 Rio intersection to Reno; V-6N Sacramento to Mt. Lola intersection; V-212 Auburn intersection to Reno.

SACRAMENTO ARPT-TOWER: Voice on ILS freq 110.3 mc out of service. FLD: Twr tfc operg in SW quad should exercise caution acct extension simulated inst apchs including jets VFR weather actual apchs IFR weather.

SACRAMENTO-McCLELLAN AFB-RADIO: USAF H fac unreliable beyond 15 miles.

SALINAS-RADIO: VOR coverage 20°-95° and 135°-295°, 35 n mi at min instr alt. DME coverage 20°-44°, 26 n mi at 7000'; 44°-49°, 17 n mi at 7000'; 49°-90°, 26 n mi at 7000'; 90°-130°, 43 n mi at 7000'; 130°-145°, 26 n mi at 7000'; 145°-153°, 17 n mi at 7000'; 153°-180°, 26 n mi at 7000'; 180°-225°, 43 n mi at 7000'; 225°-300°, 43 n mi at 5000'; 300°-20°, 43 n mi at 7000'.

SAN DIEGO-RADIO: VOR coverage 50 mi MEA all quads except 20 mi MEA from 310° to 330°.

SAN DIEGO-LINDBERGH FIELD: 500' W end rnwy 9-27 closed - jet barrier.

SAN FRANCISCO: See Oakland Control Zone Notam.

[redacted]: ✱SAN FRANCISCO-RADIO-SPECIAL NOTICE: Effect. May 16, VFR acft inbound to San Francisco Intnl Arpt are required to make initial call to San Francisco apch freq 118.5 mc. This initial call should be made over one of the following reporting points: Richmond from the N; Moraga-NE; Castro Valley-ENE, Newark-E; Moffett Fld-SE; Half Moon Bay-SW; Golden Gate-NW. Apch ctl will give initial tfc ctl instructions and advise pilot when to change to lcl ctl freq for landing clearance. This procedure does not apply to VFR acft departing Oakland for San Francisco due to the short dist. involved. These VFR flights should call San Francisco twr, freq 119.1 mc, as in the past.

SAN FRANCISCO-RADIO: DME coverage 10°-30°, 17 n mi at 5000'; 30°-85°, 26 n mi at 7000'; 85°-100°, 35 n mi at 7000'; 160°-180°, 26 n mi at 5000'; 180°-225°, 17 n mi at 5000'; 225°-265°, 26 n mi at 5000'; 345°-10°, 35 n mi at 4000'.

SAN FRANCISCO INTERNATIONAL ARPT-TOWER: Interference on 119.1 mc vicinity ILS OM.

SAN FRANCISCO GAP-RADIO: Homing fac unreliable in area 25° thru E to 130°.

SAN RAFAEL-HAMILTON AFB-RADIO: USAF VHF/DF unreliable 340°-135° clockwise below 11,000'.

SANTA BARBARA-RADIO: DME coverage 325°-30°, 26 n mi at 9000'; 30°-45°, 35 n mi at 9000'; 80°-95°, 35 n mi at 4000'; 110°-260°, not checked. Reception 3023.5 kc unreliable daylight hours.

**SANTA MARIA-PUBLIC ARPT: Unicom.

SANTA MONICA-RADIO: TVOR radials 030°, 075°, 210°, 260° and 323° usable.

SANTA MONICA ARPT: Service avail only between 0700-2100 daily. Extreme caution advised during ngt use of fld due to unlgtd open storm drain ditch 175' from S edge of main rnwy. An unlgtd unmrkd difference in elev variable to as much as 25' exists between the open storm drain ditch and taxiway. All taxiways unlgtd.

THERMAL-RADIO: VOR and DME coverage 330° thru 360° to 060°, 20 n mi; 060°-085°, 40 n mi; 145°-175°, 40 n mi; 175° thru 180° to 250°, 20 n mi; 250°-280°, 40 n mi at min en route alt.

UKIAH-RADIO: DME coverage 43 n mi; 305°-355° at 6500'MSL; 355°-60° at 9000'; 60°-100° at 7000'; 100°-150° at 6000'. 105° thru S and W to 305° over water not checked.

**VICTORVILLE-CIRCLE M RANCH ARPT: Abandoned.

VICTORVILLE-GEORGE AFB-RADIO: USAF VHF/DF steers unreliable 235°-325° and 360°-045°, below 15,000'.

COLORADO: ✱AKRON-RADIO: May 10, trans and rcvr 243.0 and 255.4 mc cmsnd. Rcvd too late for inclusion on ANRA page.

COLORADO SPRINGS-PETERSON FLD: Caution-lndg acft due to rise in terrain at apch end rnwy 31. Const on ramp SE of twr.

DENVER-STAPLETON FLD: Rnwy 8L-26R clsd to operns heavier than DC-3 acft xcpt when absolutely necessary for taxiing W of rnwy 3-21. Hvy air tfc N and E due to extensive instrument trng. Flashing amber lgt in segmented circle indicates rgt hand tfc. Two-way rdo rqrd capable of communicating with twr.

EADS ARPT: Emergency only-rough.

GRAND JUNCTION-RADIO: Soon, ILS glide slope will be shut down until approximately June 8. Soon lclzr will be shut down.

LONGMONT ARPT: NW/SE rnwy under const.

PUEBLO-SPECIAL NOTICE: Ordnance depot approx 14.8 n mi E at lat 38-16-53, long. 104-18-00, conducting demolition work-days.

THURMAN-RADIO: About May 21, VOR will be shut down until approx June 21. During this period the following arwys will be affected: V-4 Denver to Goodland direct MEA 11,000'. The following arwys will not be usable: F-4N Thurman - Goodland; V-148 Thurman - Imperial.

CONNECTICUT: **GROTON-TRUMBULL ARPT: Unicom.

HARTFORD-BRAINARD FLD: Rnwy 9-27 closed. (5-14)

**MERIDEN ARPT: Unicom.

SIMSBURY ARPT: Experimental dropping of parachutes on fld during VFR wea. days Mon thru Fri. Field occasionally closed by standard marker.

WAREHOUSE POINT-SKYLARK ARPK: Caution - const N side.

WILTON-RADIO: VOR has minor bends in SW quad out to 17 n miles. DME coverage 270°-285°, 35 nautical miles at 3000'; 320°-360°, 35 nautical miles at 3000'; 360°-015°, 35 n miles at 2500'.

[redacted]: GEORGETOWN-SUSSEX COUNTY ARPT: Caution, NNE/SSW and NNW/SSE rnwys rough. Men and equip on fld. Extensive glider activity weekends and evenings.

WILMINGTON-NEW CASTLE CO. ARPT-TOWER; About May 25, tower frequency will be changed to 278 kc.

DIST. OF COLUMBIA: WASHINGTON-SPECIAL NOTICES: (1)Caution - dynamiting daily, heavy charges, dam const along E bank Potomac River, 3/4 mi N of Key Bridge at Dalecaria, Md. (2) Thru 31 July 1956, special VFR operating rules effective in hi-density zone. Zone identical with Wash. control zone excluding Washington-Virginia Arpt and prohibited areas. Altitudes - surface to 3000' N of and 700' to 3000' S of Washington rng. Two-way rdo required. Prior to take-off within zone or entry for landing in zone, establish rdo communication with ATC tower of take-off or landing and maintain continuous listening watch. Acft passing thru zone contact and maintain continuous listening watch with WNA control twr. Helicopters excepted, regardless of other VFR clearance, no VFR flight within zone when grnd visibility less than one mile, except when smoke, dust, snow, sand, then VFR flight permissible with one-half mi visibility. Do not exceed 180 mph (156 knots) unless operational characteristics require more, in which case use minimum speed consistent with safety.

WASHINGTON-RADIO: LF rng SE course bends 4 to 9 n mi from stn; 17 to 22 n mi from stn, multiples 3°- to 3.5° S.
